

Study & Evaluation Scheme

of

Bachelor of Technology (Computer Science & Engineering) [Applicable w.e.f. Academic Session - 2023-24 till revised] *[As per CBCS guidelines given by UGC]*

TEERTHANKER MAHAVEER UNIVERSITY
N.H.-24, Delhi Road, Moradabad, Uttar Pradesh-244001
Website: www.tmu.ac.in

TEERTHANKER MAHAVEER UNIVERSITY
(Established under Govt. of U.P. Act No. 30, 2008)
Delhi Road, Bagarpur, Moradabad (U.P.)

<u>Study & Evaluation Scheme</u>	
<u>SUMMARY</u>	
Institute Name	COLLEGE OF COMPUTING SCIENCES & INFORMATION TECHNOLOGY
Programme	Bachelor of Technology (Computer Science & Engineering)
Duration	<i>Four Years full time(Eight Semesters)</i>
Medium	<i>English</i>
Minimum Required Attendance	75%
<u>Credits</u>	
Minimum Credits Required for Degree	188

Assessment:					
Evaluation			Internal	External	Total
Theory			40	60	100
Practical/ Dissertations/ Project Reports/ Viva-Voce			50	50	100
Class Test-1	Class Test-2	Class Test-3	Assignment(s)	Attendance & Participation	Total
Best two out of three					
10	10	10			
Duration of Examination			External	Internal	
			3 Hours	1.5 Hours	

To qualify the course a student is required to secure a minimum of 45% marks in aggregate including the semester end examination and teachers continuous evaluation.(i.e. both internal and external).A candidate who secures less than 45% of marks in a course shall be deemed to have failed in that course. The student should have at least 45% marks in aggregate to clear the semester.

Provision for delivery of 25% content through online mode.

Policy regarding promoting the students from semester to semester & year to year. No specific condition to earn the credit for promoting the students from one semester to next semester.

Maximum Duration: Maximum no of years required to complete the program: N+2 (N=No of years for program for B.TECH(CSE) N=4)

<u>Question Paper Structure</u>	
I	The question paper shall consist of six questions. Out of which first question shall be of short answer type (not exceeding 50 words) and will be compulsory. Question no. 2 to 6 (from Unit-I to

	V) shall have explanatory answers (approximately 350 to 400 words) along with having an internal choice within each unit.			
2	All questions shall have internal choice within each unit; each question will carry 10 marks.			
Evaluation of practical course [From Second Year Onwards]				
1	Practical Courses Internal Evaluation (50 marks)			
	EXPERIMENT (30 MARKS)	ATTENDANCE (10 MARKS)	VIVA (10 MARKS)	TOTAL INTERNAL (50 MARKS)
2	Practical Courses External Evaluation (50 marks) The external evaluation would also be done by the External Examiner based on the experiment performed during the examination.			
	EXPERIMENT (30 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	TOTAL EXTERNAL (50 MARKS)
IMPORTANT NOTES:				
1	The purpose of examination should be to assess the Course Outcomes (CO) that will ultimately lead to of attainment of Programme Specific Outcomes (PSOs). A question paper must assess the following aspects of learning: Remember, Understand, Apply, Analyze, Evaluate & Create (reference to Bloom's Taxonomy).			
2	Case Study is essential in every question paper (wherever it is being taught as a part of pedagogy) for evaluating higher-order learning. Not all the courses might have case teaching method used as pedagogy.			
3	There shall be continuous evaluation of the student and there will be a provision of fortnight progress report.			
4	Progression: There is no restriction to earn minimum credits for progression from semester to semester and year to year.			

Program Structure-B.TECH(CSE)

A. Introduction:

An undergraduate degree programme in computer engineering aims to provide students with a solid foundation in the underlying principles of computer engineering before students move forward and decide on a specialization in an area of interest later in the course. The course will comprise of a range of learning modes- laboratory work tutorials, lectures, project work and individual research. Engineering bachelor course will take four years for completion. Computer engineering seeks to understand the application of computer science in the form of software and hardware. It comprises of the skills like computer programming languages, database utilities, web programming and others.

Students will develop and gain various skills that are transferable within the engineering world and practical skills that are equally useful in plenty of other sectors. Problem-solving skills are honed, and their interpersonal and communication skills will also improve with the amount of team work that they will be required to do. Students will also learn how to better manage their time and resources and assess the risks involved in a certain project. Other useful skills that they will learn include design, leadership and organizational skills.

The institute emphasis on the following courses *balanced with core and elective courses*: The curriculum of B.Tech. program emphasizes an intensive, flexible engineering education with 146 credits of core courses (all types), 22 credits of electives and 20 credits of field/internship projects. Total 188 credits are allotted for the B.Tech. degree.

The programme structure and credits for B.Tech. are finalized based on the stakeholders' requirements and general structure of the programme. Minimum number of classroom contact teaching credits for the B.Tech. program will be 168 credits and Project/internship will be of 20 credits. However, the total number of the credits for award of B.Tech. degree will be 188 credits. Out of 188 total credits of classroom contact teaching, 57 credits are to be allotted for Professional core courses (PCC), 19 credits are allotted to Basic Science Courses (BSC), 11 credits are allotted to Engineering Science Courses (ESC), 6 credits are allotted to open elective courses (OEC), 14 credits are allotted to Humanities and Social Sciences including Management courses (HSMC), 16 credits are allotted to Professional Elective courses (PEC), 6 credits are allotted to skill enhancement course (SEC), 6 credits are allotted to Learning by Project Based Learning Entrepreneurial Initiative (LPBEI), 3 credits are allotted to Co-Curricular Activity (CCA), 1 credit for Deep Reading (DR) and rest of 26 credits for Laboratory courses ,

Credit Category Distribution:

The category of programme B.Tech is mentioned below:

B.TECH (CSE): Four-Year (8-Semester) CBCS Programme			
Basic Structure: Distribution of Courses			
S.No.	Type of Course	Credit Hours	Minimum credit required
1	Professional Core Courses (PCC)	3 Courses of 4 Credit Hrs. each (Total Credit Hrs. 3X4) 15 Courses of 3 Credit Hrs. each (Total Credit Hrs. 15X3)	57
2	Professional Elective Courses (PEC)	5 Courses of 3 Credit Hrs. each (Total Credit Hrs. 5X3) 1 Courses of 1 Credit Hrs. each (Total Credit Hrs. 1X1)	16
3	Mandatory Courses (MC)	1 Courses of 3 Credit Hrs. each (Total Credit Hrs. 1X3)	3
4	Laboratory Courses (LC)	5 Courses of 2 Credit Hrs. each (Total Credit Hrs. 5X2) 16 Courses of 1 Credit Hrs. each (Total Credit Hrs. 16X1)	26
5	Project / Industrial Training/Seminar (PROJ)	1 Courses of 6 Credit Hrs. each (Total Credit Hrs. 1X6) 2 Courses of 4 Credit Hrs. each (Total Credit Hrs. 2X4) 3 Courses of 2 Credit Hrs. each (Total Credit Hrs. 3X2)	20
6	Open Elective Courses (OEC)	2 Courses of 3 Credit Hrs. each (Total Credit Hrs. 2X3)	6
7	Basic Science Courses (BSC)	4 Courses of 4 Credit Hrs. each (Total Credit Hrs. 4X4) 1 Courses of 3 Credit Hrs. each (Total Credit Hrs. 1X3)	19
8	Engineering Science Courses (ESC)	2 Courses of 4 Credit Hrs. each (Total Credit Hrs. 2X4) 1 Courses of 3 Credit Hrs. each (Total Credit Hrs. 1X3)	11
9	Humanities And Social Science Including Management Courses (HSMC)	2 Courses of 3 Credit Hrs. each (Total Credit Hrs. 2X3) 4 Courses of 2 Credit Hrs. each (Total Credit Hrs. 4X2)	14
10	Skill Enhancement Course (SEC)	6 Courses of 1 Credit Hrs. each (Total Credit Hrs. 6X1)	6
11	Co-Curricular Activity (CCA)	3 Courses of 1 Credit Hrs. each (Total Credit Hrs. 3X1)	3
12	Learning by Project Based Entrepreneurial Initiative (LPBEI)	3 Courses of 2 Credit Hrs. each (Total Credit Hrs. 3X2)	6
13	Deep Reading (DR)	1 Course 1 credit (Total Credit Hrs. 1X1)	1
Total 74 Courses with Credits			188

Contact hours include work related to Lecture, Tutorial and Practical (LTP), where our institution will have flexibility to decide course wise requirements.

B. Choice Based Credit System (CBCS)

Choice Based Credit System (CBCS) is a versatile and flexible option for each student to achieve his target number of credits as specified by the UGC/AICTE and adopted by our University.

The following is the course module designed for the B.TECH (CSE) program:

Professional Core Course (PCC): Professional core courses of B.TECH (CSE) program will provide a holistic approach to computer education, giving students an overview of the field, a basis to build and specialize upon. These core courses are the strong foundation to establish computer knowledge and provide broad multi-disciplined knowledge can be studied further in depth during the elective phase.

The core courses will provide more practical-based knowledge, case-based lessons and collaborative learning models. It will train the students to analyze, decide, and lead-rather than merely know-while creating a common student experience that can foster deep understanding, develop decision-making ability and contribute to the society at large.

A wide range of core courses provides groundwork in the basic computer disciplines: programming languages, Database, Web Programming, Mobile Applications, Big data, Data Mining, Machine Learning etc.

The integrated foundation is important for students because it will not only allow them to build upon existing skills, but they can also explore career options in a range of industries, and expand their understanding of various computer fields.

We offer core courses from semester III onwards during the B.Tech. program. There will be 3,4 and 2 credits for each core course offered.

HSMC – (Humanities and Social Sciences including Management courses): As per the AICTE guidelines of Choice Based Credit System (CBCS) for all Universities, including the private Universities, the **Humanities and Social Sciences including Management courses** are actually Ability Enhancement Compulsory Course (AECC) which is designed to develop the ability of students in communication (especially English) and other related courses where they might find it difficult to communicate at a higher level in their prospective job at a later stage due to lack of practice and exposure in the language, etc. Students are motivated to learn the theories, fundamentals and tools of communication which can help them develop and sustain in the corporate environment and culture. We offer two HSMC courses of 3 credits and four courses of 2 credits in different semesters of engineering course.

Basic Science Course (BSC): Basic Science Course of B.TECH (CSE) program will provide a basic foundation to build the knowledge in the field of engineering and science. The BSC consists of courses like mathematics, physics and chemistry. These BSC courses has been placed in Semester-I, II and III. Total 19 credits has been assigned to BSC with 4 Courses of 4 Credit, 1 Courses of 3 Credit.

Engineering Science Course (ESC): Engineering Science Course of B.TECH (CSE) program will provide a basic foundation of the various field of engineering like Electrical, Electronics, Mechanical and Civil. These ESC courses has been placed in Semester-I & II and total 11 credits has been assigned with 2 Courses of 4 Credit, 1 Courses of 3 Credit .

Open Elective Course (OEC): Open Elective is an interdisciplinary additional subject that is compulsory in the seven and eight semester of a program. The score of Generic Elective is counted in your overall aggregate marks under Choice Based Credit System (CBCS). Each Generic Elective paper will be of 3 Credits and students will have the choice of taking 2 OEC: 1 each in Semester VII & VIII. Each student has to take Open Electives from department other than the parent department. Core / Discipline Specific Electives will not be offered as Generic Electives.

Mandatory Course (MC): This is a compulsory course that does not have any choice and will be of 3 credits. Each student of B.TECH(CSE) program has to compulsorily pass the Environment Studies course and acquire 3 credits.

Skill Enhancement Course (SEC): A Skill Enhancement Course is a compulsory courses of 1-credit each course, which is basically meant to enhance general ability of students in areas like soft skills, quantitative aptitude and reasoning ability - required for the overall development of a student and at the same time crucial for industry/corporate demands and requirements. The student possessing these skills will definitely develop acumen to perform well during the recruitment process of any premier organization and will have the desired confidence to face the interview. Moreover, these skills are also essential in day-to-day life of the corporate world. The aim is to nurture every student for making effective communication, developing aptitude and a general reasoning ability for a better performance, as desired in corporate world. There shall be four courses of Aptitude in Semester III, IV, V & VI semesters and two courses of Soft Skills in V & VI Semesters. It will be compulsory for every student to pass these courses with minimum 45% marks to be eligible for the certificate.

Professional Elective Course (PEC): The discipline specific elective course is chosen to make students specialist or having specialized knowledge of a specific domain. It will be covered from Vth semester onward of the program relevant to chosen disciplines of core courses of the program. Each student has to choose six Program Elective Course (PEC); 1 PEC in Semester-V of 3 credit, 1 PEC in Semester-VI of 3 credit, 2 PEC in Semester-VII of 3 credit and 1 credit each, 2 PEC in Semester VIII of 3 credit.

Laboratory Course (LC): The Lab Course (LC) is the laboratory course which student has to take as per the core courses. In computer science and engineering these lab course has the emphasis on technicalities related to enhancing the knowledge in programming languages / Database / web programming. Total 21 LC has to be chosen across the eight semester of with 5 courses of 2 credit and 16 courses of 1 credit.

Project / Industrial Training/ Seminar-Field Project (PROJ): The project and Industrial training has to be taken as per the guideline issued from time to time. It helps to provide the industrial exposure to the students. They are being able to learn, enhance their skills and utilize the learnt concept to be able to understand the facts practically. Total 20 credits are being assigned to it with 2 courses of 2 credit each in Vth Semester, 1 course of 2 credit in VI semester, 2 course of 4 credit in VIIth semester, 1 course of 6 credit in VII semester.

Learning by Project Based Entrepreneurial Initiative (LPBEI): Learning by project-based entrepreneurial initiative refers to an educational approach where students engage in hands-on, practical projects with an entrepreneurial focus. Instead of relying solely on traditional classroom instruction, students work on real-world projects that simulate entrepreneurial experiences and challenges. These initiatives aim to provide students with opportunities to develop essential entrepreneurial skills, such as critical thinking, problem-solving, creativity, teamwork, and business acumen. The emphasis is not only on the outcome of the project but also on the learning process itself. Students are encouraged to actively explore and apply theoretical concepts, gather and analyze data, make informed decisions, and reflect on their experiences. Through these initiatives, students gain practical experience, learn to navigate real-world challenges, and develop the skills and mindset necessary for entrepreneurship. Total 6 credits are being assigned to it with 3 courses of 2 credit each in II, IV & VI Semester.

C. Program Outcomes for Engineering:

PO – 1	Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO – 2	Problem analysis& Solving: Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO – 3	Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO – 4	Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO – 5	Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
PO – 6	Social Interaction & effective citizenship: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO – 7	Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO – 8	Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO – 9	Attitude (Individual and team work): Function effectively as an individual, and as member or leader in diverse teams, and in multidisciplinary settings.

PO – 10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clean instructions.
PO – 11	Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO – 12	Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

D. Programme Specific Outcomes (PSOs)

The learning and abilities or skills that a student would have developed by the end of Four-year **B.TECH(CSE):**

PSO – 1	Developing skills for creating computational solutions with emerging technologies, programming languages, mathematical foundations, algorithmic principles and open source platforms to solve complex engineering problems.
PSO – 2	Ability to understand the evolutionary changes in computing by applying standard practices and skills acquired through computer engineering to provide solutions with innovative ideas and interdisciplinary research.
PSO – 3	Ability to employ modern computer languages, environments, and platforms in creating innovative career paths to be an entrepreneur and pursue higher studies in their respective domains.

E. Pedagogy & Unique practices adopted: “Pedagogy is the method and practice of teaching, especially for teaching an academic subject or theoretical concept”. In addition to conventional time-tested lecture method, the institute will emphasize on experiential learning:

1. Case Based Learning: Case based learning enhances student skills at delineating the critical decision dilemmas faced by organizations, helps in applying concepts, principles and analytical skills to solve the delineated problems and develops effective templates for business problem solving. Case method of teaching is used as a critical learning tool for effective learning and we encourage it to the fullest.

2. Role Play & Simulation: Role-play and simulation are forms of experiential learning. Learners take on different roles, assuming a profile of a character or personality, and interact and participate in diverse and complex learning settings. Role-play and simulation function as learning tools for teams and groups or individuals as they "play" online or face-to-face. They alter the power ratios in teaching and learning relationships between students and educators, as students learn through their explorations and the viewpoints of the character or personality they are articulating in the environment. This student-centered space can enable learner-oriented assessment, where the design of the task is created for active student learning. Therefore, role-play& simulation exercises such as virtual share trading, marketing simulation etc. are being promoted for the practical-based experiential learning of our students.

3. Video Based Learning (VBL) & Learning through Movies (LTM): These days technology has taken a front seat and classrooms are well equipped with equipment and gadgets. Video-based learning has become an indispensable part of learning. Similarly, students can learn various concepts through movies. In fact, many teachers give examples from movies during their discourses. Making students learn few important theoretical concepts through VBL & LTM is a good idea and method. The learning becomes really interesting and easy as videos add life to concepts and make the learning engaging and effective. Therefore, our institute is promoting VBL & LTM, wherever possible.

4. Field / Live Projects: The students, who take up experiential projects in companies, where senior executives with a stake in teaching guide them, drive the learning. All students are encouraged to do some live project other their regular classes.

5. Industrial Visits: Industrial visit are essential to give students hand-on exposure and experience of how things and processes work in industries. Our institute organizes such visits to enhance students' exposure to practical learning and work out for a report of such a visit relating to their specific topic, course or even domain.

6. MOOCs: Students may earn credits by passing MOOCs as decided by the college. Graduate level programs may award Honors degree provided students earn pre-requisite credits through MOOCs.

University allows students to undertake additional subjects/course(s) (In-house offered by the university through collaborative efforts or courses in the open domain by various internationally recognized universities) and to earn additional credits on successful completion of the same. Each course will be approved in advance by the University following the standard procedure of approval and will be granted credits as per the approval.

Keeping this in mind, University proposed and allowed a maximum of two credits to be allocated for each MOOC courses. In the pilot phase it is proposed that a student undertaking and successfully completing a MOOC course through only NPTEL/Swayam could be given 2 credits for each MOOC course.

For smooth functioning and monitoring of the scheme the following shall be the guidelines for MOOC courses, Add-on courses carried out by the College from time to time.

- a) This is recommended for every student to take at least one MOOC Course throughout the programme.
- b) There shall be a MOOC co-ordination committee in the College with a faculty at the level of Professor heading the committee and all Heads of the Department being members of the Committee.
- c) The Committee will list out courses to be offered during the semester, which could be requested by the department or the students and after deliberating on all courses finalize a list of courses to be offered with 2 credits defined for each course and the mode of credit consideration of the student. The complete process shall be obtained by the College before end of June and end of December for Odd and Even semester respectively of the year in which the course is being offered. In case of MOOC course, the approval will be valid only for the semester on offer.
- d) Students will register for the course and the details of the students enrolling under the course along with the approval of the Vice Chancellor will be forwarded to the Examination department within fifteen days of start of the semester by the Coordinator MOOC through the Principal of the College.

- e) After completion of MOOC course, Student will submit the photo copy of Completion certificate of MOOC Course to the Examination cell as proof.
- f) Marks will be considered which is mentioned on Completion certificate of MOOC Course.

College will consider the credits only in case a student fails to secure minimum required credits then the additional subject(s) shall be counted for calculating the minimum credits required for the award of degree

7. Special Guest Lectures (SGL): Some topics/concepts need extra attention and efforts as they either may be high in difficulty level or requires experts from specific industry/domain to make things/concepts clear for a better understanding from the perspective of the industry. Hence, to cater to the present needs of industry, we organize such lectures, as part of lecture-series and invite prominent personalities from academia and industry from time to time to deliver their vital inputs and provide greater insights.

8. Student Development Programs (SDP): Harnessing and developing the right talent for the right industry an overall development of a student is required. Apart from the curriculum teaching various student development programs (training programs) relating to soft skills, interview skills, SAP, Advanced excel training etc. that may be required as per the need of the student and industry trends, are conducted across the whole program. Participation in such programs is solicited through volunteering and consensus.

9. Industry Focused programmes: Establishing collaborations with various industry partners to deliver the programme on sharing basis. The specific courses/contents are to be delivered by industry experts to provide practice based insight to the students.

10. Special Assistance Programme for Slow & Fast Learners: The College gets a diverse group of students every year. They differ in terms of their intelligence, efforts and interest. We make efforts to identify them as Slow and fast learners within first three months of their joining. Slow learners are given extra time and sessions to bridge the learning gap under the guidance of faculty coordinator and Fast learners are provided challenging assignments/Projects/Readings and learning opportunity

11. Orientation Program: The Orientation Programme is designed keeping in mind the guidelines of UGC & the Council. This Programme is for 03 Weeks duration. The Programme designed by the College is Approved by the office of the Vice Chancellor. The purpose is to make the fresh students comfortable and provide awareness about the college and the university. The Topics covered are multi -faceted encompassing: Academic rules & regulation, Examination rules & regulation, Learning resources, participation in Extra - curricular & extra Mural Activities, Discipline, Conduct, Motivational talks, Industry talks, & Bridge Courses/content etc

12. Mentoring Scheme: Every Student shall be provided with a faculty Mentor to help him /her in their personal & Academic Issues. The mentor maintains a register of all his/her mentees with complete personal & parents 'details. It is essential to have at least to meet once in a month. The mentor enters the discussions held, advice given and efforts & improvements made by the mentee. This register of the mentor must be counter signed by the HOD once a month and by the Principal once in a semester

13. Career & Personal Counseling: Helps Gain Confidence and Insight. Career Counselling helps a counselee understand the hurdles in his/her career path. This knowledge helps to develop the confidence to overcome these hurdles. It is the duty of a good counselor to provide such insight and confidence to the counselee.

14. Competitive Exam Preparation: It is true that competitive exams are not that easy to ace it, but it is also not something impossible. With proper guidance and hard work of faculties, student's can easily crack any competitive exam such as GATE, Bank Services, Civil Services or any other govt. administrative platform.

15. Co-curricular Activities: organizing & participation in extracurricular activities will be mandatory to help students develop confidence & face audience boldly. It brings out their leadership qualities along with planning & organizing skills. Students undertake various cultural, sports and other competitive activities within and outside then campus. This helps them build their wholesome personality.

16. Participation in Workshops, Seminars & writing & Presenting Papers: A seminar may have several purposes or just one purpose. For instance, a seminar may be for the purpose of education, such as a lecture, where the participants engage in the discussion of an academic subject for the aim of gaining a better insight into the subject. Other forms of educational seminars might be held to impart some skills or knowledge to the participants.

17. Formation of Student Clubs, Membership & Organizing & Participating events: Computer Science clubs channelize the energies of students and make use of their skills and talents, which satisfy their instincts and urges and helps in their overall personality development. Through activities of a computer science club, learning of computer science and its applications become joyful. The computer science club caters to freedom for expression, where as the classroom atmosphere leads to conformity and repression. Students organize thought and translate into action.

18. Capability Enhancement & Development Schemes: The development of soft skills has become important in today's fast growing world. The students at the college are taught to communicate and interact at a professional level. The qualities of confidence and critical thinking are developed making the students better at soft skills. Soft skill development courses inculcate ethical attitude towards others and also help in the nurturing of better interpersonal skills. Much of the communication related activities are developed and taught to students who are willing and interested to enhance their skills.

19. Library Visit & Utilization of E-Learning Resources: Student can visit the library from morning 10 AM to evening 8 PM. Library created its resources Database and provided Online Public Access Catalogue (OPAC) through which users can be accessed from any of the computer connected in the LAN can know the status of the book. Now we are in process to move from OPAC to KOHA.

- a) Institute Library & Information is subscribing online e-books and e-journals databases (DELNET and EBSCO host E-databases) as per the requirement of the institute and fulfilling AICTE norms. IP based access is given to all computers connected on campus LAN to access e-journals.
- b) For the effective utilization of resources, Information Literacy training programs are conducted to the staff and students.
- c) Wi-Fi enabled campus
- d) Regular addition of latest books and journals
- e) Well maintained e-library to access e-resources

Study & Evaluation Scheme

B. Tech. (Computer Science & Engineering) Semester I

S. No	Course Category	Course Code	Course	Periods			Credit	Evaluation Scheme

Scheme of Professional Elective Courses (PEC)

Professional Elective Courses (PEC) I (Semester-V)- Select any one course from Group No 1 given below:			
1	[Group No 1] Professional Elective Courses (PEC)-I	Course code	Course
		ECS506	ERP System
		EHM504	Managerial Economics & Engineering
		ECS512	E-commerce
		ECS513	Software Project Management
		ECS514	Software Testing
Professional Elective Courses (PEC)-II (Semester-VI) - Select any one course from Group No 2 given below:			
2	[Group No 2] Professional Elective Courses (PEC)-II	Course code	Course
		ECS606	Real Time Operating System
		ECS607	Soft Computing
		EEC606	Microprocessor & Applications
		ECS603	Computer Graphics
		ECS610	Cyber Law & Information Security
		ECS613	Compiler Design and Construction
		ECS614	Multimedia & Animation
Professional Elective Courses (PEC)-III (Semester-VII) - Select any one course from Group No 3 given below:			
3	[Group No 3] Professional Elective Courses (PEC)-III	Course code	Course
		ECS713	Data compression
		ECS716	Digital Image Processing
		ECS5717	Android Programming
Professional Elective Courses (PEC)-IV (Lab) (Semester-VII) - Select any one course from Group No 4 same as one selected from Group No 3 mentioned above			
4	[Group No 4] Professional Elective Courses (PEC)-IV (Lab)	Course code	Course
		ECS754	Data compression(LAB)
		ECS756	Digital Image Processing Using SCI-Lab (Lab)
		ECS757	Android Programming (Lab)

Professional Elective Courses (PEC)-V (Semester-VIII) - Select any one course from Group No 5 given below:			
5	[Group No 5] Professional Elective Courses (PEC)-V	Course code	Course
		ECS809	Pattern Recognition
		ECS810	Neural Network
		ECS811	Natural Language Processing
		ECS814	Block Chain Technology
Professional Elective Courses (PEC)-VI (Semester-VIII) - Select any one course from Group No 6 given below:			
6	[Group No 6] Professional Elective Courses (PEC)-VI	Course code	Course
		ECS805	Distributed System
		ECS815	Concept of IoT(Internet of Things)
		ECS813	Machine Learning

Course Code: EAS116	Basic Science Course-1 B.Tech.- Semester-I Engineering Mathematics-I	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Understanding the concepts of eigenvalues and eigenvectors, Optimization & derivatives of functions of several variables, partial and total differentiation, implicit functions.	
CO2.	Understanding the concepts of curl and divergence of vector field.	
CO3.	Understanding of Green's theorem, Gauss Theorem, and Stokes theorem.	
CO4.	Applying the concept of Leibnitz's theorem for successive derivatives.	
CO5.	Analyzing the integrability of a differential equation to find the optimal solution of first order first degree equations.	
CO6.	Evaluating the double integration and triple integration using Cartesian, polar co-ordinates and the concept of Jacobian of transformation.	
Course Content:		
Unit-1:	Brief history of Engineering mathematics, Role of Indian Mathematician in Engineering Determinants- Rules of computation; Linear Equations and Cramer's rule. Matrices: Elementary row and column transformation; Rank of matrix; Linear dependence; Consistency of linear system of equations; Characteristic equation; Cayley-Hamilton Theorem (without proof); Eigen values and Eigen vectors; Complex and Unitary matrices.	8 Hours
Unit-2:	Differential Equation-- First order first degree Differential equation: variable separable, Homogeneous method, Linear differential equation method, Exact Differential equation.	8 Hours
Unit-3:	Differential Calculus: Leibnitz theorem; Partial differentiation; Euler's theorem; Change of variables; Expansion of function of several variables, Jacobians, Error function.	8 Hours
Unit-4:	Multiple Integrals: Double integral, Triple integral, Beta and Gamma functions; Dirichlet theorem for three variables, Liouville's Extension of Dirichlet theorem.	8 Hours
Unit-5:	Vector Differentiation: Vector function, Differentiation of vectors, Formulae of Differentiation, Scalar and Vector point function, Geometrical Meaning of Gradient, Normal and Directional Derivative, Divergence of a vector function, Curl of a vector Vector Integration: Green's theorem, Stokes' theorem; Gauss' divergence theorem.	8 Hours
Text Books:	1. Grewal B.S., <i>Higher Engineering Mathematics</i> , Khanna Publishers.	
Reference Books:	1. Kreyszig E., <i>Advanced Engineering Mathematics</i> , Wiley Eastern. 2. Piskunov N, <i>Differential & Integral Calculus</i> , Moscow Peace Publishers. 3. Narayan Shanti, <i>A Text book of Matrices</i> , S. Chand	

	*Latest editions of all the suggested books are recommended.	
<u>Additional electronics reference material:</u>	<ol style="list-style-type: none"> https://www.youtube.com/watch?v=EGnI8WyYb3o https://www.youtube.com/watch?v=ksS_yOK1vtk&list=PLbRMhDVUMngfIrZCNOyPZwHUU1pP66vQW 	
<u>Course Code:</u> EAS112/ 212	Basic Science Course-2 B.Tech.- Semester-I Engineering Physics	L-3 T-1 P-0 C-4
<u>Course Outcomes:</u>	On completion of the course, the students will be:	
CO1.	Understanding the basic concepts of interference, diffraction and polarisation.	
CO2.	Understanding the concept of bonding in solids and semiconductors.	
CO3.	Understanding the special theory of relativity.	
CO4.	Applying special theory of relativity to explain the phenomenon of length contraction, time dilation, mass-energy equivalence etc.	
CO5.	Applying the concepts of polarized light by the Brewster's and Malus Law	
<u>Course Content:</u>		
Unit-1:	Brief history of Engineering Physics, Role of Indian Scientific in Engineering Interference of Light: Introduction, Principle of Superposition, and Interference due to division of wavefront: Young's double slit experiment, Theory of Fresnel's Bi-Prism, Interference due to division of amplitude: parallel thin films, Wedge shaped film, Michelson's interferometer, Newton's ring.	8 Hours
Unit-2:	Diffraction: Introduction, Types of Diffraction and difference between them, Condition for diffraction, difference between interference and diffraction. Single slit diffraction: Quantitative description of maxima and minima with intensity variation, linear and angular width of central maxima. Resolving Power: Rayleigh's criterion of resolution, resolving power of diffraction grating and telescope.	8 Hours
Unit-3:	Polarization: Introduction, production of plane polarized light by different methods, Brewster's and Malus Law. Quantitative description of double refraction, Nicol prism, Quarter & half wave plate, specific rotation, Laurent's half shade polarimeter.	8 Hours
Unit-4:	Elements of Material Science: Introduction, Bonding in solids, Covalent bonding and Metallic bonding, Classification of Solids as Insulators, Semi-Conductor and Conductors, Intrinsic and Extrinsic Semiconductors, Conductivity in Semiconductors, Determination of Energy gap of Semiconductor. Hall Effect: Theory, Hall Coefficients and application to determine the sign of charge carrier, Concentration of charge carrier, mobility of charge carriers.	8 Hours
Unit-5:	Special Theory of Relativity: Introduction, Inertial and non-inertial frames of Reference, Postulates of special theory of relativity, Galilean and Lorentz Transformations, Length contraction and Time Dilation, Relativistic addition of velocities, Variation of mass with velocity, Mass-Energy equivalence.	8 Hours

<u>Text Books:</u>	1. Elements of Properties of Matter, D. S. Mathur, S. Chand & Co.	
<u>Reference Books:</u>	1. F. A. Jenkins and H. E. White, Fundamentals of Optics, McGraw-Hill. 2. Concept of Modern Physics, Beiser, Tata McGraw-Hill. 3. R. Resnick, Introduction to Special Relativity, John Wiley, Singapore. *Latest editions of all the suggested books are recommended.	
<u>Additional electronics reference material:</u>	1. https://www.youtube.com/watch?v=toGH5BdgRZ4&list=PLD9DDFBDC338226CA 2. https://www.youtube.com/watch?v=CuqsU7B1MtU 3.	

Course Code: EAS113/213	Basic Science Course-2 B.Tech.- Semester-I Engineering Chemistry	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concept of softening & purification of water.	
CO2.	Understanding calorific value& combustion, analysis of coal, Physical & Chemical properties of hydrocarbons & quality improvements.	
CO3.	Understanding the concept of lubrication, Properties of Refractory & Manufacturing of cements.	
CO4.	Applying the conceptsof the mechanism of polymerization reactions, Natural and synthetic rubber& vulcanization.	
CO5.	Applying the conceptsof spectroscopic & chromatographic techniques.	
Course Content:		
Unit-1:	Brief history of Engineering Chemistry, Role of Indian Scientific in Engineering Water and Its Industrial Applications: Sources, Impurities, Hardness and its units, Industrial water, characteristics, softening of water by various methods (External and Internal treatment), Boiler trouble causes effects and remedies, Characteristic of municipal water and its treatment, Numerical problem based on water softening method like lime soda, calgonetc	8 Hours
Unit-2:	Fuels and Combustion: Fossil fuel and classification, calorific value, determination of calorific value by Bomb and Jumker's calorimeter, proximate and ultimate analysis of coal and their significance, calorific value computation based on ultimate analysis data, Combustion and its related numerical problems carbonization manufacturing of coke, and recovery of by product, knocking relationship between knocking and structure and hydrocarbon, improvement ant knocking characteristic IC Engine fuels, Diesel Engine fuels, Cetane Number.	8 Hours
Unit-3:	Lubricants: Introduction, mechanism of lubrication, classification of lubricant, properties and testing of lubricating Oil Numerical problem based on testing methods. Cement and Refractories: Manufacture, IS code, Setting and hardening of cement, Portland cement Plaster of Paris, Refractories. Introduction, classification and properties of refractories	8 Hours
Unit-4:	Polymers: Introduction, types and classification of polymerization, reaction mechanism, Natural and synthetic rubber, Vulcanization of rubber,	8 Hours

	preparation, properties and uses of the following Polythene, PVC, PMMA, Teflon, Polyacrylonitrile, PVA, Nylon 6, Terylene, Phenol Formaldehyde, Urea Formaldehyde Resin, Glyptal, Silicones Resin, Polyurethanes, Butyl Rubber, Neoprene, Buna N, Buna S.	
Unit-5:	A. Instrumental Techniques in chemical analysis: Introduction, Principle, Instrumentation and application of IR, NMR, UV, Visible, Gas Chromatography, Lambert and Beer's Law. B. Water Analysis Techniques: Alkalinity, Hardness (Complexometric), Chlorides, Free Chlorine, DO, BOD, and COD, Numerical Problem Based on above techniques.	8 Hours
<u>Text Books:</u>	1. Agarwal R. K., Engineering Chemistry, Krishna Prakashan.	
<u>Reference Books:</u>	1. Morrison & Boyd, Organic Chemistry, Prentice Hall 2. Barrow Gordon M., Physical Chemistry, McGraw-Hill. 3. Manahan Stanley E., Environmental Chemistry, CRC Press *Latest editions of all the suggested books are recommended.	
<u>Additional electronics reference material:</u>	1. https://www.youtube.com/watch?v=RV-OyRTaIOI 2. https://www.youtube.com/watch?v=phhfkikb6Lw	

Course Code: EEE117/217	Engineering Science Course-1 B.Tech.-Semester-I Basic Electrical Engineering	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basics of Network, AC Waveform and its characteristics.	
CO2.	Understanding the basic concept of Measuring Instruments, Transformers & three phase Power systems.	
CO3.	Understanding the basic concepts of Transformer.	
CO4.	Understanding the basic concept of power measurement using two wattmeter methods.	
CO5.	Applying the concept of Kirchhoff's laws and Network Theorems to analyze complex electrical circuits.	
Course Content:		
Unit-1:	Production of electricity in ancient India as compared to modern Indian Technology. D.C. Network Theory: Passive, active, bilateral, unilateral, linear, nonlinear element, Circuit theory concepts-Mesh and node analysis; Voltage and current division, source transformation, Network Theorems- Superposition theorem, Thevenin's theorem, Norton's theorem, and Maximum Power Transfer theorem, Star-delta & delta-star conversion.	8 Hours
Unit-2:	Steady State Analysis of A.C. Circuits: Sinusoidal and phasor representation of voltage and Current; Single phase A.C. circuit behavior of resistance, inductance and capacitance and their Combination in series & parallel; Power factor; Series and parallel resonance; Band width and Quality factor.	8 Hours
Unit-3:	Basics of Measuring Instruments: Introduction to wattmeter & Energy meter extension range of voltmeter and ammeter. Three Phase A.C. Circuits: Line and phase voltage/current relations; three phase power, power measurement using two wattmeter methods.	8 Hours
Unit-4:	Single phase Transformer: Principle of operation; Types of construction; Phasor diagram; Equivalent circuit; Efficiency and losses.	8 Hours
Unit-5:	Electrical machines: DC machines: Principle & Construction, Types, EMF equation of generator and torque equation of motor, applications of DC motors (simple numerical problems)	8 Hours
Text Books:	1. Nagrath I.J., Basic Electrical Engineering, Tata McGraw Hill	

<u>Reference Books:</u>	<ol style="list-style-type: none"> 1. Fitzgerald A.E & Higginbotham., D.E., Basic Electrical Engineering, McGraw Hill. 2. A Grabel, Basic Electrical Engineering, McGraw Hill. 3. Cotton H., Advanced Electrical Technology, Wheeler Publishing. 4. Del Toro, Principles of Electrical Engineering, Prentice-Hall International. 5. W.H. Hayt & J.E. Kemmerly, Engineering Circuit Analysis, McGraw Hill. <p>*Latest editions of all the suggested books are recommended.</p>	
<u>Additional electronics reference material:</u>	<ul style="list-style-type: none"> • https://nptel.ac.in/courses/108/108/108108076/ • https://sites.google.com/tmu.ac.in/dr-garima-goswami/home 	

Course Code: EEEC111/211	Engineering Science Course-1 B.Tech.- Semester-I Basic Electronics Engineering	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Understanding the concepts of electronic components like diode, BJT & FET.	
CO2.	Understanding the applications of pn junction diode as clipper, clamper, rectifier & regulator whereas BJT & FET as amplifiers	
CO3.	Understanding the functions and applications of operational amplifier-based circuits such as differentiator, integrator, and inverting, non-inverting, summing & differential amplifier.	
CO4.	Understanding the concepts of number system, Boolean algebra and logic gates.	
CO5.	Applying the knowledge of electronics components in different electronic circuits.	
Course Content:		
Unit-1:	History of electronics and p-n Junction: Indian contribution in the field of radio, email, USB, fiber optics, rocket missiles etc, Energy band diagram in materials, Intrinsic & Extrinsic Semiconductor, Introduction to PN-Junction, Depletion layer, V-I characteristics, p-n junction as rectifiers (half wave and full wave), calculation of ripple factor of rectifiers, clipping and clamping circuits, Zener diode and its application as shunt regulator	8 Hours
Unit-2:	Bipolar Junction Transistor (BJT): Basic construction, transistor action; CB, CE and CC configurations, input/output characteristics, Relation between α , β & γ , Biasing of transistors: Fixed bias, emitter bias, potential divider bias	8 Hours
Unit-3:	Field Effect Transistor (FET): Basic construction of JFET; Principle of working; concept of pinch-off condition & maximum drain saturation current; input and transfer characteristics; Characteristics equation; fixed and self-biasing of JFET amplifier; Introduction of MOSFET; Depletion and Enhancement type MOSFET- Construction, Operation and Characteristics.	8 Hours
Unit-4:	Operational Amplifier (Op-Amp): Concept of ideal operational amplifier; ideal and practical Op-Amp parameters; inverting, non-inverting and unity gain configurations, Applications of Op-Amp as adders, difference amplifiers, integrators and differentiator.	8 Hours
Unit-5:	Switching Theory: Number system, conversion of bases (decimal, binary, octal and hexa decimal numbers), Addition & Subtraction, BCD numbers, Boolean algebra, De Morgan's Theorems, Logic gates and truth table- AND, OR & NOT, Seven segment display & K map.	8 Hours
Text Books:	1. Robert Boylestad & Louis Nashelsky, Electronic Circuit and Devices, Pearson India.	
Reference	1. Sedra and Smith, Microelectronic Circuits, Oxford University Press.	

<u>Books:</u>	<p>2. Gayakwad, R A, Operational Amplifiers and Linear Integrated circuits, Prentice Hall of India Pvt. Ltd.</p> <p>3. Chattopadhyay D and P C Rakshit, Electronics Fundamentals and Applications, New Age International.</p> <p>4.</p> <p>*Latest editions of all the suggested books are recommended.</p>

Course Code: TMU101	Mandatory Course- 1 B.Tech.- Semester-I Environmental Studies	L-2 T-1 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding environmental problems arising due to constructional and developmental activities.	
CO2.	Understanding the natural resources and suitable methods for conservation of resources for sustainable development.	
CO3.	Understanding the importance of ecosystem and biodiversity and its conservation for maintaining ecological balance.	
CO4.	Understanding the types and adverse effects of various environmental pollutants and their abatement devices.	
CO5.	Understanding Greenhouse effect, various Environmental laws, impact of human population explosion, environment protection movements, different disasters and their management.	
Course Content:		
Unit-1:	Definition and Scope of environmental studies, multidisciplinary nature of environmental studies, Concept of sustainability & sustainable development. Ecology and Environment: Concept of an Ecosystem-its structure and functions, Energy Flow in an Ecosystem, FoodChain, FoodWeb, Ecological Pyramid& Ecological succession, Study of following ecosystems: Forest Ecosystem, Grass land Ecosystem & Aquatic Ecosystem & Desert Ecosystem.	8 Hours
Unit-2:	Natural Resources: Renewable & Non-Renewable resources; Landre sources and landuse change; Land degradation, Soil erosion & desertification. Deforestation: Causes & impacts due to mining, Dam building on forest biodiversity & tribal population. Energy Resources: Renewable & Non-Renewable resources, Energy scenario & use of alternate energy sources, Case studies. Biodiversity: Hot Spots of Biodiversity in India and World, Conservation, Importance and Factors Responsible for Loss of Biodiversity, Biogeographical Classification of India	8 Hours
Unit-3:	Environmental Pollutions: Types, Causes, Effects & control; Air, Water, soil & noise pollution, Nuclear hazards & human health risks, Solid waste Management; Control measures of urban & industrial wastes, pollution case studies	8 Hours
Unit-4:	Environmental policies & practices: Climate change & Global Warming (Green house Effect), Ozone Layer -Its Depletion and Control Measures,	8 Hours

	Photo chemical Smog, Acid Rain Environmental laws: Environment protection Act; air prevention & control of pollution act, Water Prevention & Control of Pollution Act, Wild Life Protection Act, Forest Conservation Acts, International Acts; Montreal & Kyoto Protocols & Convention on biological diversity, Nature reserves, tribal population & Rights & human wild life conflicts in Indian context	
Unit-5:	Human population growth; impacts on environment, human health & welfare, Resettlement & rehabilitation of projects affected person: A case study, Disaster Management; Earthquake, Floods & Droughts, Cyclones & Landslides, Environmental Movements; Chipko, Silent Valley, Vishnoi's of Rajasthan, Environmental Ethics; Role of Indian & other regions & culture in environmental conservation, Environmental communication & public awareness; Case study	8 Hours
Field Work:	<ol style="list-style-type: none"> 1. Visit to an area to document environmental assets; river/forest/flora-fauna etc. 2. Visit to a local polluted site: urban/rural/industrial/agricultural. 3. Study of common plants, insects, birds & basic principles of identification. 4. Study of simple ecosystem; pond, river etc.

Course Code: TGE103	Humanities and Social Sciences including Management courses-1 B.Tech.- Semester-I English Communication – I	L-1 T-0 P-2 C-2
Course Outcomes	On completion of the course, the students will be:	
CO1.	Understanding the basics of English communication	
CO2.	Understanding the basics of listening skills	
CO3.	Applying rules of grammar in sentence construction and paragraph writing	
CO4.	Drafting application on common issues	
CO5.	Demonstrating effective speaking skills	
Course Content:		
Unit-1:	Basics of Communication: Meaning of Communication; Importance of English Communication; Process of Communication; Types of Communication: Verbal Communication, Non-Verbal Communication, Formal & Informal Communication; Flow and Levels of Communication; Strategies for Effective Communication: 7 Cs of Communication; Language as a Tool of Communication; Barriers to Communication	08
Unit-2:	Functional Grammar: Sentence Construction: Basic Sentence Pattern; Subject and Predicate; Tense: Present, Past and Future; Modals; Concord; Common Errors in Sentences; Vocabulary Building: Synonyms, Antonyms, Homophones, Homonyms, One Word Substitution	10
Unit-3:	Listening Skills: Meaning; Difference between Listening & Hearing, Importance of Listening; Types of Listening; Process of Listening; Strategies for Effective Listening; Barriers to Listening; Listening TED talks and speeches of eminent speakers	06
Unit - 4	Speaking Skills: Principles of Effective Oral Communication; Art of Public Speaking, Short Speeches for JAM (Just a Minute) Session: Describing Pictures, Places, Situations, Scenes; Common Conversation; Debate; Story Narration; Role Plays	08
Unit - 5	Writing Skills: Paragraph Writing: Meaning, Structure, Essentials of a good Paragraph; Methods of developing a Paragraph; Writing Application on Common Issues	08

Evaluation Scheme

Internal Evaluation (40 marks)			External Evaluation (60 marks)	
20 marks	10 marks	10 marks	20 marks	40 marks
Best two CTs	Assignment (Oral)	Attendance	Viva-voce*	Written

***Parameters of viva**

Knowledge of frequently asked questions	Body Language	Communication skills	Confidence	TOTAL
05 Marks	05 Marks	05 Marks	05 Marks	20 marks

Note- 1- External Viva-voce will be coordinated by concerned faculty.

2- The viva-voce will be carried out by one external examiner assigned by university exam cell.

Course Code: EAS162/262	Laboratory Course-1	L-0 T-0 P-2 C-1
	B.Tech.- Semester-I Engineering Physics (Lab)	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of the operation of various models of optical devices.	
CO2.	Understanding types of Semiconductors using Hall experiments.	
CO3.	Applying the concept of interference, polarization & dispersion in optical devices through Newton's ring, Laser, polarimeter & spectrometer.	
CO4.	Applying the concept of resonance to determine the AC frequency using sonometer & Melde's apparatus.	
CO5.	Applying the concept of resolving & dispersive power by a prism.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list:	
1	To determine the wavelength of monochromatic light by Newton's ring.	
2	To determine the wavelength of monochromatic light by Michelson-Morley experiment.	
3	To determine the wavelength of monochromatic light by Fresnel's Bi-prism.	
4	To determine the Planck's constant using LEDs of different colours.	
5	To determine the specific rotation of cane sugar solution using Polarimeter.	
6	To verify Stefan's Law by electrical method	
7	To study the Hall Effect and determine Hall coefficient and mobility of a given semiconductor material using Hall-effect set up	
8	To determine the Frequency of an Electrically Maintained Tuning Fork by Melde's experiment.	
9	To compare Illuminating Powers by a Photometer.	
10	To determine the frequency of A.C. mains by means of a Sonometer.	
11	To determine refractive index of a prism material by spectrometer	
12	To determine the Flashing & Quenching of Neon bulb.	
13	Determination of Cauchy's constant by using spectrometer.	
14	To study the PN junction characteristics	
15	To determine the resolving power and dispersive power by a prism	

16	To determine the value of Boltzmann Constant by studying Forward Characteristics of a Diode	
17	Study the characteristics of LDR	
18	To study the characteristics of a photo-cell.	
Books:	<ol style="list-style-type: none"> 1. B.Sc.Practical Physics, Gupta and Kumar, PragatiPrakashan. 2. B.Sc. Practical Physics, C.L. Arora, S. Chand & Company Pvt. Ltd. *Latest editions of all the suggested books are recommended.	

Virtual Lab

Experiment No.3- <http://vlabs.iitb.ac.in/vlabs-dev/labs/physics-basics/labs/fresnel-biprism-iitk/simulation.html>

Experiment No.6- http://vlabs.iitb.ac.in/vlabs-dev/vlab_bootcamp/bootcamp/vlabs_recbanda/labs/exp1/theory.html

Experiment No.8- <https://vlab.amrita.edu/index.php?sub=1&brch=201&sim=882&cnt=1>

Experiment No.17- <https://vlab.amrita.edu/?sub=3&brch=269&sim=1371&cnt=3512>

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EAS163/263	Laboratory Course-1 B.Tech.- Semester-I Engineering Chemistry (Lab)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Hardness of water.	
CO2.	Analyzing & estimating of various parameters of water.	
CO3.	Analyzing of Calorific value of Solid fuel by Bomb calorimeter & Liquid Fuels by Junkers Gas Calorimeter.	
CO4.	Analyzing of open & closed Flash point of oil by Cleveland & Pensky's Martens apparatus.	
CO5.	Analyzing of viscosity of lubricating oil using Redwood Viscometer.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list	
1	Determination of Total Hardness of a given water sample.	
2	Determination of mixed alkalinity (a) Hydroxyl & Carbonate (b) Carbonate & Bicarbonate	
3	To determine the pH of the given solution using pH meter and pH-metric titration	
4	Determination of dissolved oxygen content of given water sample	
5	To find chemical oxygen demand of waste water sample by potassium dichromate	
6	Determination of free chlorine in a given water sample	
7	To determine the chloride content in the given water sample by Mohr's method	
8	To prepare the Bakelite resin polymer	
9	To determine the concentration of unknown sample of iron spectrophotometrically	
10	To determine the viscosity of a given sample of a lubricating oil using Redwood Viscometer	
11	To determine the flash & fire point of a given lubricating oil	
12	Determination of calorific value of a solid or liquid fuel.	

13	Determination of calorific value of a gaseous fuel	
14	Determination of % of O ₂ , CO ₂ , % CO in flue gas sample using Orsat apparatus.	
15	Proximate analysis of coal sample.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EEE161/261	Laboratory Course-2	L-0 T-0 P-2 C-1
	B.Tech.- Semester-I Basic Electrical Engineering (Lab)	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Kirchoff & Voltage law.	
CO2.	Understanding the concepts of dc network theorem.	
CO3.	Analyzing the energy by a single-phase energy meter.	
CO4.	Analyzing the losses and efficiency of Transformer on different load conditions.	
CO5.	Analyzing the electrical circuits using electrical and electronics components on bread board.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list	
1	To verify the Kirchhoff's current and voltage laws.	
2	To study multimeter.	
3	To verify the Superposition theorem	
4	To verify the Thevenin's theorem.	
5	To verify the Norton's theorem.	
6	To verify the maximum power transfer theorem	
7	To verify current division and voltage division rule.	
8	To measure energy by a single-phase energy meter	
9	To measure the power factor in an RLC by varying the capacitance	
10	To determine resonance frequency, quality factor, bandwidth in series resonance	
11	To measure the power in a 3-phase system by two-wattmeter method	
12	To measure speed for speed control of D.C. Shunt Motor	
13	To determine the efficiency of single-phase transformer by load test.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EEC161/261	Laboratory Course-2	L-0 T-0 P-2 C-1
	B.Tech.- Semester-I Basic Electronics Engineering (Lab)	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the implementation of diode-based circuits.	
CO2.	Understanding the implementation of Operational amplifier-based circuits.	
CO3.	Analyzing the characteristics of p-n junction diode & BJT.	
CO4.	Analyzing the different parameters for characterizing different circuits like rectifiers, regulators using diodes and BJTs.	
CO5.	Analyzing the truth tables through the different type’s adders.	
LIST OF EXPERIMENTS:	Note: Minimum eight experiments should be performed-	
1	To study the V-I characteristics of p-n junction diode.	
2	To study the diode as clipper and clamper	
3	To study the half-wave rectifier using silicon diode.	
4	To study the full-wave rectifier using silicon diode.	
5	To study the Zener diode as a shunt regulator.	
6	To study transistor in Common Base configuration & plot its input/output characteristics	
7	To study the operational amplifier in inverting & non-inverting modes using IC 741.	
8	To study the operational amplifier as differentiator & integrator.	
9	To study various logic gates & verify their truth tables.	
10	To study half adder/full adder & verify their truth tables	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
--------------------------	-------------------------	--------------------	------------------------------

Course Code: EME161/261	Laboratory Course-3 B.Tech.- Semester-I Engineering Drawing (Lab)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Engineering Drawing.	
CO2.	Understanding how to draw and represent the shape, size & specifications of physical objects.	
CO3.	Applying the principles of projection and sectioning.	
CO4.	Applying the concepts of development of the lateral surface of a given object.	
CO5.	Creating isometric projection of the given orthographic projection.	
LIST OF EXPERIMENTS:	All to be performed	
1	To write all Numbers (0 to 9) and alphabetical Letters (A to Z) as per the standard dimensions.	
2	To draw the types of lines and conventions of different materials.	
3	To draw and study dimensioning and Tolerance	
4	To construction geometrical figures of Pentagon and Hexagon	
5	To draw the projection of points and lines	
6	To draw the Orthographic Projection of given object in First Angle	
7	To draw the Orthographic Projection of given object in Third Angle	
8	To draw the sectional view of a given object	
9	To draw the development of the lateral surface of given object	
10	To draw the isometric projection of the given orthographic projection.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the drawing sheet by the students and a Viva taken by the faculty concerned. The marks shall be given on the drawing sheet & regard maintained by the faculty.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)	ON THE DAY OF EXAM (15 MARKS)	TOTAL
---	-------------------------------	-------

EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	INTERNAL (50 MARKS)
-------------------------	-------------------------	--------------------	--------------------------	-------------------------	--------------------	------------------------

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

Drawing Sheet (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------------	-------------------------	--------------------	------------------------------

Note: The drawing sheet could be manual or in Auto CAD.

Course Code: EME162/262	Laboratory Course-3 B.Tech.- Semester-I Workshop Practice (Lab)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts to prepare simple wooden joints using wood working tools.	
CO2.	Applying the techniques to produce fitting jobs of specified dimensions.	
CO3.	Applying the concepts to prepare simple lap, butt, T and corner joints using arc welding equipment.	
CO4.	Applying the concepts of black smithy and lathe machine to produce different jobs.	
CO5.	Creating core and moulds for casting.	
LIST OF EXPERIMENTS:	Perform any ten experiments selecting at least one from each shop	
1	Carpentry Shop: 1. To prepare half-lap corner joint. 2. To prepare mortise & tenon joint. 3. To prepare a cylindrical pattern on woodworking lathe.	
2	Fitting Bench Working Shop: 1. To prepare a V-joint fitting 2. To prepare a U-joint fitting 3. To prepare a internal thread in a plate with the help of tapping process	
3	Black Smithy Shop: 1. To prepare a square rod from given circular rod 2. To prepare a square U- shape from given circular rod	
4	Welding Shop: 1. To prepare a butt and Lap welded joints using arc welding machine. 2. To prepare a Lap welded joint Gas welding equipment. 3. To prepare a Lap welded joint using spot welding machine	
5	Sheet-metal Shop: 1. To make round duct of GI sheet using 'soldering' process. 2. To prepare a tray of GI by fabrication	
6	Machine Shop: 1. To study the working of basic machine tools like Lathe m/c, Shaper m/c, Drilling m/c and Grinding m/c. 2. To perform the following operations on Centre Lathe: Turning, Step turning, Taper turning, Facing, Grooving and Knurling 3. To perform the operations of drilling of making the holes on the given metallic work-piece (M.S.) by use of drilling machine.	

7	Foundry Shop: 1. To prepare core as per given size. 2. To prepare a mould for given casting.	
---	---	--

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EGP111	DGP-1 B.Tech.- Semester-I Discipline & General Proficiency	L-0 T-0 P-0 C-0
--------------------------------------	---	--

There shall be continuous evaluation of the student on the following broad parameters:

1. Observance of dress code.
2. Participation in Conferences /Workshops / Seminars.
3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time.
4. Participation in community projects including NSS.
5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time.
6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel.
7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level.
8. General behavior
9. Any extraordinary achievement.

The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course. Marks will be categorized with the grade as per the university Norms.

Head of Department would be displaying GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o	Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement
			(5)	(15)	(20)	(10)	(20)	(20)	(5)	(5)
Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: EAS211	Basic Science Course-3 B.Tech.- Semester-II Engineering Mathematics-II	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of linear differential equation.	
CO2.	Understanding the concepts of regular point, singular point, Legendre equation and Bessel equation.	
CO3.	Understanding the concepts of Fourier series' representation of single variable function.	
CO4.	Applying Laplace transform to determine the complete solutions of linear ODE	
CO5.	Applying the method of variations of parameters to find solution of equations with variable coefficients.	
Course Content:		
Unit-1:	Role of Indian Mathematicians in Engineering Mathematics (Srinivasa Ramanujan, Ganesh Prasad) Differential Equations: Linear Differential Equation, Linear Differential Equation with constant coefficient: Complementary functions and particular integrals, Linear Differential Equation with variable coefficient: Removal method, changing independent variables, Method of variation of parameters.	8 Hours
Unit-2:	Series Solutions: PowerSeries solutions of ODE, Ordinary Point, Regular and Irregular points, Singular Points, Frobenius Method with different cases.	8 Hours
Unit-3:	Special Functions: Legendre equation and Polynomial, Legendre Function, Rodrigue's formula, Laplace definite integral for first and second kind, Bessel equation and Polynomial, Bessel Function, Orthogonal properties and Recurrence Relation for Legendre and Bessel function.	8 Hours
Unit-4:	Fourier Series: Periodic functions, Trigonometric series; Fourier series; Dirichlet's conditions, Determination of fourier coefficient by Euler's formulae; Fourier series for discontinuous functions, Even and odd functions, Half range sine and cosine series.	8 Hours
Unit-5:	Laplace Transform: Laplace transform; Existence theorem; Laplace transform of derivatives and integrals; Inverse Laplace transform; Unit step function; Diratch delta function; Laplace transform of periodic functions; Convolution theorem.	8 Hours
Text Books:	1. Grewal B.S., Higher Engineering Mathematics, Khanna Publishers.	
Reference Books:	1. Kreyszig E., Advanced Engineering Mathematics, Wiley Eastern. 2. Piskunov N, Differential & Integral Calculus, Moscow Peace Publishers.	

	3. Narayan Shanti, A Text book of Matrices, S. Chand 4. Bali N.P., Engineering Mathematics-II, Laxmi Publications.	
<u>Additional electronic reference material:</u>	1. https://www.youtube.com/watch?v=luJMI37-nso 2. https://www.youtube.com/watch?v=NdouX5-KD6Y	

Course Code: EAS212/ 112	Basic Science Course-4 B.Tech.- Semester-II Engineering Physics	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Understanding the basic concepts of interference, diffraction and polarisation.	
CO2.	Understanding the concept of bonding in solids and semiconductors.	
CO3.	Understanding the special theory of relativity.	
CO4.	Applying special theory of relativity to explain the phenomenon of length contraction, time dilation, mass-energy equivalence etc.	
CO5.	Applying the concepts of polarized light by the Brewster's and Malus Law	
Course Content:		
Unit-1:	Brief history of Engineering Physics, Role of Indian Scientific in Engineering Interference of Light: Introduction, Principle of Superposition, and Interference due to division of wavefront: Young's double slit experiment, Theory of Fresnel's Bi-Prism, Interference due to division of amplitude: parallel thin films, Wedge shaped film, Michelson's interferometer, Newton's ring.	8 Hours
Unit-2:	Diffraction: Introduction, Types of Diffraction and difference between them, Condition for diffraction, difference between interference and diffraction. Single slit diffraction: Quantitative description of maxima and minima with intensity variation, linear and angular width of central maxima. Resolving Power: Rayleigh's criterion of resolution, resolving power of diffraction grating and telescope.	8 Hours
Unit-3:	Polarization: Introduction, production of plane polarized light by different methods, Brewster's and Malus Law. Quantitative description of double refraction, Nicol prism, Quarter & half wave plate, specific rotation, Laurent's half shade polarimeter.	8 Hours
Unit-4:	Elements of Material Science: Introduction, Bonding in solids, Covalent bonding and Metallic bonding, Classification of Solids as Insulators, Semi-Conductor and Conductors, Intrinsic and Extrinsic Semiconductors, Conductivity in Semiconductors, Determination of Energy gap of Semiconductor. Hall Effect: Theory, Hall Coefficients and application to determine the sign of charge carrier, Concentration of charge carrier, mobility of charge carriers.	8 Hours
Unit-5:	Special Theory of Relativity: Introduction, Inertial and non-inertial frames of Reference, Postulates of special theory of relativity, Galilean and Lorentz Transformations, Length contraction and Time Dilation, Relativistic addition of velocities, Variation of mass with velocity, Mass-Energy equivalence.	8 Hours
Text Books:	1. Elements of Properties of Matter, D. S. Mathur, S. Chand & Co.	
Reference Books:	1. F. A. Jenkins and H. E. White, Fundamentals of Optics, McGraw-Hill. 2. Concept of Modern Physics, Beiser, Tata McGraw-Hill. 3. R. Resnick, Introduction to Special Relativity, John Wiley, Singapore. *Latest editions of all the suggested books are recommended.	

<u>Additional electronics reference material:</u>	1. https://www.youtube.com/watch?v=toGH5BdgRZ4&list=PLD9DDFBDC338226CA 2. https://www.youtube.com/watch?v=CuqsU7B1MtU	
Course Code: EAS213/113	Basic Science Course-4 B.Tech.- Semester-II Engineering Chemistry	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concept of softening & purification of water.	
CO2.	Understanding calorific value & combustion, analysis of coal, Physical & Chemical properties of hydrocarbons & quality improvements.	
CO3.	Understanding the concept of lubrication, Properties of Refractory & Manufacturing of cements.	
CO4.	Applying the concepts of the mechanism of polymerization reactions, Natural and synthetic rubber & vulcanization.	
CO5.	Applying the concepts of spectroscopic & chromatographic techniques.	
Course Content:		
Unit-1:	Brief history of Engineering Chemistry, Role of Indian Scientific in Engineering Water and Its Industrial Applications: Sources, Impurities, Hardness and its units, Industrial water, characteristics, softening of water by various methods (External and Internal treatment), Boiler trouble causes effects and remedies, Characteristic of municipal water and its treatment, Numerical problem based on water softening method like lime soda, calgon etc	8 Hours
Unit-2:	Fuels and Combustion: Fossil fuel and classification, calorific value, determination of calorific value by Bomb and Junker's calorimeter, proximate and ultimate analysis of coal and their significance, calorific value computation based on ultimate analysis data, Combustion and its related numerical problems carbonization manufacturing of coke, and recovery of by product, knocking relationship between knocking and structure and hydrocarbon, improvement and knocking characteristic IC Engine fuels, Diesel Engine fuels, Cetane Number.	8 Hours
Unit-3:	Lubricants: Introduction, mechanism of lubrication, classification of lubricant, properties and testing of lubricating Oil Numerical problem based on testing methods. Cement and Refractories: Manufacture, IS code, Setting and hardening of cement, Portland cement Plaster of Paris, Refractories. Introduction, classification and properties of refractories	8 Hours

Unit-4:	Polymers: Introduction, types and classification of polymerization, reaction mechanism, Natural and synthetic rubber, Vulcanization of rubber, preparation, properties and uses of the following Polythene, PVC, PMMA, Teflon, Polyacrylonitrile, PVA, Nylon 6, Terylene, Phenol Formaldehyde, Urea Formaldehyde Resin, Glyptal, Silicones Resin, Polyurethanes, Butyl Rubber, Neoprene, Buna N, Buna S.	8 Hours
Unit-5:	A. Instrumental Techniques in chemical analysis: Introduction, Principle, Instrumentation and application of IR, NMR, UV, Visible, Gas Chromatography, Lambert and Beer's Law. B. Water Analysis Techniques: Alkalinity, Hardness (Complexometric), Chlorides, Free Chlorine, DO, BOD, and COD, Numerical Problem Based on above techniques.	8 Hours
<u>Text Books:</u>	2. Agarwal R. K., Engineering Chemistry, Krishna Prakashan.	
<u>Reference Books:</u>	4. Morrison & Boyd, Organic Chemistry, Prentice Hall 5. Barrow Gordon M., Physical Chemistry, McGraw-Hill. 6. Manahan Stanley E., Environmental Chemistry, CRC Press *Latest editions of all the suggested books are recommended.

Course Code: EEE217/117	Engineering Science Course-2 B.Tech.-Semester-II Basic Electrical Engineering	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basics of Network, AC Waveform and its characteristics.	
CO2.	Understanding the basic concept of Measuring Instruments, Transformers & three phase Power systems.	
CO3.	Understanding the basic concepts of Transformer.	
CO4.	Understanding the basic concept of power measurement using two wattmeter methods.	
CO5.	Applying the concept of Kirchhoff's laws and Network Theorems to analyze complex electrical circuits.	
Course Content:		
Unit-1:	Production of electricity in ancient India as compared to modern Indian Technology. D.C. Network Theory: Passive, active, bilateral, unilateral, linear, nonlinear element, Circuit theory concepts-Mesh and node analysis; Voltage and current division, source transformation, Network Theorems- Superposition theorem, Thevenin's theorem, Norton's theorem, and Maximum Power Transfer theorem, Star-delta & delta-star conversion.	8 Hours
Unit-2:	Steady State Analysis of A.C. Circuits: Sinusoidal and phasor representation of voltage and Current; Single phase A.C. circuit behavior of resistance, inductance and capacitance and their Combination in series & parallel; Power factor; Series and parallel resonance; Band width and Quality factor.	8 Hours
Unit-3:	Basics of Measuring Instruments: Introduction to wattmeter & Energy meter extension range of voltmeter and ammeter. Three Phase A.C. Circuits: Line and phase voltage/current relations; three phase power, power measurement using two wattmeter methods.	8 Hours
Unit-4:	Single phase Transformer: Principle of operation; Types of construction; Phasor diagram; Equivalent circuit; Efficiency and losses.	8 Hours
Unit-5:	Electrical machines: DC machines: Principle & Construction, Types, EMF equation of generator and torque equation of motor, applications of DC motors (simple numerical problems)	8 Hours
Text Books:	1. Nagrath I.J., Basic Electrical Engineering, Tata McGraw Hill	
Reference Books:	1. Fitzgerald A.E & Higginbotham., D.E., Basic Electrical Engineering, McGraw Hill.	

	<p>2. A Grabel, Basic Electrical Engineering, McGraw Hill.</p> <p>3. Cotton H., Advanced Electrical Technology, Wheeler Publishing.</p> <p>4. Del Toro, Principles of Electrical Engineering, Prentice-Hall International.</p> <p>5. W.H. Hayt & J.E. Kemmerly, Engineering Circuit Analysis, McGraw Hill.</p> <p>*Latest editions of all the suggested books are recommended.</p>	
<u>Additional electronics reference material:</u>	<ul style="list-style-type: none"> • https://nptel.ac.in/courses/108/108/108108076/ • https://sites.google.com/tmu.ac.in/dr-garima-goswami/home 	

Course Code: EEC211/111	Engineering Science Course-2 B.Tech.- Semester-II Basic Electronics Engineering	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Understanding the concepts of electronic components like diode, BJT & FET.	
CO2.	Understanding the applications of pn junction diode as clipper, clamper, rectifier & regulator whereas BJT & FET as amplifiers	
CO3.	Understanding the functions and applications of operational amplifier-based circuits such as differentiator, integrator, and inverting, non-inverting, summing & differential amplifier.	
CO4.	Understanding the concepts of number system, Boolean algebra and logic gates.	
CO5.	Applying the knowledge of electronics components in different electronic circuits.	
Course Content:		
Unit-1:	History of electronics and p-n Junction: Indian contribution in the field of radio, email, USB, fiber optics, rocket missiles etc, Energy band diagram in materials, Intrinsic & Extrinsic Semiconductor, Introduction to PN-Junction, Depletion layer, V-I characteristics, p-n junction as rectifiers (half wave and full wave), calculation of ripple factor of rectifiers, clipping and clamping circuits, Zener diode and its application as shunt regulator	8 Hours
Unit-2:	Bipolar Junction Transistor (BJT): Basic construction, transistor action; CB, CE and CC configurations, input/output characteristics, Relation between α , β & γ , Biasing of transistors: Fixed bias, emitter bias, potential divider bias	8 Hours
Unit-3:	Field Effect Transistor (FET): Basic construction of JFET; Principle of working; concept of pinch-off condition & maximum drain saturation current; input and transfer characteristics; Characteristics equation; fixed and self-biasing of JFET amplifier; Introduction of MOSFET; Depletion and Enhancement type MOSFET- Construction, Operation and Characteristics.	8 Hours
Unit-4:	Operational Amplifier (Op-Amp): Concept of ideal operational amplifier; ideal and practical Op-Amp parameters; inverting, non-inverting and unity gain configurations, Applications of Op-Amp as adders, difference amplifiers, integrators and differentiator.	8 Hours
Unit-5:	Switching Theory: Number system, conversion of bases (decimal, binary, octal and hexa decimal numbers), Addition & Subtraction, BCD numbers, Boolean algebra, De Morgan's Theorems, Logic gates and truth table- AND, OR & NOT, Seven segment display & K map.	8 Hours
Text Books:	1. Robert Boylestad & Louis Nashelsky, Electronic Circuit and Devices, Pearson India.

Course Code: ECS201	Engineering Science Course-3 B.TECH(CSE)- Semester-II Computer Basics & C Programming	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concept of various components of computer system	
CO2.	Understanding the basic programming Language constructs.	
CO3.	Analyzing basic mathematical problem and their solutions through programming	
CO4.	Applying knowledge to prepare programming solutions for distinct problems.	
CO5.	Applying knowledge to prepare scalable solutions through functions.	
Course Content:		
Unit-1:	Concepts in Computer Application: Definition of Electronic Computer; History; Generations; Characteristics and Application of Computers; Classification of Computers; Functional Component of Computer: CPU, I/O devices, Type of Memory & Memory Hierarchy, Firmware and Human ware. Data and data types: Definitions, data, data types: Integer, Character, Float, String, etc.: Constants and Variable Declaration; Token; Keyboard; Identifier	8 Hours
Unit-2:	Programming Language Classification & Computer Languages: Generation of Languages; Introduction to 4GLs; Translators; Assemblers; Compilers; Interpreters. Number System: Decimal, Octal, Binary and Hexadecimal & their Conversions; Various Code: BCD, ASCII and EBCDIC and Gray Code. Operators and Expressions: Numeric and relation operators; logical operator; bit operator; operator precedence and associativity	8 Hours
Unit-3:	Internet and Web Technologies: Hypertext Markup Language; WWW; Gopher; FTP; Telnet; Web Browsers; Search Engines; Email. Control Structure: while statement, if, else, Nested if else statement. Nested logic: for loop, do while loop, While Loop, loop inside a loop structure, Switch Statement. Break and default with switch.	8 Hours
Unit-4:	Concepts in Operating Systems: Elementary Concepts in Operating Systems; Textual Vs GUI Interface. Arrays: Notation and representation; Manipulation of array elements; Multidimensional arrays.	8 Hours

Unit-5:	Functions & Strings: Definition; Declaration; Call by Value; Call by Reference; Returns values and their types; Function calls. Structure & Dynamic Memory Allocation: Structures and union, run time memory allocation functions, Introduction of preprocessor directives.	8 Hours
<u>Text Books:</u>	1. Sinha P. K., Computer Fundamentals, BPB Publications.	
<u>Reference Books:</u>	1. Peter Nortans, Introduction to Computers, Tata McGraw Hill. 2. Yashavant Kanetkar, Let us C , BPB Publications. 3. Course Code: TGE203	Humanities and Social Sciences including Management courses-2 B.Tech. - Semester-II English Communication – II	L-1 T-0 P-2 C-2
Course Outcomes	On completion of the course, the students will be:	
CO1.	Understanding the basics of technical communication.	
CO2.	Understanding the mechanics of writing.	
CO3.	Applying rules of grammar in sentence construction and essay writing.	
CO4.	Drafting different types of report.	
CO5.	Demonstrating presentation skills.	
Course Content:		
Unit-1:	Functional Grammar: Transformation of Sentences: Active and Passive Voice, Direct and Indirect Speech, Degrees of Comparison, Affirmative into Negative, Negative into Affirmative, Assertive into Interrogative, Interrogative into Assertive, Synthesis of Sentences: Simple, Compound and Complex Sentences; Vocabulary Building: Prefixes, Suffixes, Idioms and Phrases	12
Unit-2:	Technical Communication: Features of Technical Communication, Difference between Technical Communication and General Communication;Report Writing: Features of a good Report, Significance of Report Writing, Types of Report, Format and Structure of Report, Steps towards Report Writing	06
Unit-3:	Presentation Strategies: Planning, Preparation, Delivery; Defining Purpose, Organizing Content, Audience, Locale, Using Audio-Visual Aids, 5Ps of Voice Dynamics; 5Ws & 1H of Presentation; Types of Presentation; Strategies for Effective Power Point Presentation; Dealing Queries; Stage Handling;Modes of Speech Delivery	10
Unit - 4	Reading Comprehension: Meaning of Reading Comprehension, Importance of Reading Comprehension, Strategies of Reading Comprehension: 4Ss of Reading Comprehension; Reading Techniques; Reading Comprehension of Short Passages	06
Unit - 5	Mechanics of Writing: Essay Writing: Types of Essays; Structure of Essay; Steps towards Essay Writing; Essay Writing on various topics	06

Evaluation Scheme

Internal Evaluation (40 marks)			External Evaluation (60 marks)	
20 marks	10 marks	10 marks	20 marks	40 marks
Best two CTs	Assignment (Oral)	Attendance	Viva-voce*	Written

*Parameters of viva

Knowledge of frequently asked questions	Body Language	Communication skills	Confidence	TOTAL
05 Marks	05 Marks	05 Marks	05 Marks	20 marks

Note- 1- External Viva-voce will be coordinated by concerned faculty.

2- The viva-voce will be carried out by one external examiner assigned by university exam cell.

Course Code: EAS262/162	Laboratory Course- 4 B.Tech.- Semester-II Engineering Physics (Lab)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of the operation of various models of optical devices.	
CO2.	Understanding types of Semiconductors using Hall experiments.	
CO3.	Applying the concept of interference, polarization & dispersion in optical devices through Newton's ring, Laser, polarimeter & spectrometer.	
CO4.	Applying the concept of resonance to determine the AC frequency using sonometer & Melde's apparatus.	
CO5.	Applying the concept of resolving & dispersive power by a prism.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list:	
1	To determine the wavelength of monochromatic light by Newton's ring.	
2	To determine the wavelength of monochromatic light by Michelson-Morley experiment.	
3	To determine the wavelength of monochromatic light by Fresnel's Bi-prism.	
4	To determine the Planck's constant using LEDs of different colours.	
5	To determine the specific rotation of cane sugar solution using Polarimeter.	
6	To verify Stefan's Law by electrical method	
7	To study the Hall Effect and determine Hall coefficient and mobility of a given semiconductor material using Hall-effect set up	
8	To determine the Frequency of an Electrically Maintained Tuning Fork by Melde's experiment.	
9	To compare Illuminating Powers by a Photometer.	
10	To determine the frequency of A.C. mains by means of a Sonometer.	
11	To determine refractive index of a prism material by spectrometer	
12	To determine the Flashing & Quenching of Neon bulb.	
13	Determination of Cauchy's constant by using spectrometer.	
14	To study the PN junction characteristics	
15	To determine the resolving power and dispersive power by a prism	
16	To determine the value of Boltzmann Constant by studying Forward Characteristics of a Diode	

17	Study the characteristics of LDR	
18	To study the characteristics of a photo-cell.	
<u>Books:</u>	<ol style="list-style-type: none"> 1. B.Sc.Practical Physics, Gupta and Kumar, PragatiPrakashan. 2. B.Sc. Practical Physics, C.L. Arora, S. Chand & Company Pvt. Ltd. *Latest editions of all the suggested books are recommended.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EAS263/163	Laboratory Course- 4 B.Tech.- Semester-II Engineering Chemistry (Lab)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Hardness of water.	
CO2.	Analyzing & estimating of various parameters of water.	
CO3.	Analyzing of Calorific value of Solid fuel by Bomb calorimeter & Liquid Fuels by Junkers Gas Calorimeter.	
CO4.	Analyzing of open & closed Flash point of oil by Cleveland & Pensky's Martens apparatus.	
CO5.	Analyzing of viscosity of lubricating oil using Redwood Viscometer.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list	
1	Determination of Total Hardness of a given water sample.	
2	Determination of mixed alkalinity (a) Hydroxyl & Carbonate (b) Carbonate & Bicarbonate	
3	To determine the pH of the given solution using pH meter and pH-metric titration	
4	Determination of dissolved oxygen content of given water sample	
5	To find chemical oxygen demand of waste water sample by potassium dichromate	
6	Determination of free chlorine in a given water sample	
7	To determine the chloride content in the given water sample by Mohr's method	
8	To prepare the Bakelite resin polymer	
9	To determine the concentration of unknown sample of iron spectrophotometrically	
10	To determine the viscosity of a given sample of a lubricating oil using Redwood Viscometer	
11	To determine the flash & fire point of a given lubricating oil	
12	Determination of calorific value of a solid or liquid fuel.	
13	Determination of calorific value of a gaseous fuel	
14	Determination of % of O ₂ , CO ₂ , % CO in flue gas sample using Orsat	

	apparatus.	
15	Proximate analysis of coal sample.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EEE261/161	Laboratory Course- 5 B.Tech.- Semester-II Basic Electrical Engineering (Lab)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Kirchoff & Voltage law.	
CO2.	Understanding the concepts of dc network theorem.	
CO3.	Analyzing the energy by a single-phase energy meter.	
CO4.	Analyzing the losses and efficiency of Transformer on different load conditions.	
CO5.	Analyzing the electrical circuits using electrical and electronics components on bread board.	
LIST OF EXPERIMENTS:	Note: Select any ten experiments from the following list	
1	To verify the Kirchhoff's current and voltage laws.	
2	To study multimeter.	
3	To verify the Superposition theorem	
4	To verify the Thevenin's theorem.	
5	To verify the Norton's theorem.	
6	To verify the maximum power transfer theorem	
7	To verify current division and voltage division rule.	
8	To measure energy by a single-phase energy meter	
9	To measure the power factor in an RLC by varying the capacitance	
10	To determine resonance frequency, quality factor, bandwidth in series resonance	
11	To measure the power in a 3-phase system by two-wattmeter method	
12	To measure speed for speed control of D.C. Shunt Motor	
13	To determine the efficiency of single-phase transformer by load test.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
--------------------------	-------------------------	--------------------	------------------------------

Course Code: EEEC261/161	Laboratory Course- 5 B.Tech.- Semester-II Basic Electronics Engineering (Lab)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the implementation of diode-based circuits.	
CO2.	Understanding the implementation of Operational amplifier-based circuits.	
CO3.	Analyzing the characteristics of p-n junction diode & BJT.	
CO4.	Analyzing the different parameters for characterizing different circuits like rectifiers, regulators using diodes and BJTs.	
CO5.	Analyzing the truth tables through the different type's adders.	
LIST OF EXPERIMENTS:	Note: Minimum eight experiments should be performed-	
1	To study the V-I characteristics of p-n junction diode.	
2	To study the diode as clipper and clamper	
3	To study the half-wave rectifier using silicon diode.	
4	To study the full-wave rectifier using silicon diode.	
5	To study the Zener diode as a shunt regulator.	
6	To study transistor in Common Base configuration & plot its input/output characteristics	
7	To study the operational amplifier in inverting & non-inverting modes using IC 741.	
8	To study the operational amplifier as differentiator & integrator.	
9	To study various logic gates & verify their truth tables.	
10	To study half adder/full adder & verify their truth tables	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Course Outcomes:	On completion of the course, the students will be :	
CO1.	Analyzing basic mathematical problem and their solutions through programming	
CO2.	Applying knowledge to prepare programming solutions for specific problems.	
CO3.	Applying knowledge to prepare scalable solutions through function	
CO4.	Applying the concepts of programming solutions for distinct problems	
CO5.	Applying the concepts of scalable solutions through function	
Course Content:		
	LIST OF EXPERIMENTS- <ol style="list-style-type: none"> 1. To write a program to calculate Sum & average of N numbers. 2. To write a program to convert integer arithmetic to a given number of day and month. 3. To write a program to find maximum and minimum out of 3 numbers a, b & c. 4. To write a program to find factorial of positive integer. 5. To write a program to find sum of series up to n number, $1+5+8+\dots+n$. 6. To write a program to print all the number between 1 to 100 which are dividing by 7. 7. To write a program to generate Fibonacci series up to n. 8. To write a program to implement a function to calculate area of a circle. 9. To write a program to implement a recursive function to calculate factorial of given number. 10. To write a program to find whether number is prime or not. 11. To write a program to find that the enter character is a letter or digit. 12. To write a program to find addition of two matrix of n*n order. 13. To write a program to find multiplication of two matrix of n*n order. 14. To write a program to add 6 digit numbers in even case & multiple 6 digit number in odd case. 15. To write a program to find even or odd up to a given limit n. 16. To write a program to find whether a given no is palindrome or not. 17. To write a program to joining & Comparing the 2 string.

Course Code: EME261/161	Laboratory Course -7 B.Tech.- Semester-II Engineering Drawing (Lab)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of Engineering Drawing.	
CO2.	Understanding how to draw and represent the shape, size & specifications of physical objects.	
CO3.	Applying the principles of projection and sectioning.	
CO4.	Applying the concepts of development of the lateral surface of a given object.	
CO5.	Creating isometric projection of the given orthographic projection.	
LIST OF EXPERIMENTS:	All to be performed	
1	To write all Numbers (0 to 9) and alphabetical Letters (A to Z) as per the standard dimensions.	
2	To draw the types of lines and conventions of different materials.	
3	To draw and study dimensioning and Tolerance	
4	To construction geometrical figures of Pentagon and Hexagon	
5	To draw the projection of points and lines	
6	To draw the Orthographic Projection of given object in First Angle	
7	To draw the Orthographic Projection of given object in Third Angle	
8	To draw the sectional view of a given object	
9	To draw the development of the lateral surface of given object	
10	To draw the isometric projection of the given orthographic projection.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the drawing sheet by the students and a Viva taken by the faculty concerned. The marks shall be given on the drawing sheet & regard maintained by the faculty.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)	ON THE DAY OF EXAM (15 MARKS)	TOTAL
---	-------------------------------	-------

EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	INTERNAL (50 MARKS)
-------------------------	-------------------------	--------------------	--------------------------	-------------------------	--------------------	------------------------

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

Drawing Sheet (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------------	-------------------------	--------------------	------------------------------

Note: The drawing sheet could be manual or in Auto CAD.

Course Code: EME262/162	Laboratory Course -7 B.Tech.- Semester-II Workshop Practice (Lab)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts to prepare simple wooden joints using wood working tools.	
CO2.	Applying the techniques to produce fitting jobs of specified dimensions.	
CO3.	Applying the concepts to prepare simple lap, butt, T and corner joints using arc welding equipment.	
CO4.	Applying the concepts of black smithy and lathe machine to produce different jobs.	
CO5.	Creating core and moulds for casting.	
LIST OF EXPERIMENTS:	Perform any ten experiments selecting at least one from each shop	
1	Carpentry Shop: 1. To prepare half-lap corner joint. 2. To prepare mortise & tenon joint. 3. To prepare a cylindrical pattern on woodworking lathe.	
2	Fitting Bench Working Shop: 1. To prepare a V-joint fitting 2. To prepare a U-joint fitting 3. To prepare a internal thread in a plate with the help of tapping process	
3	Black Smithy Shop: 1. To prepare a square rod from given circular rod 2. To prepare a square U- shape from given circular rod	
4	Welding Shop: 1. To prepare a butt and Lap welded joints using arc welding machine. 2. To prepare a Lap welded joint Gas welding equipment. 3. To prepare a Lap welded joint using spot welding machine	
5	Sheet-metal Shop: 1. To make round duct of GI sheet using 'soldering' process. 2. To prepare a tray of GI by fabrication	
6	Machine Shop: 1. To study the working of basic machine tools like Lathe m/c, Shaper m/c, Drilling m/c and Grinding m/c. 2. To perform the following operations on Centre Lathe: Turning, Step turning, Taper turning, Facing, Grooving and Knurling 3. To perform the operations of drilling of making the holes on the given	

	metallic work-piece (M.S.) by use of drilling machine.	
7	Foundry Shop: 1. To prepare core as per given size. 2. To prepare a mould for given casting.	

Evaluation Scheme of Practical Examination:

Internal Evaluation (50 marks)

Each experiment would be evaluated by the faculty concerned on the date of the experiment on a 4-point scale which would include the practical conducted by the students and a Viva taken by the faculty concerned. The marks shall be entered on the index sheet of the practical file.

Evaluation scheme:

PRACTICAL PERFORMANCE & VIVA DURING THE SEMESTER (35 MARKS)				ON THE DAY OF EXAM (15 MARKS)		TOTAL INTERNAL (50 MARKS)
EXPERIMENT (5 MARKS)	FILE WORK (10 MARKS)	VIVA (10 MARKS)	ATTENDANCE (10 MARKS)	EXPERIMENT (5 MARKS)	VIVA (10 MARKS)	

External Evaluation (50 marks)

The external evaluation would also be done by the external Examiner based on the experiment conducted during the examination.

EXPERIMENT (20 MARKS)	FILE WORK (10 MARKS)	VIVA (20 MARKS)	TOTAL EXTERNAL (50 MARKS)
-----------------------	----------------------	-----------------	---------------------------

Course Code: EGP211	DGP-2 B.Tech.- Semester-II Discipline & General Proficiency	L-0 T-0 P-0 C-0
--------------------------------------	--	--

There shall be continuous evaluation of the student on the following broad parameters:

1. Observance of dress code.
2. Participation in Conferences /Workshops / Seminars.
3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time.
4. Participation in community projects including NSS.
5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time.
6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel.
7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level.
8. General behavior
9. Any extraordinary achievement.

The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course. Marks will be categorized with the grade as per the university Norms.

Head of Department would be displaying GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o	Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement
			(5)	(15)	(20)	(10)	(20)	(20)	(5)	(5)

Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

<u>Course Code:</u> ECSLP201	Learning by Project Based Entrepreneurial Initiative - 1 Semester-II LPBEI-1	L-0 T-0 P-4 C-2
<u>Course Outcomes:</u>	On completion of the course, the students will be :	
<u>Overview</u>	Learning by Project-Based Entrepreneurial Initiatives (LPBEI) in a BBA program combines the principles of project-based learning with an entrepreneurial focus. In this approach, students engage in hands-on projects that simulate real-world business scenarios, fostering entrepreneurship and innovation. Overall, the Learning by Project-Based Entrepreneurial Initiative in a BBA program empowers students to become innovative thinkers, risk-takers, and problem solvers. It instills an entrepreneurial spirit in them and prepares them for potential entrepreneurial ventures or leadership roles in the business world. Additionally, the initiative contributes to a dynamic and engaging learning environment, cultivating the next generation of business leaders and entrepreneurs.	
CO1.	Enhanced Practical Skills: Students acquire hands-on experience, improving their project management, teamwork, and problem-solving skills.	
CO2.	Entrepreneurial Mindset: Participants develop an entrepreneurial mindset, fostering creativity, resilience, and a willingness to embrace opportunities.	
CO3.	Real-World Relevance: LPBEI connects classroom learning to real-world challenges, making education more relevant and impactful.	
CO4.	Collaboration and Networking: Students collaborate with peers, faculty, and industry professionals, building valuable networks for future career opportunities.	
CO5.	Confidence and Initiative: LPBEI empowers students to take ownership of projects, leading to increased self-confidence and a proactive approach to problem-solving.	
Course Content:		
Stage: A	Forming a team of multidisciplinary background.	

<p>Stage: A</p>	<p>Forming a team of multidisciplinary background:</p> <p>Introduction:</p> <p>In today's dynamic and complex business landscape, successful entrepreneurship requires a diverse set of skills, perspectives, and expertise. Learning by Project Based Entrepreneurial Initiative (LPBEI) is an innovative approach that leverages the power of multidisciplinary teams to foster creativity, innovation, and effective problem-solving. By</p>	
------------------------	---	--

	<p>bringing together individuals from diverse backgrounds, LPBEI aims to create a rich learning environment where students can collaborate, learn from one another, and tackle real-world challenges with an entrepreneurial mindset.</p> <p>Importance of Multidisciplinary Teams in LPBEI:</p> <p>Fostering Creativity and Innovation: Multidisciplinary teams bring together individuals with different knowledge domains, enabling the synthesis of diverse ideas and perspectives. This environment sparks creativity and innovation, leading to unique and groundbreaking solutions to complex problems.</p> <p>Comprehensive Problem-Solving: Real-world challenges often require a comprehensive approach that goes beyond the expertise of a single discipline. Multidisciplinary teams can analyze problems from various angles, leading to more robust and holistic solutions.</p> <p>Enhanced Learning Experience: Working in a multidisciplinary team exposes students to a wide range of skills and knowledge beyond their academic background. This exposure broadens their understanding and enhances their learning experience.</p> <p>Cultivating Adaptability: In an ever-changing business landscape, adaptability is crucial. Multidisciplinary teams teach students to be open-minded, embrace diverse perspectives, and adapt their approaches to different situations.</p> <p>Strengthening Collaboration and Communication Skills: Interacting with team members from diverse backgrounds improves communication and collaboration skills. Students learn to bridge the gap between disciplines, facilitating effective teamwork.</p> <p>Real-World Relevance: The business world rarely operates within the boundaries of a single discipline. Multidisciplinary teams mimic real-world scenarios, preparing students for the challenges they may face in their future careers.</p> <p>Fostering Entrepreneurial Mindset: Entrepreneurship requires individuals to identify opportunities, take calculated risks, and create value. Multidisciplinary teams encourage students to think like entrepreneurs, fostering a proactive and opportunity-driven mindset.</p> <p>Building a Supportive Ecosystem: LPBEI builds a supportive ecosystem where students with diverse backgrounds collaborate, network, and support each other's growth. This network can extend</p>	
--	---	--

	<p>beyond the classroom, benefiting students throughout their careers.</p> <p>Encouraging Inclusive Participation: Forming multidisciplinary teams promotes diversity and inclusion. It provides an opportunity for students from different backgrounds, cultures, and experiences to contribute their unique perspectives.</p> <p>Preparation for Industry Demands: Employers increasingly value individuals who can work effectively in diverse teams and solve complex problems. LPBEI equips students with the skills that are highly sought after in the job market.</p> <p>In conclusion, forming a team of multidisciplinary background for Learning by Project Based Entrepreneurial Initiative (LPBEI) is crucial for fostering creativity, innovation, and comprehensive problem-solving. By exposing students to diverse perspectives and skills, LPBEI prepares them for the challenges of the business world and nurtures an entrepreneurial mindset that can drive success in their future endeavors.</p>	
Stage: B	Identification of business opportunity by formed team	

	<p>Introduction:</p> <p>Learning by Project Based Entrepreneurial Initiative (LPBEI) aims to nurture the spirit of entrepreneurship and innovation among students. One of the key aspects of LPBEI is the formation of multidisciplinary teams, where students from diverse backgrounds collaborate to solve real-world challenges. With the guidance of mentors, these teams identify and explore potential business opportunities, providing a hands-on learning experience that fosters creativity, critical thinking, and entrepreneurial skills.</p> <p>Importance of Identifying Business Opportunity in LPBEI:</p> <p>Practical Application of Knowledge: Identifying a business opportunity allows students to apply theoretical concepts learned in the classroom to real-world scenarios. It bridges the gap between academic learning and practical implementation.</p> <p>Exposure to Market Dynamics: By exploring business opportunities, students gain insights into market dynamics, customer needs, and industry trends. This exposure is invaluable in understanding the complexities of the business environment.</p> <p>Entrepreneurial Mindset Development: The process of identifying a business opportunity nurtures an entrepreneurial</p>	
--	---	--

	<p>mindset. Students learn to identify gaps in the market, recognize potential areas for innovation, and take calculated risks.</p> <p>Critical Thinking and Problem-Solving: The identification of a business opportunity involves critical thinking and problem-solving. Students analyze market data, customer feedback, and industry trends to make informed decisions.</p> <p>Collaborative Decision-Making: In multidisciplinary teams, students collaborate and share diverse perspectives to evaluate business opportunities. This collaborative decision-making process enriches their learning experience.</p> <p>Mentorship and Guidance: Mentors play a vital role in LPBEI by providing guidance and expertise. They challenge students to think critically, offer valuable insights, and help refine business ideas.</p> <p>Experiential Learning: LPBEI encourages experiential learning, allowing students to learn by doing. Identifying a business opportunity offers a hands-on experience that enriches their understanding of entrepreneurship.</p> <p>Networking and Industry Connections: Through LPBEI, students may interact with industry professionals, potential customers, and investors while exploring business opportunities. This networking can lead to future partnerships and opportunities.</p> <p>Building Confidence: Successfully identifying a viable business opportunity boosts students' confidence in their entrepreneurial capabilities. It instills belief in their potential to create and innovate.</p> <p>Preparation for Entrepreneurial Ventures: For students aspiring to become entrepreneurs, LPBEI provides a safe and supportive environment to explore and validate business ideas before venturing into the real market.</p> <p>In conclusion, the identification of a business opportunity by a formed team with the help of a mentor is a critical component of Learning by Project Based Entrepreneurial Initiative. It offers students an opportunity to apply theoretical knowledge to real-world situations, develop an entrepreneurial mindset, and build</p>	
--	--	--

	essential skills for success in the business world. Moreover, with the guidance of mentors, students gain valuable insights and support that enhance their learning experience and prepare them for future entrepreneurial ventures.	
Stage: C	Study of market and customers related with identified business opportunity.	
	<p>Study of market and customers related with identified business opportunity:</p> <p>Introduction:</p> <p>Learning by Project Based Entrepreneurial Initiative (LPBEI) involves equipping students with practical entrepreneurial skills, and one crucial aspect of this initiative is conducting a study of the market and customers related to the identified business opportunity. This step allows students to gain a comprehensive understanding of the market landscape, target customers' needs, and competitors' offerings. Through market research and customer analysis, students can make informed decisions and develop strategies to capitalize on the identified business opportunity.</p> <p>Importance of Studying Market and Customers in LPBEI:</p> <p>Market Validation: Studying the market ensures the viability and potential of the identified business opportunity. It validates whether there is a demand for the proposed product or service.</p> <p>Understanding Customer Needs: Analyzing customer preferences and pain points helps in tailoring the offering to meet their specific needs. Customer-centricity is key to sustainable business success.</p> <p>Competitive Analysis: Studying competitors' strengths and weaknesses enables students to position their product or service effectively in the market. It helps in identifying unique selling points and areas for differentiation.</p> <p>Risk Mitigation: Market and customer analysis identify potential risks and challenges that the venture might face. This allows students to develop risk mitigation strategies.</p> <p>Marketing and Sales Strategies: Insights from market research aid in developing targeted marketing and sales strategies. It helps in reaching the right audience with the right message.</p> <p>Pricing and Revenue Models: Understanding market dynamics helps in</p>	

	<p>setting competitive pricing and identifying suitable revenue models for the business opportunity.</p> <p>Resource Allocation: Market analysis guides students in allocating resources effectively, optimizing their efforts, and ensuring efficient use of available resources.</p> <p>Adaptability and Innovation: The market study allows students to identify emerging trends and adapt their offering to evolving customer demands. It fosters an entrepreneurial spirit of innovation.</p> <p>Feasibility Assessment: Market and customer analysis help in assessing the feasibility of the business opportunity in the context of current market conditions and trends.</p> <p>Confidence and Credibility: A well-researched market study enhances the credibility of the business idea and instills confidence in stakeholders, investors, and customers.</p> <p>Data-Driven Decision Making: LPBEI emphasizes data-driven decision-making. Market research provides the necessary data and insights to make informed choices.</p> <p>In conclusion, studying the market and customers related to the identified business opportunity is a critical step in Learning by Project Based Entrepreneurial Initiative. It empowers students with essential knowledge about the market landscape, target customers, and competitive environment, allowing them to make informed decisions and develop strategies for success. By embracing market-driven insights, students can effectively navigate the entrepreneurial journey and increase the chances of a successful venture. Moreover, this market analysis experience prepares them for the real-world challenges and opportunities they may encounter in their future entrepreneurial endeavors.</p>	
Evaluation Scheme		
Parameters of Evaluation		
Stage: A -	Forming a Team of Multidisciplinary Background:	30 Marks
	Evaluate the diversity of academic backgrounds and expertise within each team	6 Marks
	Assess the level of collaboration and communication among team members.	6 Marks
	Review the effectiveness of team dynamics and problem-solving strategies.	6 Marks
	Monitor how well the team utilizes the strengths of each member to achieve project objectives.	6 Marks

	Gather feedback from mentors and team members to identify areas for improvement.	6 Marks
--	--	---------

Note:	It is essential to design the evaluation process in a way that aligns with the objectives of the Learning by Project Based Entrepreneurial Initiative. The evaluation should focus on providing constructive feedback to students, fostering their growth as entrepreneurs, and identifying areas for improvement in the project and individual performance. Regular feedback from mentors, peers, and stakeholders can enhance the learning experience and help students gain valuable insights into the entrepreneurial process.			
Stage: B	Identification of Business Opportunity:			30 Marks
	Review the process of idea generation and the criteria used to evaluate potential business opportunities			6 Marks
	Evaluate the market research conducted to validate the feasibility and viability of the identified business opportunity			6 Marks
	Assess the entrepreneurial mindset displayed by the students in recognizing gaps in the market and potential areas for innovation.			6 Marks
	Analyze the effectiveness of the decision-making process and risk assessment in identifying the most promising opportunity.			6 Marks
	Gather feedback from mentors and stakeholders to gauge the quality and potential of the identified business opportunity.			6 Marks
Stage: C	Study of market and customers related with identified business opportunity:			30 Marks
	Evaluate the depth and scope of market research conducted to understand the market landscape, customer needs, and competitor analysis			6 Marks
	Assess the clarity of customer profiles and how well the product or service is tailored to meet their specific needs.			6 Marks
	Review the use of market data to develop marketing and sales strategies, pricing, and revenue models.			6 Marks
	Analyze the adaptability and innovation displayed based on insights from market research.			6 Marks
	Gather feedback from mentors and potential customers to validate the relevance and accuracy of the market study.			6 Marks
Stage: A	Stage: B	Stage: C	Attendance	Total
Forming a Team of Multidisciplinary Background:	Identification of Business Opportunity:	Study of market and customers related with identified business opportunity:		
30 Marks	30 Marks	30 Marks		100 Marks

Course Code: ECSDR201	Deep Reading - 1 Semester-II Reading Skills				L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :				
Overview	Deep reading is an essential skill that goes beyond surface-level reading and involves active engagement with the text to understand its nuances and underlying messages. In an age of information overload, developing deep reading skills is crucial for students to become critical thinkers, analyze complex texts, and extract meaningful insights. This course aims to introduce students to the art of deep reading and enhance their critical reading and comprehension abilities.				
CO1.	Develop Critical Reading Skills: Train students to analyze texts critically, identify main ideas, and recognize supporting evidence..				
CO2.	Enhance Comprehension: Improve students' ability to understand complex texts, infer meaning, and grasp subtleties.				
CO3.	Cultivate Analytical Thinking: Encourage students to think analytically and critically evaluate the content, structure, and arguments presented in the text.				
CO4.	Foster Love for Reading: Instill a passion for reading and literature by exposing students to diverse literary genres and thought-provoking works.				
CO5.	Promote Lifelong Learning: Equip students with skills that extend beyond the classroom and facilitate lifelong learning and intellectual growth.				
Course Content:					
Activity - 1	Close Reading Exercises: Engage students in close reading activities where they examine short passages or excerpts in detail, focusing on the author's intent, language use, and literary techniques.				1 Hours
Activity - 2	Book Discussions: Organize book discussions and reading circles to encourage students to share their interpretations and insights from the texts they read.				1 Hours
Activity - 3	Critical Analysis: Assign critical analysis on selected texts, where students analyze themes, characters, and narrative structures in-depth.				1 Hours
Evaluation Scheme					
Parameters of Evaluation					
Attendance:	Reading Skills	Pronunciation	Question Responsiveness and Confidence	Final Presentation	Total
10 Marks	20 Marks	20 Marks	25 Marks	25 Marks	100 Marks

Course Code: ECSCC201	Co-Curricular Activity-I Semester-II CCA-1	L-0 T-0 P-2 C-1
--	---	--

For the Co-Curricular Activity TMU has assigned different activities under TMU STUDENT SOCIETIES (TSS) to various colleges with following details:

S.N.	Society Name	College / Dept. Name
1.	THEATRE	College of Pharmacy
2.	DRAWING AND PAINTING	College of Fine Arts
3.	DEBATING	Faculty of Education
4.	CULTURE AND HERITAGE (VIRASAT)	TM Medical & Research Centre
5.	READING AND WRITING	CTLD
6.	MEDIA	Media Cell
7.	PHOTOGRAPHY	College of Law & Legal Studies
8.	FITNESS	College of Physical Education
9.	FASHION	TMIMT
10.	ENVIRONMENT	TM Dental & Research Centre
11.	SINGING	Faculty of Engineering
12.	DANCING	CCSIT
13.	SPORTS	TM College of Physical Education
14.	QUIZ	College of Nursing
15.	VIDEOGRAPHY	College of Law & Legal Studies
16.	ARTS	College of Fine Arts

17.	ROAD SAFETY	Dean Students' Welfare
18.	MUSIC	College of Paramedical
19.	POETRY	Faculty of Education

TMU STUDENT SOCIETIES (TSS)

1. General Rules & Regulations

- a. The societies are student driven and faculty works as advisor only.
- b. The annual society membership fee is Rs.200/- per student per club.
- c. All societies are mentored and monitored by the DSW office under the guidance of Hon'ble Vice-Chancellor.
- d. Any regular student is eligible to be the office bearer (General Secretary/Treasurer/member) after completing one year of regular studies at TMU.
- e. If extraordinary budget is required to conduct the activities of the concern society, then proposal may be submitted from the faculty advisor to the DSW office.
- f. The consumable used in any activity(s) of the society shall be borne by the student(s).
- g. The schedule of the activities of the society shall be as per the academic calendar of the respective semester.
- h. The advisor may increase the no. of co-advisors (in consultation with DSW) as per requirement, ideally there shall be one co-advisor on every 50 (fifty) students.

2. Announcements and constitutions

- a. The society activities are planned and executed after the due approval of faculty advisor and DSW.
- b. The composition of each society is- faculty Advisor(one), faculty co-advisors(two), student General Secretary (one), student treasure (one) and student member (one).
- c. The general secretary of the society notifies all activities in coordination with faculty advisor.

3. Registration

- a. Society membership forms are notified from the DSW office in the beginning of each academic session for Odd& Even semester separately.
- b. Every UG student of TMU have to choose three societies (maximum one in a semester) for membership as per their interest during the entire program.

4. Activities

- a. The activities shall be decided and notified at least 15 days prior from the beginning

of the semester by the faculty advisor in the consultation with other office bearers of the respective society.

5. Evaluation

- a. There shall be one credit (100 marks) for activities of each society in a semester.
- b. There will be five parameters (20 marks each) on which each student will be evaluated.
- c. The evaluation methodology and parameters shall be decided and notified by the faculty advisor in the consultation with the office bearers of the respective society in the beginning of the semester.
- d. The passing marks shall as per the ordinance of the respective programme.
- e. The awards shall be submitted to the university examination division before the start of the end semester examination of the respective semester.
- f. The awards shall be submitted by the faculty advisor with the signature of at least one co-advisor of the respective society.

6. Certification

- a. To earn the degree minimum two credits are required.
- b. The separate certificates shall be issued from the university examination division on the following eight-point scale-

Percentage of marks obtained	Letter Grade	Grade Point	Performance
90.00-100.00	A+	10	Outstanding
80.00-89.00	A	9	Excellent
70.00-79.99	B+	8	Very Good
60.00-69.99	B	7	Good
55.00-59.99	C	6	Fair
50.00-54.99	D	5	Average
45.00-49.99	E	4	Pass
Less than 45	F	0	Fail

Course Code: ECS305	Professional Core Course-1 B.Tech (CSE) Semester III DATA STRUCTURE USING C++	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of different data structures and their usage.	
CO2.	Applying the understanding to solve basic operations on data structures.	
CO3.	Analyzing various approaches to solve different problems using data structures.	
CO4.	Analyzing various methods and the best solution as per running time of basic problems of programming.	
CO5.	Developing programming skills to solve problems with various storage structures.	
Course Content:		
Unit-1:	C++ Programming Basics: Variables, data type, features of object oriented programming, Functions, Call by Reference, Call by Address, Call by Value, Function Overloading, Inline Function, Enumerations. Object & Classes: Access Specifiers, Constructors. Default, Copy Constructor, destructor, Object as Function, Arguments, Returning Object from Function. Static Data Members, Static Member Functions, Abstract class, Const Data and Classes. Friend Function	8 Hours
Unit-2:	Introduction: Basic Terminology, Elementary Data Organization, Data Structure operations, Algorithm Complexity and Time Space trade off. Arrays : Array Definition, Representation and Analysis, Single and Multidimensional Arrays, address calculation, application of arrays, Character String in C, Character string operation, Array as Parameters, Sparse Matrices, and Vectors, Arrays in terms of pointers, Static and Dynamic Memory Management. Tower of Hanoi Problem.	8 Hours
Unit-3:	Stack: Array Representation and Implementation of stack, Operations on Stacks: Push & Pop, Linked Representation of Stack, Applications of stack, Conversion of Infix to Prefix and Postfix Expressions, Evaluation of postfix expression using stack. Queues: Array representation and implementation of queues, Operations on Queue: Create, Add, Delete, Full and Empty. Circular queue, Deque, Priority Queue. Linked List: Representation and Implementation: Singly Linked List, Doubly Linked List, Circular Linked List, Circular Doubly Linked List, Header Linked List. Operations on Linked List: Insert, Delete, Searching, Traversing. Array and Queue Implementation using Linked List, Polynomial representation and addition.	8 Hours
Unit-4:	Sorting: Insertion Sort, Bubble Sort, Selection Sort, Quick Sort, Merge Sort, Heap Sort and Radix Sort, Practical consideration for Internal Sorting. Searching and Hashing: Sequential search, binary search, Hash Table, Hash Functions, Collision Resolution Strategies, Hash Table Implementation. Trees: Basic terminology, Binary Trees, Binary tree representation, algebraic Expressions, Complete Binary Tree, Extended Binary Trees, Array and Linked Representation of Binary trees, Traversing Binary trees, Binary Search Trees: Binary Search Tree (BST), Insertion and Deletion in BST, Complexity of Search Algorithm, Path Length, AVL Tree.	8 Hours

Unit-5:	Graphs: Definitions and concepts, representation using Adjacency matrix, Adjacency lists, BFS and DFS, File Structures: Physical Storage Media File Organization, Organization of records into Blocks, Sequential Files, Indexing and Hashing, Primary indices, Secondary indices.	8 Hours
<u>Text Books:</u>	1. Lipschutz, S., Data Structure, Tata McGraw Hill.	
<u>Reference Books:</u>	<ol style="list-style-type: none"> 1. Sahani, S. and Horowitz, E., <i>Fundamentals of Data Structures</i>, Galgotia 2. Kruse, R., <i>Data Structures and Program Design in C</i>, Pearson Education. 3. Cormen, T. H., <i>Introduction to Algorithms</i>, Prentice Hall of India. 4. Loudon, K., <i>Mastering Algorithms With C</i>, Shroff Publisher & Distributors. 5. Tenenbaum, A.M., <i>Data Structures using C & C++</i>, Prentice Hall of India <p>* Latest editions of all the suggested books are recommended.</p>

Course Code: ECS306	Professional Core Course-2 B.Tech (CSE) Semester III DATABASE MANAGEMENT SYSTEM	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basics of data base systems, structure and architecture, data models and types.	
CO2.	Understanding different transaction processing concepts and different types of serialization techniques.	
CO3	Understanding different database recovery like shadow paging, deferred/immediate updates and Concurrency control techniques	
CO4.	Applying integrity and constraints using SQL and PL/SQL.	
CO5.	Analyzing the anomalies of database and removal of these anomalies using different normalization techniques.	
Course Content:		
Unit-1:	Database: History, database system vs. file system; Concepts; Architecture; Data models; Schema; Instances; Data independence and Database Languages: Interfaces, DDL(Data Definition Language), DML(Data Manipulation Language); ER Model: Notations,Diagram, reduction of Diagrams to tables, Extended ER Mapping Constraints.Keys: Concepts, Types, Comparison, Operations. Abstraction: Generalization, Aggregation.	8 Hours
Unit-2:	Relational data Model and Language: Concepts; Integrity: Entity, Referential; Constraints: Keys, Domain; Relational Algebra; Relational Calculus; Tuple and Domain Calculus. Introduction to SQL: Characteristics, Advantage, Data Types and Literals, Commands, Operators and their Procedure, Tables, Views and Indexes, Queries and sub queries, Aggregate functions, Operations: Insert, Update, Delete, Join, Union, Intersection, Minus, Cursors.	8 Hours
Unit-3:	Data Base Design: Functional Dependencies; Lossless Join Decompositions; Alternative approaches to Database Design, Canonical Cover and Dependency preservation. Normalization: Normal Forms using FD, MVD, and JDs	8 Hours
Unit-4:	Transaction Processing Concepts: Transaction system, Serializability, Testing, Schedules: Conflict& View Serializable Schedule; Recoverability: Recovery from Transaction Failures; Log Based Recovery, Checkpoints, Deadlock Handling.	8 Hours
Unit-5:	Concurrency Control Techniques: Locking Techniques, Time-Stamping Protocols, Validation based Protocol, Multiple Granularity, Multi Version Schemes, Recovery with Concurrent Transaction.	8 Hours
Text Books:	1. Korth, H.F.,Silbertz, A., <i>Database Concepts</i> , McGraw Hill.	

<u>Reference Books:</u>	1. Desai, B.C., <i>An introduction to Database Systems</i> , Galgotia. 2. Majumdar, A. K. and Bhattacharya, P., <i>Database Management System</i> , Tata McGraw Hill. 3. <u>Course Code:</u> EEC302	Professional Core Course-3 B.Tech (CSE) Semester III DIGITAL ELECTRONICS AND COMPUTER ORGANIZATION	L-3 T-0 P-0 C-3
<u>Course Outcomes:</u>	On completion of the course, the students will be :	
CO1.	Understanding the basics of Number system, Boolean algebra and its applications in digital electronics.	
CO2.	Understanding different combinational and sequential circuits in digital electronics.	
CO3.	Understanding the organization of computer system and its components, memory hierarchy, I/O mechanism.	
CO4.	Applying the concepts to design various combinational and sequential circuits.	
CO5.	Analyzing the efficiency of various gates and flip-flops based upon their functionality.	
<u>Course Content:</u>		
Unit-1:	Number System: Data representation, Data Types and Number Systems, Binary Number System, Octal & Hexa-Decimal Number System; Fixed Point Representation; 1's & 2's Complement; Binary Fixed Point Representation; Arithmetic Operation on Binary Numbers; Overflow & Underflow; Floating Point Representation; Codes: ASCII, EBCDIC Codes, Gray Code, Excess-3 & BCD; Error Detection & Correcting Codes; Binary Storage and Registers.	8 Hours
Unit-2:	Boolean algebra: Definition, Properties, Law's. Digital Logic Circuits: Logic Gates: AND, OR, NOT Gates and their Truth Tables, NOR, NAND & XOR Gates; Demorgan's Theorem; Map Simplification; Minimization Techniques: K Map Two, Three and More variables maps; Sum of Product & Product of Sums; Don't care conditions; Combination & Sequential Circuits; Half adder & Full adder; Full subtractor and decimal adder, Code Conversion; Multilevel NAND and NOR Circuits; Multiplexers and Demultiplexers; ROM Working & Circuit.	8 Hours
Unit-3:	Sequential logic: Flip-Flops: RS, D, JK & T Flip-Flop, Triggering in flip flops, Analysis of Clocked Sequential Circuits; State Reduction and Assignment; flip flop excitation tables; Design procedure and Design of Counters; Design with equations; Registers; Counters and the memory unit; Shift registers; Ripple counters and Synchronous counters; Timings sequence digital logic families; Processor organization; General Register Organization; Stack Organization and Addressing Modes.	8 Hours

Unit-4:	Computer Registers and I/O: Registers transfer logic; Intel Register Transfer; Arithmetic Logic and Shift Micro Operation; Conditional; Constant Statement; Fixed Point Binary Data Floating Point Data; Instruction Codes; Input-output organizations- I/O Interface; Properties of simple I/O Devices and their controller; Isolated vs. Memory-mapped I/O; Modes of data transfer; Synchronous & Asynchronous data transfer.	8 Hours
Unit-5:	Computer Organization: Block Level Description of the Functional Units as Related to the Execution of a Program; Fetch; decode and Execute Cycle. Memory organization: Auxiliary Memory; Magnetic Drum; Disk & Tape; Semi-conductor memories; Memory; Hierarchy; Associative memory; Virtual memory; Address space & memory space; Address mapping; page table; Page replacement; segmentation; Cache memory; Hit ratio; Mapping techniques; Writing into Cache.	8 Hours
<u>Text Books:</u>	1. Mano, M., <i>Computer System Architecture</i> , Prentice Hall of India.

Course Code: EAS301	Basic Science Course-5 B.Tech (CSE) Semester III MATHEMATICS-III	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of singularities, zeroes and poles, functions , relations, propositions, truth tables, logical equivalence and implications, converse, inverse, bi-conditional statements, negation of compound statements, tautologies and contradiction, arguments, fallacies, quantifiers.	
CO2.	Applying the concept of power series, Taylor's and Laurent's series, Cauchy's integral theorem, Cauchy's integral formula for derivatives of analytic functions, Residue theorem.	
CO3.	Applying the core mathematics concept to solve the problems.	
CO4.	Analyzing the method of least squares and curve fitting of straight line and parabola, solution of cubic and bi-quadratic equations, correlation and regression, Binomial distribution, Poisson distribution and Normal distribution.	
CO5.	Evaluating the real integral of the type $\int_0^{2\pi} f(\cos \theta, \sin \theta) d\theta$, Line integral in the complex plane.	
Course Content:		
Unit-1:	Role of Indian Mathematicians in Engineering Mathematics (Srinivasa Ramanujan, Ganesh Prasad) Functions of a Complex Variable: Analytic functions; C-R equations and harmonic functions; Line integral in the complex plane; Cauchy's integral theorem, Cauchy's integral formula for derivatives of analytic functions; Liouville's theorem.	8 Hours
Unit-2:	Functions of a Complex Variable II: Representation of a function by power series; Taylor's and Laurent's series; Singularities, zeroes and poles; Residue theorem, evaluation of real integral of the type $\int_0^{2\pi} f(\cos \theta, \sin \theta) d\theta$.	8 Hours
Unit-3:	Statistical Techniques: Moments, Moment generating functions, Skewness, Kurtosis, Curve Fitting and Solution of Equations: Method of least squares and curve fitting of straight line and parabola, Solution of cubic and bi-quadratic equations, Correlation and Regression, Binomial distribution, Poisson distribution, Normal distribution.	8 Hours
Unit-4:	Propositional Calculus: Propositions: Algebra, Conditional; Truth tables; Logical Equivalence and implications; Converse; Inverse; Contra-positive; Bi-conditional statements; Negation of Compound statements; Tautologies and Contradiction; Normal Forms; Arguments; Fallacies; Quantifiers.	8 Hours
Unit-5:	Set Theory: Concepts, Operations, Identities, Venn diagram, Cartesian product. Relation: Definition, Types, Pictorial representation, Composition. Function: Definition, classification, types and composition. Combinatorics: Principles, Permutation and Combination, Recurrence Relations and Generating Functions, Mathematical Induction.	8 Hours
Text Books:	1. Grewal B.S., <i>Higher Engineering Mathematics</i> , Khanna Publishers.

Course Code: EAS303	Humanities and Social Sciences including Management Course-3 B.Tech (CSE) Semester III Human Values & Professional Ethics	L-2 T-0 P-0 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the importance of value education in life and method of self-exploration.	
CO2.	Understanding 'Natural Acceptance' and Experiential Validation- as the mechanism for self-exploration.	
CO3.	Applying right understanding about relationship and physical facilities.	
CO4.	Analyzing harmony in myself, harmony in the family and society, harmony in the nature and existence.	
CO5.	Evaluating human conduct on ethical basis.	
Course Content:		
Unit-1:	Introduction to Value Education: Understanding of Morals, Values and Ethics; Need, Content and Process for Value Education. Attributes of A Good Character- Integrity, Work Ethic, Respect For Others, Living Peacefully, Cooperation, Commitment, and Empathy etc. Spirituality: Introduction to Yoga and Meditation for Professional Excellence and Stress Management. Understanding Harmony in the Family and Society.	8 Hours
Unit-2:	Ethics & Technology: Impact of Technological Growth on Society and Value System; Reports of Club of Rome, Appropriate Technology Movement of Schumacher, Problems of Technology Transfer, Technology Assessment Impact Analysis, Human Operator in Engineering Projects & Industries, Problems of Man-Machine Interaction, Human Centered Technology, Safety and Risk Analysis.	8 Hours
Unit-3:	Ethics of Profession: Ethical Issues in Engineering Practice, Conflicts of Interest: Conflicts between Business Demands and Professional Ethics. Social and Ethical Responsibilities of Technologists. Ethical Issues at Workplace: Discrimination, Cybercrime, Plagiarism, Sexual Misconduct, Fraudulent Use of Institutional Resources. Intellectual Property Rights and its uses. Whistle blowing and beyond, Case studies	8 Hours
Unit-4:	Profession and Human Values: Values Crisis in Contemporary Society; Value Spectrum of Good Life; Integrated Personality. Modern Search for a Good Society: Justice, Democracy, Secularism, Rule of Law. Values in Indian Constitution. Canons of ethics: Ethics of Virtue; Ethics of Duty; Ethics of Responsibility.	8 Hours
Unit-5:	Global Issues & Professional Ethics: MNCs & Morality; Case Study: Bhopal Gas Tragedy. Environmental Ethics: Disposal of Plastic Waste, e-Waste, Industrial. Computer Ethics: Problems in Computer Ethics. Weapons Development: Impact on Society & Humanity. Sustainable Development, Moral Leadership; Corporate Social Responsibility. Engineering Council of India.	8 Hours

<u>Text Books:</u>	1.R R Gaur, R Sangal, G P Bagaria, A Foundation Course in Value Education.
<u>Reference Books:</u>	1. Ivan Illich, Energy & Equity, The Trinity Press, Worcester, and HarperCollins, USA 2. E.F. Schumacher, Small is Beautiful: a study of economics as if people mattered, Blond & Briggs, Britain. 2. A Nagraj, Jeevan Vidya ekParichay, Divya Path Sansthan, Amarkantak. 3. Sussan George, How the Other Half Dies, Penguin Press. Reprinted. 4. PL Dhar, RR Gaur, Science and Humanism, Commonwealth Purblishers. 5. A.N. Tripathy, Human Values, New Age International Publishers. 6. E G Seebauer& Robert L. Berry, Fundamentals of Ethics for Scientists & Engineers, Oxford University Press. * Latest editions of all the suggested books are recommended.

Course Code: ECS355	Laboratory Course-8 B.Tech (CSE) Semester III DATA STRUCTURE USING C++ (LAB)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying the concept of different data types and their usage using C++ Programs.	
CO2.	Applying the concept of recursion for problem solving.	
CO3.	Applying the programming constructs and their usage for problem solving.	
CO4.	Applying the understanding to solve basic operations searching, sorting, insertion, deletion on data structures.	
CO5.	Developing programming skills to solve problems with various storage structures like stack, queue, linked list and tree.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write programs implementing Sorting programs: Bubble sort, Merge sort, Insertion sort, Selection sort, and Quick sort. 2. To write programs implementing Searching programs: Linear Search, Binary Search. 3. To write programs Array implementation of Stack, Queue, Circular Queue, Linked List. 4. To write programs implementing Stack, Queue, Circular Queue, Linked List using dynamic memory allocation. 5. To write program implementing Binary tree. 6. To write programs implementing Tree Traversals (pre-order, in-order, post-order). 7. To write programs implementing graph traversal (BFS, DFS). 8. To write programs implementing minimum cost spanning tree, shortest path. 	

Course Code: ECS356	Laboratory Course-9 B.Tech (CSE) Semester III DATA BASE MANAGEMENT SYSTEM (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of DML operation to database table to complete different queries on database.	
CO2.	Applying the concepts of different DDL operations.	
CO3.	Applying the concepts of DCL operations like grant and revoke for administration purpose on a table.	
CO4.	Applying the concepts of PL/SQL for creating different triggers to develop event driven action in database.	
CO5.	Analyzing the concepts of PL/SQL for creating functions and procedure to apply DML on tables	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a program to Create Table, SQL for Insertion, Deletion, Update and Retrieval using aggregating functions. 2. To write a program in PL/SQL, Understanding the concept of Cursors. 3. To write a program for implementing Join, Union & intersection etc. 4. To write a program for Creating Views, Writing Assertions Triggers. 5. To write a program for Creating Forms, Reports etc. 6. To write codes for generating read and update operator in a transaction using different situations. 7. To write a program to Implement 2PL concerning central algorithm. 8. To develop code for understanding of distributed transaction processing. <p>Students are advised to use Developer 2000 Oracle 8+ version for above experiments.</p> <p>However, depending on the availability of Software's students may use power builder/SQL Server/DB2 for implementation.</p>	

Course Code: EEEC351	Laboratory Course-10 B.Tech (CSE) Semester III DIGITAL LOGIC CIRCUIT (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying the concept of basic gates to design combinational circuits and verify using truth table.	
CO2.	Applying the concept of flip-flops to design sequential circuits and verify using truth table.	
CO3.	Applying the concepts to design registers	
CO4.	Applying the concepts to design counters.	
CO5.	Applying the concepts of AND & OR Gate.	
	LIST OF EXPERIMENTS	
	1) To study of following combinational circuits: Multiplexer, Demultiplexer and Encoder. Verify truth tables of various logic functions. 2) To study of various combinational circuits based on: AND/NAND Logic blocks and OR/NOR Logic blocks. 3) To study various waveforms at different points of a transistor bi-stable multi-vibrator and its frequency variation with different parameters. 4) To design a frequency divider using IC-555 timer. 5) To study various types of registers and counters. 6) To study Schmitt trigger circuit. 7) To study transistor as multi-vibrator. 8) Experimental study of characteristics of CMOS integrated circuits. 9) Interfacing of CMOS to TTL and TTL to CMOS. 10) BCD to binary conversion on digital IC trainer. 11) Testing of digital IC by automatic digital IC trainer. 12) To study OP-AMP as Current to Voltage & Voltage to Current converters & comparator.	

B. Tech (TGC307)	<p align="center">Skill Enhancement Course (SEC) -1</p> <p align="center">B.Tech Sem-III</p> <p align="center">Foundation in Quantitative Aptitude</p>	<p>L-0 T-0 P-2 C-1</p>
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Solving complex problems using Criss cross method, base method and square techniques.	
CO2.	Applying the arithmetical concepts of Average, Mixture and Allegation.	
CO3.	Evaluating the different possibilities of various reasoning-based problems in series, Blood relation and Direction.	
CO4.	Operationalizing the inter-related concept of Percentage in Profit Loss and Discount, Si/Ci and Mixture/Allegation.	
Course Content:		
Unit-1:	Speed calculations Squares till 1000, square root, multiplications: base 100, 200 300 etc., 11-19, crisscross method for 2X2, 3X3, 4X4, 2X3, 2X4 etc., cubes, cube root	3 Hours
Unit-2:	Percentages Basic calculation, ratio equivalent, base, change of base, multiplying factor, percentage change, increment, decrement, successive percentages, word problems	5 Hours
Unit-3:	Profit Loss Discount Basic definition, formula, concept of mark up, discount, relation with successive change, faulty weights	5 Hours
Unit-4:	SI and CI Simple Interest, finding time and rate, Compound Interest, difference between SI and CI, Installments	4 Hours
Unit-5:	Averages Basic Averages, Concept of Distribution, Weighted Average, equations	3 Hours
Unit-6:	Mixtures and allegations Mixtures of 2 components, mixtures of 3 components, Replacements	5 Hours
Unit-7:	Blood relations Indicating type, operator type, family tree type	3 Hours
Unit-8:	Direction sense Simple statements, shadow type	2 Hours
Reference Books:	<ul style="list-style-type: none"> R1: -Arun Sharma: - How to Prepare for Quantitative Aptitude R2: -Quantitative Aptitude by R.S. Agrawal R3: -M Tyra: Quicker Maths R4: -Nishith K Sinha: - Quantitative Aptitude for CAT R5: -Reference website: - Lofoya.com, gmatclub.com, cracku.in, handakafunda.com, tathagat.mba, Indiabix.com R6: -Logical Reasoning by Nishith K Sinha R7: -Verbal and Non-Verbal Reasoning by R.S. Agrawal 	

	* Latest editions of all the suggested books are recommended.	
--	---	--

Course Code: EGP311	DGP-3 B.Tech (CSE) Semester III DISCIPLINE & GENERAL PROFICIENCY	L-0 T-0 P-0 C-0
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the social responsibilities toward the institute and humanity.	
CO2.	Understanding the need of participations in different events to groom the personality.	
CO3.	Understanding the discipline and follow them during academics and institutional activities.	
CO4.	Understanding Social awareness towards society.	
CO5.	Applying actively towards various institution activities like workshop, seminar and other events	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<ol style="list-style-type: none"> 1. Observance of dress code. 2. Participation in Conferences /Workshops / Seminars. 3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time. 4. Participation in community projects including NSS. 5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time. 6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel. 7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level. 8. General behavior 9. Any extraordinary achievement. <p>The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).</p>	

Head of Department would be display GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o		Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement

	Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: ECS401	Professional Core Course-4 B.Tech (CSE) Semester IV THEORY OF COMPUTATION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the fundamentals of Computational theory and basic terminology used.	
CO2.	Understanding basics of various machines used for computations like FSM, PDA, TM.	
CO3.	Understanding the grammar, language, formation of regular expression in FA, minimization of FA and CFG.	
CO4.	Applying the concepts to design various machines like FSM, PDA etc.	
CO5.	Analyzing the efficiency of various machines based upon their functionality and limitations.	
Course Content:		
Unit-1:	Fundamentals: Strings, Alphabet, Language, Operations, Finite state machine, Definitions, Finite automaton model, acceptance of strings and languages, Deterministic finite automaton and non deterministic finite automaton, Transition diagrams and language recognizers, Chomsky hierarchy of languages.	8 Hours
Unit-2:	Finite Automata: NFA with NULL (ϵ) transitions-Significance, Acceptance of languages. Conversions and Equivalence, Equivalence between NFA with and without null transitions, NFA to DFA conversion, Minimization of finite state machine (FSM), Equivalence between two FSM's, Finite Automata with output-Moore and Mealy machines	8 Hours
Unit-3:	Regular Languages: Regular sets, Regular expressions, Identify rules, Constructing finite Automata for a given regular expressions, Conversion of finite automata to regular expressions, Pumping lemma of regular sets. Grammar Formalism: Regular grammars-right linear and left linear grammars, Equivalence between regular linear grammar and FA, Context free grammar, Derivation trees, Sentential forms, Rightmost and leftmost derivation of strings.	8 Hours
Unit-4:	Context Free Grammars: Ambiguity in context free grammars. Minimization of context free grammars, Chomsky normal form, Greiback normal form, Pumping lemma for context free languages.	8 Hours
Unit-5:	Push Down Automata: Push down automata, Definition, Model, Acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence. Equivalence of CFL and PDA, Introduction to Turing Machine (TM), TM Definition, TM Model, Design of TM.	8 Hours
Text Books:	1. K.L.P. Mishra and N.Chandrasekaran, "Theory of Computer Science (Automata, Languages and Computation)", PHI	
Reference Books:	1. Martin J. C., "Introduction to Languages and Theory of Computations", TMH 2. Papadimitrou, C. and Lewis, C.L., "Elements of theory of Computations", PHI 3. Cohen D. I. Course Code: ECS407	Professional Core Course-5 B.Tech (CSE) Semester IV JAVA PROGRAMMING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the object-oriented approach of programming, basic building blocks of java programming, java development environment, datatypes, class, methods, and various predefined packages.	
CO2.	Understanding the various predefined classes, interfaces, which deals with networking, understanding the basic approach of graphical user interface design using Abstract window toolkit and Applet.	
CO3.	Understanding the basic concept of Event handling, Applying the concept of thread and multithreading.	
CO4.	Understanding the Database connectivity using java, along with the classes and methods of java.sql package and creating basic programs using this package.	
CO5.	Applying the graphical user interface design concept using Swing.	
CO6.	Analyzing the predefined methods and interfaces of Swing package and creating basic user interface using swing.	
Course Content:		
Unit-1:	Core Java: Operators, Data types, Variables, Arrays, Control Statements, Methods & Classes, Constructors, Introducing Methods, Method Overloading, The this Keyword, Garbage Collection, Introducing Final, Understanding static, Variable Length Arguments, and Ambiguity, Inheritance, Package and Interface, Exception Handling, Multithread programming, I/O, Java Applet, String handling, Networking, Event handling, java collection framework. Abstract Window Toolkit (AWT): Controls, Layout managers, Menus, Images, Graphics.	8 Hours
Unit-2:	Java Swing: Creating a Swing Applet and Application, Programming using Panes, Pluggable Look and feel, Labels, Text fields, Buttons, Toggle buttons, Checkboxes, Radio Buttons, View ports, Scroll Panes, Scroll Bars, Lists, Combo box, Progress Bar, Menus and Toolbars, Layered Panes, Tabbed Panes, Split Panes, Layouts, Windows, Dialog Boxes, Inner frame.	8 Hours
Unit-3:	JDBC: Connectivity Model, JDBC/ODBC Bridge, java.sql package, Connectivity to remote database, navigating through multiple rows retrieved from a database. Introduction to Hibernate.	8 Hours
Unit-4:	Java Beans: Application Builder tools, Bean developer kit (BDK), JAR files, Introspection, Developing a simple bean, Using Bound properties, Java Beans API, Session Beans, Entity Beans, Enterprise Java beans (EJB), RMI (Remote Method Invocation), A simple client-server application using RMI.	8 Hours

Unit-5:	Java Servlets: Type of Servlets: Generic and HTTP Servlet, Life cycle, Running, Debugging, servlet API, Running a servlet on Apache Tomcat Server, Request Dispatchers: Forward and Include Thread-safe, HTTP Redirects, Cookies, Java Server pages (JSP), Java Server Pages - Understanding the working of Server side Scripting, JSP Components, Java beans and JSP concepts, JDBC and JSP, Configuring JSP Server (Apache Tomcat), Using JSP Implicit objects, JSP Actions, JSP-Java bean Scope, JSP and MVC, JSTL, A sample website using JSP and Servlets. Introduction to Struts2 Framework, Interceptors and Validation. Struts2 and AJAX.	8 Hours

Course Code: ECS404	Professional Core Course-6 B.Tech (CSE) Semester IV SOFTWARE ENGINEERING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basic concepts of software development life cycle and various process models of software development.	
CO2.	Understanding the concepts of agile software development and the basics of requirements engineering.	
CO3.	Understanding the concepts of software design	
CO4.	Understanding the concepts of coding approach, software testing and software reliability.	
CO5.	Understanding the concepts of software maintenance & its types, reverse engineering and CASE tools.	
CO6.	Applying software design techniques with the help of flow charts, ERD and DFD.	
Course Content:		
Unit-1:	Introduction: Evolution and impact of Software Engineering, Software Development Life Cycle (SDLC) Models: Waterfall Model, Prototype Model, Spiral Model, agility and Agile Process model, Extreme programming, other process models of agile development and Tools, Layered Approach. Software Requirements Analysis and Specifications Feasibility Study, Functional and Non-Functional Requirements, Requirements Gathering, Requirement Analysis and Specifications using DFD, Data Dictionaries and ER Diagrams, Requirements documentation, Characteristics and Organization of Software Requirement Specifications (SRS)	8 Hours
Unit-2:	Software-Design and Coding: Principles; Problem Partitioning; Abstraction; Top-Down and Bottom-Up design; Structured Approach; Functional vs. Object Oriented Approach; UML, Design Specifications and Verification; Cohesion; Coupling. Distributed Software Design, User Interface Design, Coding standards and Code Review Techniques	8 Hours
Unit-3:	Software Testing : Software Testing Fundamentals, SDLC Testing : Unit Testing, Integration Testing, System Testing, Regression Testing, Smoke Testing, Security Test, Stress Test, Performance Test, Functional Testing or Black Box Testing: Boundary Value Analysis, Alpha Testing, Beta Testing, and Acceptance Testing, Structural Testing or White Box Testing: Basis Path Testing, DD-Paths, Cyclomatic Complexity, Data Flow Testing, Mutation.	8 Hours
Unit-4:	Test Management: Test Cycle, Test Estimation, Test Cases, Test Scenarios Testing Tools: Static, Dynamic, Characteristics of Modern Tools and Automation.	8 Hours
Unit-5:	Software Maintenance: Updates-Upgrades-Patches-Versions,Error Reporting, Customer Support, Maintenance Process, Software Reliability: Importance, Hardware Reliability and Software Reliability, Failure and Faults, Reliability Models, Software Reuse, CASE (Computer Aided Software Engineering): Scope; Architecture; CASE Support in SDLC; Documentation; Reverse Software Engineering.	8 Hours

Course Code: ECS405	Professional Core Course-7 B.Tech (CSE) Semester IV COMPUTER BASED NUMERICAL & STATISTICAL TECHNIQUES	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the importance of curve fitting, regression and frequency charts and its applications to solve problems.	
CO2.	Understanding the importance of time series and forecasting models, Statistical Quality Control and Testing of Hypothesis to apply various test and its applications to solve problems.	
CO3.	Applying numerical methods to find our solution of algebraic linear equations using different methods under different conditions, and numerical solution of system of algebraic linear equations.	
CO4.	Applying numerical methods to find our solution of non linear equations using different methods under different conditions, and numerical solution of system of non linear equations. Also work out numerical differentiation and integration whenever and wherever routine methods are not applicable.	
CO5.	Applying various interpolation methods and finite difference concepts.	
Course Content:		
Unit-1:	Linear Equations: Direct Method; Gauss Jordan and Gauss Elimination Methods; Pivoting; Iterative methods; Jacobi and Gauss Seidel methods;	8 Hours
Unit-2:	Non-Linear Equations: Bisection Method, Regula-Falsi Method, Newton-Raphson Method, Rate of Convergence, Numerical Integration and Differentiation; Trapezoidal and Simpson's rule, Derivatives from Newton's Forward polynomial.	8 Hours
Unit-3:	Interpolation: Finite Difference; Newton's Forward and Backward Interpolation Formulae; Central Difference Formulae; Gauss Forward and Backward Difference Formulae; Newton's Divided Difference Formula; Lagrange's Interpolation Formula.	8 Hours
Unit-4:	Representation and Analysis: Curve Fitting; Cubic Spline and Approximation: Method of Least Squares, Fitting of Straight Lines, Polynomials and Exponential Curves. Frequency Chart: Histogram, Frequency Curve, Pi-chart. Regression analysis: Linear and Non-linear, Multiple Regression.	8 Hours
Unit-5:	Time Series and Forecasting: Moving Averages; Smoothing of curves; Forecasting Models and Methods; Statistical Quality Controls Methods, Testing of Hypothesis: Test of Significance; Chi-square Test; T-Test; ANOVA; F-Test; Application to Medicine; Agriculture.	8 Hours
Text Books:	1. Raman, R., <i>Computer Oriented Numerical Methods</i> , Prentice Hall of India.	
Reference Books:	1. Veerarajan, T. Ramachandran, T., <i>Theory and Problems in Numerical Method</i> , Tata McGraw Hill. 2. Niyogi, P., <i>Numerical Analysis and Algorithms</i> , Tata McGraw Hill.	

	* Latest editions of all the suggested books are recommended.

Course Code: ECS406	Professional Core Course-8 B.Tech (CSE) Semester IV OPERATING SYSTEM	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts and states of process, also evaluating the use of various scheduling algorithms and finding the suitability for their usage.	
CO2.	Understanding and Analyzing various issues in Inter Process Communication (IPC) and the role of OS in IPC, also understanding the various characteristics of deadlock and applying the learnt concepts and algorithm to avoid and recover from the deadlock.	
CO3.	Understanding the concepts and implementation of various Memory management policies and usage of the virtual memory.	
CO4.	Applying the basics of operating system along with the types and main functionalities of the operating system	
CO5.	Applying the file management policies and disk structure along with scheduling algorithm for applying it to solve the disk scheduling problems.	
Course Content:		
Unit-1:	Operating System: History, Types: Batch System, Time Sharing System, Real Time System, Multiprogramming, Distributed System; Functions; Services; System calls; System programs; Virtual machines.	8 Hours
Unit-2:	Process Management: Concept, States, Control Block, Scheduling; CPU, Criteria, Algorithms, Preemptive & Non Preemptive.	8 Hours
Unit-3:	Process Synchronization: Critical Section, Race Condition, Synchronization Hardware, Semaphores, Classical Problems of Synchronization. Deadlocks: Characterization, Avoidance, Detection & Recovery.	8 Hours
Unit-4:	Memory Management: Contiguous Allocation, External and Internal Fragmentation, Paging & Segmentation. Virtual Memory: Concept, Demand Paging, Page Replacement Algorithms, Allocation of Frames, Thrashing.	8 Hours
Unit-5:	File Management: Directory Structure, Allocation Methods; Contiguous; Linked; Indexed; Free Space Management; Disk: Structure, Scheduling Algorithms, Disk Management. Linux: Basics of Linux, Introduction to Linux - History, Architecture, , Basic commands in Linux, Files and File Structure	8 Hours

<u>Text Books:</u>	1. Silbershatz, A. and Galvin, P., <i>Operating System Concept</i> , Addison-Wesley.

<u>Course Code:</u> EHM403	Humanities and Social Sciences including Management Course-4 B.Tech (CSE) Semester IV Management Concepts & Organizational Behavior	L-2 T-0 P-0 C-2
<u>Course Outcomes:</u>	On completion of the course, the students will be :	
CO1.	Understanding the Concept and importance of management and its functions, organizational behavior, challenges for management	
CO2.	Understanding flow and formation of powers and politics in organizational groups	
CO3.	Analyzing Perception and Thinking process of individual, personality traits and its importance	
CO4.	Analyzing Theories of motivation and leadership and its importance and applicability into business	
CO5.	Analyzing change in organization and Conflict management.	
<u>Course Content:</u>		
Unit-1:	Introduction to Management: Meaning, nature and importance of management; Management functions; Managerial Skills. Planning: Introduction, Importance of Planning, Types of Plans, Planning & Decision Making Process	8 Hours
Unit-2:	Organizing and staffing: Meaning, Importance & Process of Organizing, Organizational Structure & its types, Delegation of Authority, Staffing: Meaning & importance. Directing: Importance & Functions, Controlling: Importance and Process, Measures for Effective Control & Control Techniques.	8 Hours
Unit-3:	Organizational Behaviour (OB): Concept, Characteristics, Key Elements of OB, Models of OB. Perception: Concept, Process & Importance. Attitudes & Job Satisfaction. Personality: Concept, Types & Theories, Learning: Concept & Theories of Learning.	8 Hours
Unit-4:	Motivation: Concepts, Principles, Theories. Leadership: Concept, Function & Style. Group Dynamics: Definition, Stages of Group Development, Types & Group Decision Making. Power and Politics:	8 Hours

	Concept, Sources, Approaches to Power, Political Implications of Power.	
Unit-5:	Organizational Change: Concept, Resistance to change & its Management, Implementation of Change. Conflict: Concept, Sources, Types and Resolution of Conflict, Stress: Meaning, Causes, Consequences & Managing Stress. Culture: Concept, Characteristics, Elements of Culture.	8 Hours

Course Code: ECS456	Laboratory Course-11 B.Tech (CSE) Semester IV JAVA PROGRAMMING (LAB)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying knowledge to solve real world problems based on object-oriented principles.	
CO2.	Applying the basic approach of graphical user interface design using Abstract window toolkit, Applet and swing packages, create some application that are based upon some real world scenario	
CO3.	Analyzing the concept of database handling and creating application that are able to communicate with various database.	
CO4.	Analyzing the web architecture for creating applications using servlets and java server pages.	
CO5.	Analyzing the Client server architecture, Understanding the Remote method invocation architecture and creating basic application using Remote method invocation.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a program in Java for illustrating, overloading, over riding and various forms of inheritance. 2. To write programs to create packages and multiple threads in Java. 3. To write programs in Java for event handling Mouse and Keyboard events. 4. To create different applications using Layout Manager. 5. To write programs in Java to create and manipulate Text Area, Canvas, Scroll Bars, Frames and Menus using swing/AWT. 6. To create Applets using Java. 7. To write program for Client Server Interaction with stream socket connections. 8. To write a program in java to read data from disk file. 	

Course Code: ECS453	Laboratory Course-12 B.Tech (CSE) Semester IV COMPUTER BASED NUMERICAL & STATISTICAL TECHNIQUES (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding floating point arithmetic operations.	
CO2.	Understanding various Algebraic and transcendental equations.	
CO3.	Applying various interpolation formula's for solving mathematical problems.	
CO4.	Applying linear and non linear regression methods with the help of least square.	
CO5.	Applying various formulae's of numerical integration and differentiations techniques to solve problems.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a program implementing floating point arithmetic operations i.e., addition, subtraction, multiplication and division. 2. To write a program to deduce errors involved in polynomial interpolation. 3. To write programs implementing Algebraic and transcendental equations using Bisection, Newton-Raphson, Iterative, method of false position, rate of conversions of roots in tabular form for each of these methods. 4. To write a program implementing formulae by Bessel's, Newton, Sterling, and Lagrange's. 5. To write a program implementing method of least square curve fitting. 6. To write a program implementing numerical differentiation. 7. To write a program implementing numerical integration using Simpson's 1/3 and 3/8 rules, trapezoidal rule. 8. To write a program showing frequency chart, regression analysis, Linear square fit, and polynomial fit. 	

Course Code: ECS455	Laboratory Course-13 B.Tech (CSE) Semester IV OS lab with Software Engineering (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding various methods to perform the basic operations on a UNIX based operating system.	
CO2.	Applying the concept to implement and simulate the various CPU scheduling and Page replacement algorithms.	
CO3.	Applying the file read, write and access methods and perform the operations on a file in UNIX.	
CO4.	Analyzing the methods for creating SRS and various diagrams using software engineering paradigms	
CO5.	Analyzing the methods for creating flowchart to show process flow.	
	LIST OF EXPERIMENTS	
	<p>1. To implement CPU Scheduling Algorithms</p> <ul style="list-style-type: none"> • FCFS • SJF • SRTF • PRIORITY • ROUND ROBIN <p>2. Simulate all Page Replacement Algorithms</p> <ul style="list-style-type: none"> • FIFO • LRU <p>3. Simulate Paging Technique of Memory Management</p> <p>Note: The Instructor may add/delete/modify/tune experiments, wherever he/she feels in a justified manner.</p> <p>SOFTWARE ENGINEERING LAB</p> <p>For any given case/ problem statement do the following;</p> <ol style="list-style-type: none"> 1. Prepare a SRS document in line with the IEEE recommended standards. 2. Draw the use case diagram and specify the role of each of the actors. Also state the precondition, post condition and function of each use case. 3. Draw the activity diagram. 4. Identify the classes. Classify them as weak and strong classes and draw the class diagram. 5. Draw the sequence diagram for any two scenarios. 6. Draw the collaboration diagram. 7. Draw the state chart diagram. 8. Draw the component diagram. 9. Perform forward engineering in java. (Model to code conversion) 10. Perform reverse engineering in java. (Code to Model conversion) 	

	11. Draw the deployment diagram.	
--	----------------------------------	--

B. Tech (TGC407)	Skill Enhancement Course (SEC)- 2 B.Tech Sem-IV Analytical Reasoning	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Applying the arithmetical concepts in Ratio Proportion Variation.	
CO2.	Employing the techniques of Percentage; Ratios and Average in inter related concepts of Time and Work, Time Speed and Distance.	
CO3.	Identifying different possibilities of reasoning based problems of Syllogisms and Venn diagram.	
CO4.	Examining the optimized approach to solve logs and Surds.	
Course Content:		
Unit-1:	Ratio, proportions and variations Concept of ratios, proportions, variations, properties and their applications	5 Hours
Unit-2:	Time and Work Same efficiency, different efficiency, alternate work, application in Pipes and Cisterns	6 Hours
Unit-3:	Time Speed Distance Average speed, proportionalities in Time, Distance, trains, boats, races, circular tracks	6 Hours
Unit-4:	Logs and Surds Concept and properties of logs, surds and indices	4 Hours
Unit-5:	Coding and decoding Sequential coding, reverse coding, abstract coding	3 Hours
Unit-6:	Syllogisms Two statements, three statements	4 Hours
Unit-7:	Venn diagram Basic concept and applications	2 Hours
Reference Books:	<ul style="list-style-type: none"> • R1: -Arun Sharma: - How to Prepare for Quantitative Aptitude • R2: -Quantitative Aptitude by R.S. Agrawal • R3: -M Tyra: Quicker Maths • R4: -Nishith K Sinha: - Quantitative Aptitude for CAT • R5: -Reference website: - Lofoya.com, gmatclub.com, cracku.in, handakafunda.com, tathagat.mba, Indiabix.com • R6: -Logical Reasoning by Nishith K Sinha

Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the social responsibilities toward the institute and humanity.	
CO2.	Understanding the need of participations in different events to groom the personality.	
CO3.	Understanding the discipline and follow them during academics and institutional activities.	
CO4.	Understanding Social awareness towards society.	
CO5.	Applying actively towards various institution activities like workshop, seminar and other events	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<ol style="list-style-type: none"> 1. Observance of dress code. 2. Participation in Conferences /Workshops / Seminars. 3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time. 4. Participation in community projects including NSS. 5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time. 6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel. 7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level. 8. General behavior 9. Any extraordinary achievement. <p>The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).</p>	

The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).

Head of Department would be display GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o		Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement

	Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: ECSCC401	Co-Curricular Activity-II Semester-IV CCA-1I	L-0 T-0 P-2 C-1
For the Co-Curricular Activity TMU has assigned different activities under TMU STUDENT SOCIETIES (TSS) to various colleges with following details:		
S.N.	Society Name	College / Dept. Name
20.	THEATRE	College of Pharmacy
21.	DRAWING AND PAINTING	College of Fine Arts
22.	DEBATING	Faculty of Education
23.	CULTURE AND HERITAGE (VIRASAT)	TM Medical & Research Centre
24.	READING AND WRITING	CTLD
25.	MEDIA	Media Cell
26.	PHOTOGRAPHY	College of Law & Legal Studies
27.	FITNESS	College of Physical Education
28.	FASHION	TMIMT
29.	ENVIRONMENT	TM Dental & Research Centre
30.	SINGING	Faculty of Engineering
31.	DANCING	CCSIT
32.	SPORTS	TM College of Physical Education
33.	QUIZ	College of Nursing
34.	VIDEOGRAPHY	College of Law & Legal Studies
35.	ARTS	College of Fine Arts
36.	ROAD SAFETY	Dean Students' Welfare
37.	MUSIC	College of Paramedical

38.	POETRY	Faculty of Education
-----	--------	----------------------

TMU STUDENT SOCIETIES (TSS)

7. General Rules & Regulations

- a. The societies are student driven and faculty works as advisor only.
- b. The annual society membership fee is Rs.200/- per student per club.
- c. All societies are mentored and monitored by the DSW office under the guidance of Hon'ble Vice-Chancellor.
- d. Any regular student is eligible to be the office bearer (General Secretary/Treasurer/member) after completing one year of regular studies at TMU.
- e. If extraordinary budget is required to conduct the activities of the concern society, then proposal may be submitted from the faculty advisor to the DSW office.
- f. The consumable used in any activity(s) of the society shall be borne by the student(s).
- g. The schedule of the activities of the society shall be as per the academic calendar of the respective semester.
- h. The advisor may increase the no. of co-advisors (in consultation with DSW) as per requirement, ideally there shall be one co-advisor on every 50 (fifty) students.

8. Announcements and constitutions

- a. The society activities are planned and executed after the due approval of faculty advisor and DSW.
- b. The composition of each society is- faculty Advisor(one), faculty co-advisors(two), student General Secretary (one), student treasure (one) and student member (one).
- c. The general secretary of the society notifies all activities in coordination with faculty advisor.

9. Registration

- a. Society membership forms are notified from the DSW office in the beginning of each academic session for Odd& Even semester separately.
- b. Every UG student of TMU have to choose three societies (maximum one in a semester) for membership as per their interest during the entire program.

10. Activities

- a. The activities shall be decided and notified at least 15 days prior from the beginning of the semester by the faculty advisor in the consultation with other office bearers of the respective society.

11. Evaluation

- a. There shall be one credit (100 marks) for activities of each society in a semester.

- b.** There will be five parameters (20 marks each) on which each student will be evaluated.
- c.** The evaluation methodology and parameters shall be decided and notified by the faculty advisor in the consultation with the office bearers of the respective society in the beginning of the semester.
- d.** The passing marks shall as per the ordinance of the respective programme.
- e.** The awards shall be submitted to the university examination division before the start of the end semester examination of the respective semester.
- f.** The awards shall be submitted by the faculty advisor with the signature of at least one co-advisor of the respective society.

12.Certification

- a.** To earn the degree minimum two credits are required.
- b.** The separate certificates shall be issued from the university examination division on the following eight-point scale-

Percentage of marks obtained	Letter Grade	Grade Point	Performance
90.00-100.00	A+	10	Outstanding
80.00-89.00	A	9	Excellent
70.00-79.99	B+	8	Very Good
60.00-69.99	B	7	Good
55.00-59.99	C	6	Fair
50.00-54.99	D	5	Average
45.00-49.99	E	4	Pass
Less than 45	F	0	Fail

Course Code: ECS511	Professional Core Course-9 B.Tech (CSE) Semester V COMPUTER ARCHITECTURE	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the theory and architecture of central processing unit.	
CO2.	Understanding the concepts of parallel processing, pipelining and interprocessor communication.	
CO3.	Understanding the impact of instruction set architecture on cost-performance of computer design.	
CO4.	Understanding dynamic scheduling methods and their adaptation to contemporary microprocessor design.	
CO5.	Analyzing microprocessor architecture and apply assembly language programming.	
Course Content:		
Unit-1:	Parallel Computing: Concepts, Architecture, Classification Schemes, Applications, Parallelism in Uni-processor Systems, Parallel Computer structures. Pipelining Processing: An overlapped Parallelism, Instructions and Arithmetic.	8 Hours
Unit-2:	Principles of Designing Pipelined Processors: Internal forwarding and register tagging, Hazard detection and resolution, Job sequencing and collision prevention, Characteristics of Vector processing, multiple vector task dispatching, SIMD array processors, Masking and Data routing.	8 Hours
Unit-3:	SIMD Interconnection Network: Static, Dynamic networks, Cube interconnection network, ShuffleExchange and Omega Network, SIMD matrix multiplication. Multiprocessor Architecture: Tightly and loosely coupled multiprocessors.	8 Hours
Unit-4:	Multiprocessor Scheduling: Strategies and Deterministic Scheduling Models, Data Flow computing and Data Flow Graph, 8 Bit and 16 Bit Intel Microprocessor Architecture and Register set.	8 Hours
Unit-5:	Assembly Language Programming Based on Intel 8085: Instructions: Data Transfer, Arithmetic, Logic, Branch operations; Looping Counting, Indexing, Programming Techniques, Counters and Time Delays, Stacks and Subroutines, Conditional call and Return Instructions, Advanced Subroutine Instructions.	8 Hours
Text Books:	1. Hwang, K., <i>Computer Architecture and parallel processing</i> , McGraw Hill	
Reference Books:	1. Tabak, D., <i>Advanced Microprocessor</i> , McGraw Hill. 2. Hall, D.V, <i>Microprocessor and Interfacing, Program and hardware</i> , Tata McGraw Hill. * Latest editions of all the suggested books are recommended.

Material:		
------------------	--	--

Course Code: ECS503	Professional Core Course-10 B.Tech (CSE) Semester V ANALYSIS AND DESIGN OF ALGORITHM	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basic concept of algorithm design, algorithm efficiency, run time complexity computation, divide and conquer concept of algorithm design, binary search algorithm analysis, divide and conquer approach analysis.	
CO2.	Understanding concept of greedy method in problem solving, exact optimization solution for minimum cost spanning tree, approximate solution for knapsack problem, single shortest path computation.	
CO3.	Applying concept of dynamic programming in problem solving, dynamic programming vs divide and conquer, shortest path computation application, matrix multiplication application, traveling salesman problem application, longest common subsequence application.	
CO4.	Applying basic concept of branch and bound method, LC searching bounding, FIFO branch and bound, 0/1 knapsack problem, travelling salesman problem, complexity measures, polynomial vs non-polynomial time complexity, NP-hard and NP-complete problem.	
CO5.	Analyzing concept of graph problem to get solution of depth first search method, breadth first search method, back tracking, 8-queen problem, knapsack problem.	
Course Content:		
Unit-1:	Introduction: Algorithms, Analysis of Algorithms, Design of Algorithms, Complexity of Algorithms, Asymptotic Notations, Growth of function, Recurrences and their solution methods. Sorting in polynomial Time: Insertion sort, Merge sort, Heap sort, and Quick sort. Sorting in Linear Time: Counting sort, Radix Sort, Bucket Sort.	8 Hours
Unit-2:	Advanced Design and Analysis Techniques: Dynamic programming: Assembly Line Scheduling, Matrix Chain Multiplication, Longest Common Sequence, Traveling salesman Problem (TSP). Greedy Algorithm: Activity Selection Problem, Knapsack problem. Backtracking, Branch and Bound.	8 Hours
Unit-3:	Advanced Data Structure: Red Black Trees, Augmenting Data Structure, Binomial Heap, B-Tree and Fibonacci Heap. Branch and Bound: LC searching Bounding, FIFO branch and bound, LC, Applications, 0/1Knapsack problem, Traveling Salesman Problem.	8 Hours

Unit-4:	Graph Algorithms: Elementary Graph Algorithms, Breadth First Search, Depth First Search, Topological Sort, Strongly Connected Components, Minimum Spanning Tree, Kruskal's Algorithms, Prim's Algorithms, Single Source Shortest Path, All pair Shortest Path, Traveling Salesman Problem.	8 Hours
Unit-5:	Randomized Algorithms, String Matching: Naïve String Matching, Rabin-Karp, String matching with finite automata, KMP string matching algorithm, Polynomial vs. Non-polynomial Time complexity, NP-Hard and NP-Complete problems.	8 Hours
<u>Text Books:</u>	1 Cormen, L., <i>Introduction to Algorithms</i> , Prentice Hall of India.	
<u>Reference Books:</u>	1. Bratley, B., <i>Fundamental of Algorithms</i> , Prentice Hall of India. 2. Goodrich, M.T., <i>Algorithms Design</i> , John Wiley. 3. Aho, A.V., <i>The Design and analysis of Algorithms</i> , Pearson Education. * Latest editions of all the suggested books are recommended.

Course Code: ECS510	Professional Core Course-11 B.Tech (CSE) Semester V COMPUTER NETWORK	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the fundamentals of computer networks, their types, transmission modes, and various reference models.	
CO2.	Understanding error-free transmission of data along with data collision.	
CO3.	Understanding addressing techniques and transmission modes of a network.	
CO4.	Understanding the working of application layer protocols and the impact of network security tools on an existing systems.	
CO5.	Applying various routing and congestion control algorithms over a network and Identify Quality of service parameters and addressing techniques.	
Course Content:		
Unit-1:	Network: Goals, Applications, Components; Direction of Data flow networks, Categories, Types of Connections, Topologies, Protocols and Standards, ISO / OSI model, Transmission Media, Types, ISDN, Routers.	8 Hours
Unit-2:	Medium Access Sub-Layer: Channel Allocations, ALOHA protocols, Error detection and correction: Parity, LRC, CRC, Hamming code, Flow Control and Error control; Stop and wait, Go back-N, ARQ, Selective repeat ARQ, Sliding Window, HDLC, Ethernet: IEEE-802.3, 802.4, 802.5, 802.11, FDDI, SONET , Bridges.	8 Hours
Unit-3:	Network Layer: Internet works, Packet Switching and Datagram Approach, IP addressing methods, Sub netting, Routing: Distance Vector, Link State.	8 Hours
Unit-4:	Transport Layer: Duties, Multiplexing, Demultiplexing, Sockets. Protocols: User Datagram Protocol (UDP), Transmission Control Protocol (TCP), Congestion Control, Quality of Services (QOS), Integrated Services.	8 Hours
Unit-5:	Application Layer: Domain Name Space (DNS), File Transfer Access and Management, Electronic Mail, Virtual Terminals, WWW, Security, Cryptography.	8 Hours
Text Books:	1. Forouzan, B.A., <i>Data Communication and Networking</i> , Tata McGraw Hill

Course Code: ECS552	Laboratory Course-14 B.Tech (CSE) Semester V ANALYSIS AND DESIGN OF ALGORITHM (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying divide and conquer concept of algorithm in binary search, quick sorting and merge sorting.	
CO2.	Applying concept of greedy method in exact optimization solution for minimum cost spanning tree, approximate solution for knapsack problem, single shortest path computation.	
CO3.	Applying concept of dynamic programming in shortest path computation application, matrix multiplication application, traveling salesman problem application, longest common subsequence application.	
CO4.	Applying concept of graph in to find solution of depth first search method, breadth first search method, back tracking, 8-queen problem, and knapsack problem.	
CO5.	Analyzing backtracking concept in connected components computation in graph	
LIST OF EXPERIMENTS		
	<ol style="list-style-type: none"> 1. To write a program in C/C++ for insertion and deletion into binary search tree. 2. To write a program in C/C++ for creation of a Red Black tree and all the associated operations. 3. To write a program in C/C++ for implementing an AVL tree and all the associated operations. 4. To write a program in C/C++ for multiplication of two matrices using Stassen's matrix multiplication method. 5. To write a program in C/C++ to solve Knapsack problem. 6. To write a program in C/C++ to implement shortest path algorithms (Dijkstra's and Bellman's Algorithms). 7. To write a program in C/C++ for finding the minimum cost Spanning Tree in a connected graph. 8. To write a program in C/C++ for solving 8-Queen's problem. 9. To write a program in C/C++ for finding the number of connected components in a Graph. 	

Course Code: ECS556	Laboratory Course-15 B.Tech (CSE) Semester V PYTHON (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of different collections - list, Tuple, dictionaries and dataframe.	
CO2.	Understanding the concepts to built-in functions in Python and their usage.	
CO3.	Applying the concept of database connectivity with python to perform some operations in database.	
CO4.	Applying the programming construct to perform various matrix operations.	
CO5.	Developing own packages in python with different functionalities	
	LIST OF EXPERIMENTS	
	<p>Based on the content: Introduction History, Features, Setting up path, Working with Python, Basic Syntax ,Variable and Data Types , Operator Conditional Statements If ,If- else ,Nested if-else Looping For, While ,Nested loops Control Statements Break, Continue .</p> <p>String Manipulation Accessing Strings ,Basic Operations ,String slices ,Function and Methods Lists Introduction ,Accessing list ,Operations ,Working with lists ,Function and Methods Tuple Introduction ,Accessing tuples ,Operations ,Working ,Functions and Methods.</p> <p>Dictionaries Introduction,Accessing values in dictionaries, Working with dictionaries, Properties ,Functions Functions Defining a function , Calling a function, Types of functions ,Function Arguments ,Anonymous functions ,Global and local variables.</p> <p>Modules Importing module ,Math module ,Random module ,Packages ,Composition Input-Output Printing on screen ,Reading data from keyboard ,Opening and closing file ,Reading and writing files ,Functions.</p>	

	Exception Handling ,Exception Handling ,Except clause ,Try, finally clause ,User Defined Exceptions, OOPs concept class and object , Attributes ,Inheritance ,Overloading ,Overriding ,Data hiding	
	<p>Write a Python program to: -</p> <ol style="list-style-type: none"> 1. Demonstrate the working of 'id' and 'type' functions 2. To find all prime numbers within a given range. 3. To print 'n' terms of Fibonacci series using iteration. 4. To demonstrate use of slicing in string 5. <ol style="list-style-type: none"> a. To add 'ing' at the end of a given string (length should be at least 3). If the given string already ends with 'ing' then add 'ly' instead. If the string length of the given string is less than 3, leave it unchanged. Sample String : 'abc' Expected Result : 'abcing' Sample String : 'string' Expected Result : 'stringly' b. To get a string from a given string where all occurrences of its first char have been changed to '\$', except the first char itself. 6. <ol style="list-style-type: none"> a. To compute the frequency of the words from the input. The output should output after sorting the key alphanumerically. b. Write a program that accepts a comma separated sequence of words as input and prints the words in a comma-separated sequence after sorting them alphabetically. 7. Write a program that accepts a sequence of whitespace separated words as input and prints the words after removing all duplicate words and sorting them alphanumerically. 8. To demonstrate use of list & related functions 9. To demonstrate use of Dictionary & related functions 10. To demonstrate use of tuple, set & related functions 11. To implement stack using list 12. To implement queue using list 13. To read and write from a file 14. To copy a file 15. To demonstrate working of classes and objects 16. To demonstrate class method & static method 17. To demonstrate constructors 18. To demonstrate inheritance 19. To demonstrate aggregation/composition 20. To create a small GUI application for insert, update and delete in a table using Oracle as backend and front end for creating form 	

Course Code: ECS555	Laboratory Course16 B.Tech (CSE) Semester V COMPUTER NETWORK (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the working of network simulation tool (Packet Tracer)	
CO2.	Understanding about basic network connectivity. Understand IOS used for networking devices	
CO3.	Understanding about ARP table. Analyzing some trouble shooting commands	
CO4.	Applying the knowledge to Configure the initial switch and router setting, Understand TCP/IP and OSI models	
CO5.	Analyzing MAC and IP addresses, Learn about TCP and UDP communications.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a program in C illustrating use of TCP Sockets. 2. To write a program in C illustrating use of simple UDP. 3. To write a program in C illustrating use of Raw Sockets (like packet capturing and filtering). 4. To write a program in C illustrating concept of Sliding Window Protocol. 5. To write a program in C for Address Resolution Protocol. 6. To write a program in C for implementing Routing Protocols. 7. To write a program in C illustrating for Open Shortest Path first Routing Protocol. 	

Course Code: ECS591	Project / Industrial Training/ Seminar-1 B.Tech (CSE) Semester V INDUSTRIAL TRAINING	L-0 T-0 P-0 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding knowledge through research and development on latest technology.	
CO2.	Developing greater clarity about academic and career goals	
CO3.	Understanding of administrative functions and company culture	
CO4.	Applying critical reasoning and independent learning	
CO5	Developing ability to effectively communicate solution to problems (oral, visual, written).	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<p>Students will attend Industrial training of six weeks in any industry or reputed organization after the IV semester examination in summer vacation. The evaluation of this training shall be included in the V semester evaluation.</p> <p>The student will be assigned a faculty guide who would be the supervisor of the student. The faculty would be identified before the end of the IV semester and shall be the nodal officer for coordination of the training.</p> <p>Students will also be required to prepare an exhaustive technical report of the training undertaken during the V semester which will be duly signed by the officer under whom training was taken in the industry/ organization. The covering format shall be signed by the concerned office in-charge of the training in the industry. The officer-in-charge of the trainee would also give his rating of the student in the standard University format in a sealed envelope to the Principal of the college.</p> <p>The student at the end of the V semester will present his report about the training before a committee constituted by the Director of the College which would be comprised of at least three members comprising of the Department Coordinator, Class Coordinator and a nominee of the Director. The students guide would be a special invitee to the presentation. The seminar session shall be an open house session. The internal marks would be the average of the marks given by each member of the committee separately in a sealed envelope to the Director.</p> <p>The marks by the external examiner would be based on the report submitted by the student which shall be evaluated by the external examiner and cross examination done of the student concerned.</p> <p>Not more than three students would form a group for such industrial training/ project submission.</p>	

The marking shall be as follows.

Internal: 50 marks

By the Faculty Guide - 25 marks

By Committee appointed by the Director – 25 marks

External: 50 marks

By Officer-in-charge trainee in industry – 25 marks

By External examiner appointed by the University – 25 marks

Course Code: ECS506	Professional Elective Courses (PEC)-I B.Tech (CSE) Semester V ERP SYSTEMS	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying the waterfall model in the development of ERP applications.	
CO2.	Analyzing the design and implementation of an e-commerce application with a shopping cart.	
CO3.	Analyzing the user-centered design guidelines in developing user-friendly websites.	
CO4.	Analyzing the bullwhip effect in a supply chain, analyze the causes, and recommend possible solutions.	
CO5.	Analyzing different types of portal technologies and deployment methodologies commonly used in the industry.	
Course Content:		
Unit-1:	ERP & related technologies: Overview (evolution, Definition , Advantages), Business process Re-Engineering; Systems: Management information, Decision support, Executive information, Supply chain management, Implementation life cycle, future description of ERP.	8 Hours
Unit-2:	ERP - Modules “An Overview”: Functions and Processes of Resource Management, Basic Modules of ERP System-HRD, Personnel Management, Training and Development, Skill Inventory , Reason for the growth of ERP market.	8 Hours
Unit-3:	ERP - Resource Management Perspective: Material Planning and Control, Inventory, Forecasting, Manufacturing, Production Planning, Production Scheduling, Production Control, Sales and Distribution, Finance, Resource Management In global scenario, dynamic data management in complex global scenario.	8 Hours
Unit-4:	ERP – Information System Perspective: Evolution of Application Software Technology Management, Technology Partners, Supply Chain Management, Customer Relationship Management, Information Communication Technology, E-Business, EDI	8 Hours
Unit-5:	ERP-Key Managerial Issues: Concept Selling, IT Infrastructure, Implication of ERP Systems on Business Organization, Critical success factors in ERP System, ERP Culture Implementation Issues, Resistance to change, Public Service and Organizations (PSO) Project, ERP Selection issues, Return on Investment, Pre and Post Implementation Issues.	8 Hours
Text Books:	Leon, A., <i>Enterprise Resource Planning</i> , Tata McGraw Hill.	
Reference Books:	Sadagopan, S. <i>Enterprise Resource Planning</i> , Tata McGraw Hill.* Latest editions of all the suggested books are recommended.

Material:		
------------------	--	--

Course Code: EHM504	Professional Elective Courses (PEC)-I B.Tech (CSE) Semester V Managerial Economics and Engineering	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding meaning of Economics/Managerial Economics and its applicability	
CO2.	Understanding theories of consumer behavior, demand & supply analysis	
CO3.	Understanding Demand forecasting in business, Law of production and returns	
CO4.	Understanding market, structures and evaluation of price mechanism in different conditions	
CO5.	Understanding Correlation of macro and microeconomics concepts and business practices	
Course Content:		
Unit-1:	Introduction: Meaning, Nature & Scope of Economics, Meaning of Science, Engineering & Technology; Open, Closed & Mixed Economy. Microeconomics vs Macroeconomics, Managerial Economics and its Scope in Engineering Perspective.	8 Hours
Unit-2:	Consumer Behavior: Utility Analysis & Indifference Curve Analysis, Demand Analysis - Concepts, Determinates & Law of Demand. Elasticity of Demand- Concepts, Types & Importance of Elasticity of Demand in Managerial Decisions. Concepts of Supply	8 Hours
Unit-3:	Demand Forecasting: Meaning, Significance and Methods of Demand Forecasting; Production & Cost: Production Function, Fixed Cost, Variable Cost, Average Cost, Marginal Cost, Laws Of Returns To Scale; Law Of Diminishing Returns To Scale; Market Equilibrium.	8 Hours
Unit-4:	Market Structure: Perfect Competition; Imperfect Competition: Monopolistic, Oligopoly, Duopoly and Price Determination in Various Market Conditions. Macroeconomics: Introduction to GDP, GNP, FDI, BOP, Foreign Exchange, Fiscal Policy, Monetary Policy.	8 Hours
Unit-5:	Inflation: Meaning, Types, Causes & Preventive Methods; National Income: Concept & its Measurement, Business Cycles: Meaning & Phases Of Business Cycle. Government Budget, Parallel Economy, Indian Sectoral Economy, Agriculture in the National Economy	8 Hours
Text Books:	1. Koutsoyiannis, A : Modern Microeconomics, ELBS	
Reference Books:	1. Dwivedi, D.N., Managerial Economics, Vikas Publishing 2. Maheshwari, Y., Managerial Economics, Prentice Hall of India. 3. Mishra S.K. & Puri, V.K., Modern Macro Economic Theory, Himalayan Publishing House,	

	4. Edward Shapiro, Macro-Economic analysis, Tata Mc Graw Hill * Latest editions of all the suggested books are recommended.	
Additional Electronic Reference Material:	https://nptel.ac.in/courses/110/101/110101005/ https://nptel.ac.in/courses/110/105/110105075/ https://nptel.ac.in/content/storage2/courses/110101005/downloads/Lecture%2001.pdf	

Course Code: ECS512	Professional Elective Courses (PEC)-I B.Tech (CSE) Semester V E-COMMERCE	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the term 'e-commerce' and the need of ecommerce.	
CO2.	Understanding the role of information systems in organizations, the strategic management processes, and the implications for the management.	
CO3.	Understanding about the importance of managing organizational change associated with information systems implementation.	
CO4.	Applying the application software skills such as analyzing spreadsheets, creating database, and Web browsing, that they have learned in other courses to apply to real-world business problems.	
CO5.	Analyzing the importance of managing organizational change associated with information systems implementation.	
Course Content:		
Unit-1:	E-Commerce: Definition, History, Advantages and Disadvantages, Types, E-business vs. E-commerce, E-Commerce: technology and prospects, incentives for engaging in electronic commerce, needs of e-commerce, E-commerce models.	8 Hours
Unit-2:	Network Infrastructure for E-Commerce: Industry Framework, Internet and Intranet based E-commerce- Issues, problems and prospects, Network Infrastructure, Network Access Equipment; Broad band telecommunication (ISDN, ATM, FRAMERELAY).	8 Hours
Unit-3:	Mobile Commerce: Introduction: Mobile commerce, advantages and disadvantages, e-commerce vs m-commerce, Mobile computing: Framework, Applications; Wireless application protocol, WAP technology; Mobile Information devices.	8 Hours
Unit-4:	Electronic Payment Systems: Overview, SET protocol, payment gateway, certificate, Types; Digital tokens: Smart cards, Credits Cards, Magnetic strip cards, E-cheques based EPS; online bank Risk. On-line Commerce Environments: Servers and commercial environments; Netscape product line; Netscape commerce server; Microsoft internet explorer and servers; open market.	8 Hours

Unit-5:	EDI: Applications in business, Legal: E-commerce law, Forms of agreement, Government policies and Agenda, EDI vs. E-Commerce, Value added network, EDI versus Internet and EDI over Internet. Electronic Commerce Providers: On-line Commerce options: Company profiles.	8 Hours
<u>Text Books:</u>	1. Kalakota, R., <i>Frontiers of E-Commerce</i> , Addison-Wesley.	
<u>Reference Books:</u>	1. Sadagopan, S. <i>Enterprise Resource Planning</i> , Tata McGraw Hill. * Latest editions of all the suggested books are recommended.

Course Code: ECS513	Professional Elective Courses (PEC)-I B.Tech (CSE) Semester V	L-3 T-0 P-0 C-3
	SOFTWARE PROJECT MANAGEMENT	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the processes that exist primarily for supporting the management of software development, and are generally skewed toward addressing business concerns	
CO2.	Understanding the concepts to address specific management needs at the individual, team, division and/or organizational level	
CO3.	Applying a strong working knowledge of ethics and professional responsibility. Understanding effective organizational leadership and change skills for managing projects, project teams, and stakeholders.	
CO4.	Analyzing the leadership effectiveness in organizations ,team-building skills required to support successful performance	
CO5.	Analyzing the selection and initiation of individual projects and of portfolios of projects in the enterprise.	
CO6.	Analyzing project planning activities that accurately forecast project costs, timelines, and quality. Implement processes for successful resource, communication, and risk and change management.	
CO7.	Developing Practical applications of project management to formulate strategies allowing organizations to achieve strategic goals	
Course Content:		
Unit-1:	Project Management: Introduction to Software Project Management, Need identification, Project Management Life Cycle, Project Initiation, Project Evaluation, Project Plan, Types of Project Plan, Milestones- Major and Minor Software Metrics: What and Why, Role of Metrics and Measurement, Scope of Software Metrics, Types of Software Metrics: Project Metrics, Process Metrics, Product Metrics, and Function based Metrics	8 Hours
Unit-2:	Life Cycle Phases: Project Life Cycle and Product Life Cycle, Engineering and Production Stages: Inception, Elaboration, Construction, Transition Phases. Project Management Artifacts:: The Artifact Sets: Management Artifacts, Engineering Artifacts, Programmatic Artifacts. Project Planning: Objective, Milestone based planning, Resource Allocation, Critical Path, Project Elements, Size Estimation – Lines of Code (LOC), Work Breakdown Structures (WBS) and Function Point (FP), Effort Estimation, Cost Estimation	8 Hours
Unit-3:	Project Scheduling: CPM, PERT, Gantt Chart, Cost-Time Relations, Re-works Project Monitoring and Control: Dimensions of Project Monitoring and Control, Software Reviews, Type of Reviews – Inspections, Walkthroughs, Code Reviews Improving Software Economics: Reducing Software Product Size; Improving Software Processes: Improving Team, Effectiveness, Improving Automation, Achieving Required Quality, Peer Inspections.	8 Hours
Unit-4:	Risk Management: Software Risks, Risk Identification, Risk Mitigation, Monitoring and Management Change Management: Exploring Challenges, Risking Comfort Zone,	8 Hours

	Managing Change Configuration Management: Baseline, Configurations Items(CIs), SCM Process, Version Control, Configuration Audit	
Unit-5:	Quality Management: Quality Concept, Quality Control, Quality Assurance, ISO 9000 certification for software industry; SEI capability maturity model (CMMI); ISO vs. SEI CMMI, Six-Sigma Overview, Software Reviews, Software Measurements and metrics for Quality	8 Hours
<u>Text Books:</u>	Walker, R., <i>Software Project Management</i> , Pearson Education.	
<u>Reference Books:</u>	Shere, K. D., <i>Software Engineering and Management</i> , Prentice Hall* Latest editions of all the suggested books are recommended.	
<u>Additional Electronic Reference Material:</u>	https://nptel.ac.in/courses/106/105/106105218/ https://www.youtube.com/watch?v=eOTcPOvT-H4 https://www.youtube.com/watch?v=Wk607ruc8P0	

Course Code: ECS514	Professional Elective Courses (PEC)-I B.Tech (CSE) Semester V	L-3 T-0 P-0 C-3
	Software Testing	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding software testing	
CO2.	Understanding Basic concepts of Test Management	
CO3.	Applying Agile Methodology of software testing. Understanding how to author a software testing plan. Analyzing software Maintenance	
CO4.	Analyzing Black Box Techniques	
CO5.	Analyzing Control Flow & Data Flow. White Box Techniques: Cyclomatic Complexity	
Course Content:		
Unit-1:	Software Testing: Overview of Software Testing, Software Testing History, Importance of Software Testing, Software Test Life Cycle (STLC) and it's phases, Verification & Validation. Overview of Static & Dynamic Testing, Functional & Non-Functional Testing. Levels of Testing - Unit Testing, Integration Testing, System Testing, Acceptance Testing, Stubs & Drivers.	8 Hours
Unit-2:	Functional Testing (Black Box Testing): Overview, Black Box Techniques: Error Guessing, Decision Tables (DT), Cause Effect Graphing Technique, Boundary Value Analysis, Equivalence Class. Advantages & Disadvantages of Black Box Testing, Limitation of Black Box Testing.	8 Hours
Unit-3:	Structural Testing (White Box Testing): Overview, Control Flow & Data Flow. White Box Techniques: Cyclomatic Complexity, Basis Path Testing, DD-Paths, Graph Metrics, Mutation Testing, Mutation Score, Mutation Operands, Data Flow, Advantages & Disadvantages of White Box Testing, Limitation of White Box Testing.	8 Hours
Unit-4:	Software Test Management & Test Planning: Basic concepts of Test Management, Test Planning-Test Plan, Test Strategy, Test Estimation, Test Schedule. Test Design Techniques, Test Case Structure & preparation, Characteristics of a good Test Case, Test Case vs. Test Scenario. Test Environment. Test Execution. Test Closure & Test Report. Creating Test Cases from Requirements. Overview of Test Automation & Testing Tools.	8 Hours
Unit-5:	Non-Functional Testing: Alpha & Beta Testing, Regression Testing, Security Testing, Usability Testing, Load Testing, Stress Testing. Bug; Error; Fault; Failure. Prevention vs. Detection. Incident Management. Software Quality Assurance: Overview of Software Quality, Concept of Quality Standards (ISO 9001 and SEI Capability Maturity Model)	8 Hours
Text Books:	1. Software Testing and Quality Assurance: Theory and Practice", Sagar Naik, University of Waterloo, Piyu Tripathy, Wiley , 2008	

<u>Reference Books:</u>	1. "Effective methods for Software Testing "William Perry, Wiley. 2. "Software Testing - A Craftsman's Approach", Paul C. Jorgensen, CRC Press, 1995. 3. "Software Testing", Srinivasan Desikan and Gopalaswamy Ramesh - Pearson Education 2006. * Latest editions of all the suggested books are recommended.

Course Code: ECS559	Project / Industrial Training/ Seminar-2 B.Tech (CSE) Semester V	L-0 T-0 P-0 C-2
	MOOC COURSE	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding various resources and platform of online learning.	
CO2.	Understanding the credit utilities to be earn from online platform	
CO3.	Understanding the current trends in the technology around the world.	
CO4.	Applying themselves in a competitive environment, weekly assignments and quiz.	
CO5:	Evaluating Various latest AI models and technologies in real world to shape the career.	
	Evaluation Scheme for MOOC (Massive open online course)	
	<p>University allows students to undertake additional subjects/course(s) (In-house offered by the university through collaborative efforts or courses in the open domain by various internationally recognized universities) and to earn credits on successful completion of the same.</p> <p>Each course will be approved in advance by the University following the standard procedure of approval and will be granted 2 credits as per the approval.</p> <p>In the pilot phase it is proposed that a student undertaking and successfully completing a MOOC course through edX, Coursera, IIRS and NPTEL will be given a maximum credit of two with the course with minimum duration of 8 weeks in Mandatory to Pass Category.</p> <p>For smooth functioning and monitoring of the scheme the following shall be the guidelines for MOOC courses, Add-on courses carried out by the Institution / University from time to time.</p> <p>1. There shall be a MOOC co-ordination committee in the College with a faculty at the level of Professor heading the committee and all Heads of the Department/ Program coordinators/Principal being members of the Committee.</p> <p>2. The Committee will list out courses to be offered during the semester, which could be requested by the department or the students and after deliberating on all courses finalise a list of courses to be offered with credits defined for each course and the mode of credit consideration of the student.</p> <p>The complete process including the approval of the Vice Chancellor shall be obtained by the College before the starting of MOOC/NPTEL courses. In case of MOOC course the approval will be valid only for</p>	

	<p>the semester offered.</p> <p>3. Students will register for the course and the details of the students enrolling under the course along with the approval of the committee, and will be forwarded to the Examination department within thirty days of start of the MOOC Course by the Coordinator MOOC through the Principal of the College.</p> <p>4. Internal and external marks will be same as offered by the MOOC course.</p> <p>5. Where the MOOC course or Add-on on courses are only offering certificate of successful completion, and credit has been assigned to the course. If in case student did not clear the examination, further he/she can enroll for MOOC Course under SWAYAM in next semester / year with the same pattern stated in above points.</p>	
--	--	--

<u>Course Code:</u> TGC502	Skill Enhancement Course-3 B.Tech – Semester –V Self Management for Engineers	L-0 T-0 P-2 C-1
---	--	--

Course Outcomes:	On completion of the course, the students will be:	
CO1.	Utilizing effective verbal and non-verbal communication techniques In formal and informal settings	
CO2.	Understanding and analyzing self and devising a strategy for self Growth and development.	
CO3.	Adapting a positive mind set conducive for growth through Optimism and constructive thinking.	
CO4.	Utilizing time in the most effective manner and avoiding procrastination.	
CO5.	Making appropriate and responsible decisions through various Techniques like SWOT, Simulation and Decision Tree.	
CO6.	Formulating strategies of avoiding time wasters and preparing to-Do list to manage priorities and achieve SMART goals.	
Course Content:		
Unit-1:	Personal Development: Empathy and Sympathy Personal growth and improvement in personality Perception Positive attitude Values and Morals High self motivation and confidence Grooming	10Hours
Unit-2:	Professional Soft Skills Development: Goal setting and action planning Effective and assertive communication Decision making and problem Solving Time management Presentation Skills Happiness, risk taking and facing unknown	8Hours
Unit-3:	Basics of Selections Concepts: Resume Building- Concepts Occupational Research Group discussion (GD) and Personal Interviews- Concepts	12Hours

B. Tech (TGC507)	<p style="text-align: center;">Skill Enhancement Course (SEC)-4</p> <p style="text-align: center;">B.Tech Sem-V</p> <p style="text-align: center;">Modern Algebra and Data Management</p>	<p style="text-align: center;">L-0 T-0 P-2 C-1</p>
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Applying the concepts of modern mathematics Divisibility rule, Remainder Theorem, HCF /LCM in Number System.	
CO2.	Relating the rules of permutation and combination, Fundamental Principle of Counting to find the probability.	
CO3.	Applying calculative and arithmetical concepts of ratio, Average and Percentage to analyze and interpret data.	
CO4.	Correlating the various arithmetic concepts to check sufficiency of data	
Course Content:		
Unit-1:	Number theory Classification of Numbers, Divisibility Rules, HCF and LCM, Factors, Cyclicity (Unit Digit and Last Two digit), Remainder Theorem, Highest Power of a Number in a Factorial, Number of trailing zeroes	8 Hours
Unit-2:	Data interpretation Data Interpretation Basics, Bar Chart, Line Chart, Tabular Chart, Pie Chart, DI tables with missing values	7 Hours
Unit-3:	Data Sufficiency Introduction of Data Sufficiency, different topics-based DS	5 Hours
Unit-4:	Permutations and combinations Fundamental counting, and or, arrangements of digits, letters, people in row, identical objects, rank, geometrical arrangements, combination: - basic, handshakes, committee, selection of any number of objects, identical and distinct, grouping and distribution, de-arrangements	6 Hours
Unit-5:	Probability Introduction, Probability based on Dice and Coins, Conditional Probability, Bayes Theorem	4 Hours
Reference Books:	<ul style="list-style-type: none"> • R1: -Arun Sharma: - How to Prepare for Quantitative Aptitude • R2: -Quantitative Aptitude by R.S. Agrawal • R3: -M Tyra: Quicker Maths • R4: -Nishith K Sinha: - Quantitative Aptitude for CAT • R5: -Reference website: - Lofoya.com, gmatclub.com, cracku.in, handakafunda.com, tathagat.mba, Indiabix.com • R6: -Logical Reasoning by Nishith K Sinha • R7: -Verbal and Non-Verbal Reasoning by R.S. Agrawal <p>* Latest editions of all the suggested books are recommended.</p>	

Course Code: EGP511	DGP-5 B.Tech (CSE) Semester V DISCIPLINE & GENERAL PROFICIENCY	L-0 T-0 P-0 C-0
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the social responsibilities toward the institute and humanity.	
CO2.	Understanding the need of participations in different events to groom the personality.	
CO3.	Understanding the discipline and follow them during academics and institutional activities.	
CO4.	Understanding Social awareness towards society.	
CO5.	Applying actively towards various institution activities like workshop, seminar and other events	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<ol style="list-style-type: none"> 1. Observance of dress code. 2. Participation in Conferences /Workshops / Seminars. 3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time. 4. Participation in community projects including NSS. 5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time. 6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel. 7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level. 8. General behavior 9. Any extraordinary achievement. <p>The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).</p>	

Head of Department would be display GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o		Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement
				(5)	(15)	(20)	(10)	(20)	(20)	(5)	(5)
	Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: ECS601	Professional Core Course-12 B.Tech (CSE) Semester VI ARTIFICIAL INTELLIGENCE	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of the history of AI and different classical AI algorithms	
CO2.	Applying basic principle of AI in solutions that require problem solving, inference, perception, knowledge representation and learning.	
CO3.	Understanding awareness and fundamental understanding the various concepts of Prolog and Symbolic and Monotonic and non monotonic reasoning	
CO4.	Understanding the concept of knowledge representation techniques called slot, filler and Natural Language processing	
CO5.	Understanding the concept of Expert System and its Components and demonstrate the working of MYCIN AND DENDRAL expert system tools	
Course Content:		
Unit-1:	Artificial Intelligence: Issues, Techniques, Problems, Importance and areas of AI, Problem solving state space search; DFS, BFS Production: System, Problem characteristics; Heuristic Search Techniques, Generate and Test, Hill Climbing, Best First Search, Problem reduction, Constraint satisfaction, Crypt arithmetic and problems.	8 Hours
Unit-2:	Knowledge representation: Mapping, Approaches, Issues, Representing simple facts in logic, Representing instance and relationships, Resolution and natural deduction, Representing knowledge using rules, Procedural vs. Declarative knowledge, Logic programming, Forward vs. Backward chaining, Matching & control knowledge.	8 Hours
Unit-3:	AI programming language: Prolog: Objects, Relationships, Facts, Rules, Variables, Syntax and Data Structures; Representing objects & Relationships by using “trees” and “lists”; Use of cut; I/O of characters and structures; Symbolic reasoning under uncertainty; Monotonic Reasoning: Logics for Non-Monotonic reasoning; Implementation issues; Implementation: DFS & BFS.	8 Hours
Unit-4:	Slot and Filler Structures: Semantic nets, Frames, Conceptual dependency, Scripts, CYC Natural languages and NLP, Syntactic processing parsing techniques, Semantic analysis case grammar, augmented transition net, Discourse & pragmatic processing, Translation	8 Hours
Unit-5:	Expert System: Definition and Characteristics, Representing and using Domain Knowledge, Expert system shells Knowledge Engineering, Knowledge acquisition, Expert system life cycle & Expert system tools, MYCIN & DENDRAL.	8 Hours
Text Books:	Rich, E. and Knight, K., <i>Artificial Intelligence</i> , Tata McGraw Hill.	
Reference Books:	1. Cloksin, W.F., Mellish, C.S., <i>Programming In Prolog</i> , Narosa Publishing House.	

	<p>2. Janakiraman, V.S., Sarukesi, K., <i>Foundation of Artificial Intelligence & Expert System</i>, Macmillan.</p> <p>* Latest editions of all the suggested books are recommended.</p>

Course Code: ECS611	Professional Core Course-13 B.Tech (CSE) Semester VI DATA WAREHOUSING AND DATA MINING WITH R-PROGRAMMING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the various components of data warehousing.	
CO2.	Understanding the constructs and usage of R-Programming language for developers.	
CO3.	Understanding how to design the physical model of data warehouse.	
CO4.	Understanding various algorithms of Data Mining and its process.	
CO5.	Applying the programming concept to solve problems using R-Programming.	
CO6.	Analyzing the concept of data mining using R-Programming.	
Course Content:		
Unit-1:	Introduction: Motivation (for Data Mining), Data Mining-Definition & Functionalities, Data Processing, Form of Data Preprocessing, Data Cleaning: Missing Values, Noisy Data,(Binning, Clustering, Regression, Computer and Human inspection),Inconsistent Data, Data Integration and Transformation. Data Reduction:-Data Cube Aggregation, Dimensionality reduction, Data Compression, Numerosity Reduction, Clustering, Discretization and Concept hierarchy generation.	8 Hours
Unit-2:	Concept Description: Statistical measures in large Databases. Measuring Central Tendency, Measuring Dispersion of Data, Mining Association Rules in Large Databases, Association rule mining, mining Single-Dimensional Boolean Association rules from Transactional Databases– Apriori Algorithm, Mining Multilevel Association rules from Transaction Databases and Mining Multi-Dimensional Association rules from Relational Databases	8 Hours
Unit-3:	Classification and Predictions: What is Classification & Prediction, Issues regarding Classification and prediction, Decision tree, Bayesian Classification, Classification by Back propagation, Multilayer feed-forward Neural Network, Back propagation Algorithm, Classification methods KNN classifiers, Genetic Algorithm. Cluster Analysis: Data types in cluster analysis, Categories of clustering methods, Partitioning methods. Hierarchical Clustering- CURE and Chameleon. Density Based Methods-DBSCAN, OPTICS. Grid Based Methods- STING, CLIQUE. Model Based Method – Statistical Approach, Neural Network approach, Outlier Analysis.	8 Hours
Unit-4:	Overview of R programming : Introduction to R, The S Philosophy, Basic Features of R, Free Software Design of the R , System Limitations of R, R Resources, Installation and getting started with the R interface.	8 Hours

	Data Manipulation (dplyr, reshape2 packages) and Scoping Rules of R: Data Frames, The dplyr Package, dplyr Grammar, Installing the dplyr package, select(), filter(), arrange(), rename(), mutate(), group_by(), Lexical Scoping: Why Does It Matter?, Lexical vs. Dynamic Scoping	
Unit-5:	Data Warehousing: Overview, Definition, Delivery Process, Difference between Database System and Data Warehouse, Multi Dimensional Data Model, Data Cubes, Stars, Snow Flakes, Fact Constellations, Concept hierarchy, Aggregation, OLAP Servers: ROLAP, MOLAP, HOLAP, Process Architecture, 3 Tier Architecture, Data Mart.	8 Hours
<u>Text Books:</u>	1. Paul R. P., <i>Fundamentals Of Data Warehousing</i> , John Wiley and Sons.	
<u>Reference Books:</u>	1. Anahony S., <i>Data Warehousing In the Real World: A Practical Guide for Building DecisionSupport Systems</i> , John Wiley and Sons. 2. Kamber and Han, "Data Mining Concepts and Techniques", Hartcourt India P. Ltd., 3. R Programming for Data Science, by Roger D. Peng Using R for Introductory Statistics, by John Verzani, Chapman & Hall/CRC, 2004, ISBN 1584884509 Advanced R, by Hadley Wickham, ISBN 9781466586963 * Latest editions of all the suggested books are recommended.

Course Code: ECS612	Professional Core Course-14 B.Tech (CSE) Semester VI MOBILE COMMUNICATION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basic concept of mobile computing, wireless networks, structure of mobile computing based application.	
CO2.	Understanding various schemes like Fixed Assignment Schemes, Random Assignment Schemes, Reservation Based Schemes.	
CO3.	Understanding the mobile IP, Key functionality of IP, Choose the required functionality at each layer for given application.	
CO4.	Understanding the hand-off process in mobile communication	
CO5.	Analyzing solution for each functionality at each layer x Use simulator tools and design Ad hoc networks	
Course Content:		
Unit-1:	Introduction: Issues in mobile computing, Study of Electromagnetic Spectrum: Radio wave, Microwave, Infrared, Overview of wireless communication, Cellular concept, sharing of Wireless channels: FDMA, TDMA, CDMA.	8 Hours
Unit-2:	Global System for Mobile Communication (GSM): Architecture, Mobility Management, and Network signaling; General Packet Radio Services (GPRS): GPRS architecture, GPRS Network nodes	8 Hours
Unit-3:	Mobile Data Communication: WLANs (Wireless LANs); IEEE 802.11 standard; Mobile IP; Wireless Application Protocol (WAP); Mobile Internet Standards; WAP Gateway and Protocols Wireless Markup Languages (WML).	8 Hours
Unit-4:	Third Generation (3G) Mobile Services: International Mobile Telecommunications 2000 (IMT 2000) vision; Wideband Code Division Multiple Access (W-CDMA); and CDMA 2000: Quality of services in 3G.	8 Hours
Unit-5:	Wireless Local Loop (WLL): Architecture, Technologies; Global Mobile Satellite Systems; Case studies of Iridium and Global star systems; Bluetooth technology and Wi-Max.	8 Hours
Text Books:	1. Lin, Y. B. and Chlamatac, I, <i>Wireless and mobile Networks Architecture</i> , John Wiley & Sons	
Reference Books:	1. Talukdar, A. K. and Yaragal, R., <i>Mobile Computing</i> , Tata McGraw Hill. 2. Theodore, S. R., <i>Wireless Communication- Principles and Practices</i> , Pearson Education. * Latest editions of all the suggested books are recommended.

Course Code: ECS651	Laboratory Course-17 B.Tech (CSE) Semester VI ARTIFICIAL INTELLIGENCE (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the role of PROLOG for implementation of solutions of AI problems	
CO2.	Understanding the architecture and evaluation scheme of PROLOG	
CO3.	Applying the PROLOG for solving trivial problems	
CO4.	Applying the solutions for Water Jug problem, Eight Puzzle problem, Monkey Banana problem using PROLOG	
CO5.	Applying the various knowledge representation structures.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a LISP Program to solve the water-jug problem using heuristic function. 2. To create a compound objects using Turbo Prolog. 3. To write a Prolog Program to show the advantage and disadvantage of green and red cuts. 4. To write a prolog program to use of BEST-FIRST SEARCH applied to the eight puzzle problem. 5. To write a program to implementation of the problem solving strategies: Forward Chaining, Backward Chaining, and Problem Reduction. 6. To write a Lisp Program to implement the STEEPEST-ASCENT HILL CLIMBING. 7. To write a Prolog Program to implement COUNTING PROPAGATION NETWORK. 	

Course Code: ECS654	Laboratory Course-18 B.Tech (CSE) Semester VI DATA WAREHOUSING AND DATA MINING WITH R-PROGRAMMING (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding Modeling and design of data warehouse.	
CO2.	Understanding how to Install and Configure R Tool and R Studio.	
CO3.	Applying the concept to design a star and snowflake schema.	
CO4.	Analyzing R Explorer, Mining techniques and Attribute Relation File	
CO5.	Developing basic data warehouse applications along with the data visualization using R.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To develop an application to implement defining subject area, design of fact dimension table, data mart. 2. To develop an application to construct a multidimensional data. 3. To develop an application to implement data generalization and summarization technique. 4. To develop an application to extract association rule of data mining. 5. To develop an application for classification of data. 6. To develop an application for decision tree. 7. To develop an application to implement R PROGRAMMING loops. 8. To develop an application to implement structure and components of an R-Programming 	

Course Code: ECS606	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI REAL TIME OPERATING SYSTEM	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding fundamentals of IEEE standards.	
CO2.	Understanding the concept of communications among processes in RTOS.	
CO3.	Understanding the concept of CPU module and peripheral interfaces.	
CO4.	Applying the concept of Synchronization	
CO5.	Analyzing the architecture and salient features deadlock and fault tolerance.	
Course Content:		
Unit-1:	Real Time System: Concept; Priorities; Embedded Systems; Task; Classification & Requirements; Deadlines; Soft and Hard Real Time Systems.	8 Hours
Unit-2:	Real Time Operating System: Evolution, Firm Real Time Systems, Task Management, Inter Process Communication, Case Studies: Maruti II, HART OS, VRTX.	8 Hours
Unit-3:	Scheduling: Characterizing Real Time Systems and Tasks, Task Assignment, Fixed and Dynamic Priority, Unprocessed (RM and EDF), Multiprocessor (Utilization Balancing, Next-fit for RM & Bin-Packing Assignment for EDF).	8 Hours
Unit-4:	Tools: Programming Languages, Real Time Databases. Applications: Real Time Communication, FDDI, Specification and Verification using Duration Calculus, Flow Control, Protocols for Real Time (VTCMA, Window, IEEE 802.3, IEEE 802.4, IEEE 802.5, Stop and Go Protocol, Media Access Protocol)	8 Hours
Unit-5:	Fault: Concept, Classes, Fault Tolerant Real Time System, Clock; Need, Synchronization, Issues in Real Time Software Design.	8 Hours
Text Books:	1. Krishna, C.M., <i>Real Time Systems</i> , McGraw Hill.	
Reference Books:	1. Levi, S. T. and Agarwal K., <i>Real Time Systems</i> , McGraw Hill. 2. Joseph, M., <i>Real Time System: Specification, Validation & Analysis</i> , Prentice Hall of India. * Latest editions of all the suggested books are recommended.

Course Code: ECS607	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI SOFT COMPUTING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the architecture and algorithms for artificial neural network.	
CO2.	Understanding the classical and fuzzy set along with membership function.	
CO3.	Applying the learnt concept for solving the numerical problems using fuzzy operations.	
CO4.	Applying fuzzy arithmetic and approximate reasoning on fuzzy sets.	
CO5.	Developing the uncertainty and non specificity for fuzzy and crisp set.	
Course Content:		
Unit-1:	Neural Networks: History, Overview of Biological Neuro-system, Mathematical Models. Artificial Neural Networks: Architecture, Learning: Rules, Paradigms, Supervised, Unsupervised and Reinforcement Learning; Training Algorithms: Perceptions, Training rules, Back Propagation Algorithm, Multilayer Perception Model, Hopfield Networks, Associative Memories, Applications of Artificial Neural Networks.	8 Hours
Unit-2:	Fuzzy Logic: Fuzzy Logic, Classical and Fuzzy Sets, Membership Function; Fuzzy rule generation.	8 Hours
Unit-3:	Operations on Fuzzy Sets: Compliment, Intersections, Unions, Combinations of Operations, Aggregation Operations.	8 Hours
Unit-4:	Fuzzy Arithmetic: Numbers, Linguistic Variables, Arithmetic Operations on Intervals & Numbers, Lattice, Equations, Logic: Classical, Multi-valued, Propositions; Qualifiers, Linguistic Hedges.	8 Hours
Unit-5:	Uncertainty based Information: Information & Uncertainty, Non specificity of fuzzy & crisp sets, Fuzziness of Fuzzy Sets.	8 Hours
Text Books:	1. Simon, H., <i>Neural Networks</i> , Prentice Hall of India.	
Reference Books:	Kazuo, T., <i>An Introduction to Fuzzy Logic for Practical Applications</i> , Springer. * Latest editions of all the suggested books are recommended.	
Additional Electronic Reference Material:	https://www.digimat.in/nptel/courses/video/106105173/L01.html https://nptel.ac.in/noc/courses/noc19/SEM1/noc19-cs23/	

Course Code: EEEC606	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI MICROPROCESSOR & APPLICATION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding fundamentals of microprocessor 8085 and microprocessor 8086.	
CO2.	Understanding the concept of assembly language programming.	
CO3.	Understanding the concept of CPU module and peripheral interfaces.	
CO4.	Applying the concept of assembly language to solve problems.	
CO5.	Analyzing the architecture and salient features of microprocessor and microcontrollers.	
Course Content:		
Unit-1:	Introduction to Microprocessor: 8085 Evolution of Microprocessor, Register Structure, ALU, Bus Organization, Timing and Control, Instruction set. Architecture of 16-bit Microprocessors: Architecture of 8086; (Bus Interface Unit, Execution unit) Register Organization, Bus operation, Memory segmentation.	8 Hours
Unit-2:	Assembly Language Programming: Addressing Modes and instruction set of 8086, Arithmetic and Logic instructions, Program Control Instructions (jumps, conditional jumps, and subroutine call), Loop and string instructions, Assembler Directives.	8 Hours
Unit-3:	CPU Module: Signal Description of pins of 8086 and 8088, Clock generator, Address and Data bus De multiplexing, Buffering Memory Organization, Read and Write cycle Timings, Interrupt Structures, Minimum Mode and Maximum Mode Operations	8 Hours
Unit-4:	Peripheral Interfacing: Programmed I/O, Interrupt Driven, I/O, DMA, Parallel I/O, (8255-PPI, Parallel port), 8253/8254 programmable Timer/Counter Interfacing with ADC	8 Hours
Unit-5:	Peripheral Interfacing (Contd.): 8259 Programmable Interrupt controller, 8237 DMA controller Concept of Advanced 32 bit Microprocessors: Pentium Processor.	8 Hours
Text Books:	1. Gaonkar Ramesh S., <i>Microprocessor Architecture, Programming, and Applications with the 8085</i> , Pen Ram International Publishing.	
Reference Books:	1. Liu and Gibson G.A., <i>Microcomputer Systems: The 8086/8088 Family</i> , Prentice Hall (India). 2. Brey, Barry B., <i>INTEL microprocessors</i> , Prentice Hall (India). Course Code: ECS603	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI COMPUTER GRAPHICS	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the basics concepts of computer graphics	
CO2.	Understanding output primitives generating algorithms	
CO3.	Understanding 2d and 3d transformation techniques	
CO4.	Understanding the concepts of window/viewport transformation	
CO5.	Understanding the concept of computer animation	
Course Content:		
Unit-1:	Computer Graphics: Areas, Overview of Graphic systems, Graphics primitives, Video-display devices, Raster-scan and Random-scan systems, Plasma displays, LCD, Plotters, Printers, Graphics monitors, Workstations and devices, Input techniques.	8 Hours
Unit-2:	Output Primitives: Points and lines, Line drawing algorithms, Circle and Ellipse algorithms. Filled Area Primitives: Scan line polygon fill algorithm, Boundary-fill and Flood-fill algorithms.	8 Hours
Unit-3:	2-D Geometrical Transforms: Translation, Scaling, Rotation, Reflection and Shear, Matrix representations and Homogeneous coordinates, Composite transforms, Transformations between coordinate systems. 2-D Viewing: The viewing pipeline, viewing coordinate reference frame, Window to view-port coordinate transformation, Viewing functions, Cohen-Sutherland and Cyrus-Beck line clipping algorithms, Sutherland-Hodgeman polygon clipping algorithm.	8 Hours
Unit-4:	3-D Object Representation: Polygon surfaces, Quadric Surfaces, Spline representation, Hermit curve, Bezier curve and B-Spline curves, Bezier and B-Spline surfaces, Basic illumination models, polygon-rendering methods. 3-D Geometric Transformations: Translation, Rotation, Scaling, Reflection and shear transformations, Composite transformations, 3-D viewing, Viewing pipeline, Viewing coordinates, View volume, General projection transforms and clipping.	8 Hours
Unit-5:	Visible Surface Detection Methods: Classification, Back-face detection, Depth buffer, Scan-line, Depth sorting, BSP-tree methods, Area sub-division and Octree methods. Computer Animation: Design of animation sequence, general computer animation functions, Raster animation, Computer animation languages, Key frame systems, Motion specifications.	8 Hours
Text Books:	1. Hearn, D. and Pauline, B. M., <i>Computer Graphics C Version</i> , Pearson Education.	
Reference Books:	1. Zhigand, X., Roy, P., <i>Computer Graphics</i> , Tata McGraw Hill. 2. Rogers, D. F., <i>Procedural Elements for Computer Graphics</i> , McGraw

<u>Additional Electronic Reference Material:</u>	<p>https://nptel.ac.in/courses/106/106/106106090/</p> <p>https://nptel.ac.in/courses/106/102/106102065/</p>	

Course Code: ECS610	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI CYBER LAW & INFORMATION SECURITY	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of the information system architecture and the involved components.	
CO2.	Understanding of the basic principles of Information Security, Online payment systems and related security issues along with the rules of E Governance.	
CO3.	Applying and regulating Cyber Laws dealing with Cyber Ethics by implementation of Intellectual Property Right in the areas of Copyright, Patent, Piracy and Plagiarism.	
CO4.	Analyzing the security of Cryptographic System and design and implementation issues related with Firewalls, Virtual Private Networks and Intrusion Detection Systems.	
CO5.	Analyzing the need of physical security in Information System, need of Biometric Security System and related challenges.	
Course Content:		
Unit-1:	Information Security, Evolution of Information Security; Basics Principles of Information Security; Critical Concepts of Information Security; Components of the Information System, Information Classification and their Roles, Information System Threats and attacks, The system Development Life cycle, Security Challenges in Mobile Devices.	8 Hours
Unit-2:	Risk Management : Definition of risk management, risk identification, and risk control, Identifying and Accessing Risk, Assessing risk based on probability of occurrence and likely impact, the fundamental aspects of documenting risk via the process of risk assessment, the various risk mitigation strategy options, the categories that can be used to classify controls.	8 Hours
Unit-3:	Physical Security: Needs, Disaster and Controls, Basic Tenets of Physical Security and physical Entry Controls. Access Control- Biometrics, Factors in Biometrics Systems, Benefits, and Criteria for selection of Biometrics, Design Issues in Biometric Systems.	8 Hours
Unit-4:	Model of Cryptographic Systems, Issues in Documents Security, System of Keys, Public Key Cryptography, Digital Signature, Requirement of Digital Signature System, Firewalls, Network Security: Basic Concepts, Dimensions, Perimeter for Network Protection, Network Attacks, Need of Intrusion Monitoring and Detection, Intrusion Detection. Virtual Private Networks: Need, Use of Tunneling with VPN, Authentication Mechanisms, Types of VPNs and their Usage, Security Concerns in VPN.	8 Hours

Unit-5:	Laws, Investigation and Ethics: Cyber Crime, Information Security and Law, Types & Overview of Cyber Crimes, Cyber Law Issues in E-Business Management, Overview of Indian IT Act, Ethical Issues in Intellectual property rights, Copy Right, Patents, Data privacy and Protection, Domain Name, Software piracy, Plagiarism, Ethical hacking.	8 Hours
<u>Text Books:</u>	1. Godbole, “Information Systems Security”, Willey	
<u>Reference Books:</u>	1. Yadav, “Foundations of Information Technology”, New Age, Delhi 2. Schou, Shoemaker, “Information Assurance for the Enterprise”, Tata McGraw Hill 3. Sood, “Cyber Laws Simplified”, McGraw Hill *Latest editions of all the suggested books are recommended.	
<u>Additional Electronic Reference Material:</u>	https://nptel.ac.in/courses/106/106/106106129/ https://www.youtube.com/watch?v=BvWvFAS1iP0	

Course Code: ECS614	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI MULTIMEDIA AND ANIMATION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding multimedia, it's applications, supporting hardware and hardware tools which provide basic information about multimedia	
CO2.	Applying various tools on image and video standards using JPEG, MPEG, MHEG along with color models and multimedia monitor bitmaps to properly represent a multimedia application.	
CO3.	Applying the multimedia drawing tools and techniques with the effect of animation using multi layer concepts supported by flash incorporating text, audio, video and graphics.	
CO4.	Applying the different compression approaches like lossy and lossless with the specifications of sampling variables associated with digital audio	
CO5.	Analyzing the basic information about the phase performing planning and production of a multimedia application using it's objects like text, sound and their specifications like MIDI with proper capturing.	
Course Content:		
Unit-1:	Multimedia: History, Objects, Scope in Business and Work, Production and Planning of Multimedia applications, Hardware, Memory and Storage devices, Communication devices, Software, Tools: Presentation and Object generation, Video, Sound, Image capturing, Authoring, Card and Page based authoring.	8 Hours
Unit-2:	Production and Planning: Multimedia building blocks, Text, Sound (MIDI), Digital Audio File Formats, MIDI under windows environment, Audio and Video capture.	8 Hours
Unit-3:	Multimedia Techniques: Basic drawing, Advance animations, Macromedia products, Creating multilayer, Combining interactivity and multiple scenes, Creating transparency effects using text in Flash, Flash animation.	8 Hours
Unit-4:	Digital Audio: Concepts, Sampling variables, Compression of sound: Loss-Less, Lossy and silence compressions.	8 Hours
Unit-5:	Representation and Compression: Multimedia monitor bitmaps, Vector drawing, Lossy graphic compression, Colors, Image file formatted animations image standards: JPEG compression, Video representation, Video compression, MPEG standards, MHEG standards; Multimedia Applications, Planning and Costing proposal preparation, and Financing, Case study of a typical industry.	8 Hours
Text Books:	1. Andreas H., <i>Multimedia Basics</i> , Firewall Media.	
Reference Books:	1. Agarwal R. and Tiwari B.B., <i>Multimedia Systems</i> , Excel Books. 2. Rosch W. L., <i>Multimedia Bible</i> , Sams Publishing. 3. Ken M.,Croteau J., <i>Flash 4 Web Special Effects, Animation And Design Handbook</i> , Dreamtech. 4. Villamil-Casanova J., Molina L., <i>Multimedia-Production, Planning And Delivery</i> , Pearson Education. * Latest editions of all the suggested books are recommended.

--	--	--

Course Code: ECS613	Professional Elective Courses (PEC)-II B.Tech (CSE) Semester VI COMPILER DESIGN AND CONSTRUCTION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the structure along with the lexical and syntactic analysis phase of a compiler.	
CO2.	Understanding various parsing techniques.	
CO3.	Understanding the intermediate code paradigms and apply them for solving various translation schemes.	
CO4.	Applying the various code optimization techniques and study code generation.	
CO5.	Analyzing the memory allocation schemes and the error detection on phases of compilation.	
Course Content:		
Unit-1:	Compiler Structure: Compilers and Translators, Phases, Pass Structure, Bootstrapping. Programming Languages: High level languages, Lexical and syntactic structure, Data elements, Data Structure, Operations, Assignments, Program unit, Data Environments, Parameter Transmission. Lexical Analysis: Lexical Analyzer, Role, Design Approach, Implementation, LEX Capabilities. Regular Expressions: Transition Diagrams, Finite state Machines. Syntactic Specifications of Programming Languages: CFG, Derivation, Parse tree, Ambiguity, Capabilities.	8 Hours
Unit-2:	Parsing Techniques: Bottom-Up, Shift-Reduce, Operator Precedence, Top-Down with backtracking, Recursive Descent, Predictive, LR (SLR, Canonical LR, LALR), Syntax Analyzer Generator, YACC.	8 Hours
Unit-3:	Intermediate Code Generation: Forms, Three Address Code, Quadruples & Triples, Syntax Directed translation mechanism and attributed definition, Translation of Declaration, Assignment, Control flow, Boolean expression, Array References in arithmetic expressions, Procedure Calls, Case Statements, Postfix Translation.	8 Hours
Unit-4:	Run Time Memory Management: Static and Dynamic storage allocation, Stack based memory allocation schemes, Symbol Table management. Error: Semantic, Detection and Recovery for Lexical Phase, Syntactic phase.	8 Hours
Unit-5:	Code Optimization and Code Generation: Local Optimization, Loop Optimization, Peephole Optimization, Basic blocks and flow graphs, DAG (Directed Acyclic Graph), Data flow analyzer, Machine Model, Order of evaluation, Register allocation and code selection.	8 Hours
Text Books:	1. Alfred, V.A., Ullman, J.D., <i>Principles of Compiler Design</i> , Narosa Publishing House.	
Reference Books:	1. Holub, H.C., <i>Compiler Design in C</i> , Prentice Hall. 2. Apple, A.W., <i>Modern Compiler Implementation in C: Basic Design</i> , Cambridge press.	

	* Latest editions of all the suggested books are recommended.	
Additional Electronic Reference Material:	https://nptel.ac.in/courses/106/108/106108052/ https://nptel.ac.in/courses/128/106/128106009/	

Course Code: ECS692	Project / Industrial Training/ Seminar-3 B.Tech (CSE) Semester VI Seminar (Field Project)	L-0 T-0 P-0 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the format of report writing.	
CO2.	Understanding knowledge to write seminar report in own words.	
CO3.	Understanding the contents which has to be added into the report.	
CO4.	Applying the knowledge to write a survey/review research paper.	
CO5.	Applying content writing and papers writing.	
	Selection of topic:	
	<p>All students pursuing B.Tech. Shall submit the proposed topic of the seminar (Field Project) in the first week of the semester to the course coordinator. Care should be taken that the topic selected does not directly relate to the subject of the courses being pursued. The course coordinator shall then forward the list to the concerned Seminar Committee. The topics will then be allocated to the students along with the name of the faculty guide.</p> <p>Preparation of the seminar</p> <ol style="list-style-type: none"> 1. The student shall meet the guide for the necessary guidance for the seminar (field project) work. 2. During the next two to four weeks the student should read the primary literature germane to the seminar topic. Reading selection should continuously be informed to the guide. 3. After necessary collection of data and literature survey, the students must prepare a report. The report shall be arranged in the sequence consisting of the following:- 	

	a. Top Sheet of transparent plastic. b. Top cover. c. Preliminary pages. (i) Title page (ii) Certification page. (iii) Acknowledgment. (iv) Abstract. (v) Table of Content. (vi) List of Figures and Tables. d. Chapters (Main Material). e. Appendices, If any. f. Bibliography/ References. g. Back Cover (Blank sheet). h. Back Sheet of Plastic (May be opaque or transparent).	
--	--	--

For Guide

If you choose not to sign the acceptance certificate , please indicate reasons for the same from amongst those given below:

- i) The amount of time and effort put in by the student is not sufficient;
- ii) The amount of work put in by the student is not adequate
- iii) The report does not represent the actual work that was done / expected to be done;
- iii) Any other objection (Please elaborate)

General points for the seminar

1. The report should be typed on A4 sheet. The Paper should be of 70-90 GSM.
2. Each page should have minimum margins as under

- a. Left 1.5 inches
- b. Right 0.5 Inches
- c. Top 1 Inch
- d. Bottom 1 Inch (Excluding Footer, If any)

3. The printing should be only on one side of the paper

4. The font for normal text should Times New Roman, 12 size for text and 14 size for heading and should be typed in double space. The references may be printed in Italics or in a different font.

5. The Total Report should not exceed 30 pages including top cover and blank pages.

6. One copy completed in all respect as given above is to be submitted to the guide. That will be kept in departmental/University Library.

7. The power point presentation should not exceed 15 minutes which include 5 minutes for discussion/Viva.

Seminar will be evaluated out of total 100 marks. In Internal Evaluation marks will be awarded out of 50 and in external evaluation also marks will be awarded out of 50 on the basis of viva voce. Internal evaluation will be exercised by the Internal Evaluation Committee of college.

Course Code: EHM601	Humanities and Social Sciences including Management courses-5 B.Tech (CSE) Semester VI ENTREPRENEURSHIP	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Understanding the meaning and concepts of Entrepreneurship	
CO2.	Understanding and applying the concepts and theories of motivation Analyzing different facet and forms of business	
CO3.	Understand, apply and evaluate different financing options	
CO4.	Understanding the government support policies and its applications	
CO5.	Understanding and applying remedies to sick businesses	
Course Content:		
Unit-1:	Entrepreneurship: Entrepreneur – Types of Entrepreneurs – Difference between Entrepreneur and Intrapreneur, Entrepreneurship in Economic Growth, Factors Affecting Entrepreneurial Growth.	8 Hours
Unit-2:	Entrepreneurial Motivation: Major Motives Influencing an Entrepreneur, Achievement Motivation Training, Self-Rating, Business Games, Thematic Apperception Test, Stress Management, Entrepreneurial Competency & Entrepreneurship Development Programs – Need, Objectives.	8 Hours
Unit-3:	Business: Small Enterprises – Definition, Classification – Characteristics, Ownership Structures – Project Formulation – Steps involved in setting up a Business – identifying, selecting a Good Business opportunity, Market Survey and Research, Techno Economic Feasibility Assessment – Preparation of Preliminary Project Reports – Project Appraisal – Sources of Information – Classification of Needs and Agencies.	8 Hours
Unit-4:	Financing and Accounting: Need – Sources of Finance, Term Loans, Capital Structure, Financial Institution, and Management of working Capital, Costing, Break Even Analysis, and Taxation – Income Tax, GST.	8 Hours
Unit-5:	Support to Entrepreneurs: Sickness in small Business – Concept, Magnitude, Causes and Consequences, Corrective Measures – Business Incubators-Government Policy for Small Scale Enterprises – Growth Strategies in small industry – Expansion, Diversification, Joint Venture,	8 Hours

	Merger and Sub Contracting.

Evaluation Scheme:

Internal Evaluation	External Evaluation	Total Marks
40 Marks	60 Marks	100
<p>The Internal Evaluation will be performed by the internal faculty on the basis of the following:</p> <ul style="list-style-type: none"> • 3 Class Tests (CTs) among which the score of Best 2 will be selected - 20 marks • Project followed by Viva-Voce - 10 marks • Attendance - 10 marks 	<p>External Evaluation will be performed on the basis of the following:</p> <ul style="list-style-type: none"> • External Theoretical Exam - 60 marks 	

Course Code: TGC602	Skill Enhancement Course – 5 B.Tech – Semester –VI Workplace Management for Engineers	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Communicating effectively in a variety of public and interpersonal settings.	
CO2.	Applying concepts of change management for growth and development by understanding inertia of change and mastering the Law of Change.	
CO3.	Analyzing scenarios, synthesizing alternatives and thinking critically to negotiate, resolve conflicts and develop cordial interpersonal relationships.	
CO4.	Functioning in a team and enabling other people to act while encouraging growth and creating mutual respect and trust.	
CO5.	Handling difficult situations with grace, style, and professionalism.	
Course Content:		
Unit-1:	Intrapersonal Skills: Importance of Flexibility for Effectiveness Creativity and Innovation Understanding self and others (Johari window) Stress Management Managing Change for competitive success Handling feedback and criticism	8Hours
Unit-2:	Interpersonal Skills: Conflict management Development of cordial interpersonal relations at all levels Negotiation in Engineering Projects Importance of working in teams in modern organizations Manners, etiquette and netiquette	12Hours
Unit-3:	Selections Process Practice: Job Seeking Group discussion (GD)- Practice Personal Interview- Practice	10Hours

B. Tech (TGC607)	<p align="center">Skill Enhancement Course (SEC)-6</p> <p align="center">B.Tech Sem-VI</p> <p align="center">Advance Algebra and Geometry</p>	<p>L-0 T-0 P-2 C-1</p>
Course Outcomes:	On completion of the course, the students will be:	
CO1.	Recognizing the rules of Crypt-arithmetic and relate them to find out the solutions.	
CO2.	Illustrating the different concepts of Height and Distance and Functions.	
CO3.	Employing the concept of higher-level reasoning in Clocks, Calendars and Puzzle Problems.	
CO4.	Correlating the various arithmetic and reasoning concepts in checking sufficiency of data.	
Course Content:		
Unit-1:	Clocks and calendars Introduction, Angle based, faulty Clock, Interchange of hands, Introduction of Calendars, Leap Year, Ordinary Year	5 Hours
Unit-2:	Set theory Introduction, Venn Diagrams basics, Venn Diagram – 3 sets, 4-Group Venn Diagrams	4 Hours
Unit-3:	Heights and Distance Basic concept, Word problems	3 Hours
Unit-4:	Functions Introduction to Functions, Even and Odd Functions, Recursive	3 Hours
Unit-5:	Problem Solving Introduction, Puzzle based on 3 variables, Puzzle based on 4 variables	6 Hours
Unit-6:	Data Sufficiency Introduction, Blood relation based, direction based, ranking based	5 Hours
Unit-7:	Crypt Arithmetic Introduction of Crypt Arithmetic, Mathematical operations using Crypt Arithmetic, Company Specific Pattern	4 Hours

Course Code: EGP611	DGP-6 B.Tech (CSE) Semester VI DISCIPLINE & GENERAL PROFICIENCY	L-0 T-0 P-0 C-0
Course Outcomes:	On completion of the course, the students will be :	
CO1.	<i>Understanding</i> the social responsibilities toward the institute and humanity.	
CO2.	<i>Understanding</i> the need of participations in different events to groom the personality.	
CO3.	<i>Understanding</i> the discipline and follow them during academics and institutional activities.	
CO4	<i>Understanding</i> Social awareness towards society.	
CO5.	<i>Applying</i> actively towards various institution activities like workshop, seminar and other events	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<ol style="list-style-type: none"> 1. Observance of dress code. 2. Participation in Conferences /Workshops / Seminars. 3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time. 4. Participation in community projects including NSS. 5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time. 6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel. 7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level. 8. General behavior 9. Any extraordinary achievement. <p>The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).</p>	

Head of Department would be display GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o	Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement
			(5)	(15)	(20)	(10)	(20)	(20)	(5)	(5)
Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: ECSCC601	Co-Curricular Activity-III Semester-VI CCA-1II	L-0 T-0 P-2 C-1
For the Co-Curricular Activity TMU has assigned different activities under TMU STUDENT SOCIETIES (TSS) to various colleges with following details:		
S.N.	Society Name	College / Dept. Name
39.	THEATRE	College of Pharmacy
40.	DRAWING AND PAINTING	College of Fine Arts
41.	DEBATING	Faculty of Education
42.	CULTURE AND HERITAGE (VIRASAT)	TM Medical & Research Centre
43.	READING AND WRITING	CTLD
44.	MEDIA	Media Cell
45.	PHOTOGRAPHY	College of Law & Legal Studies
46.	FITNESS	College of Physical Education
47.	FASHION	TMIMT
48.	ENVIRONMENT	TM Dental & Research Centre
49.	SINGING	Faculty of Engineering
50.	DANCING	CCSIT
51.	SPORTS	TM College of Physical Education
52.	QUIZ	College of Nursing
53.	VIDEOGRAPHY	College of Law & Legal Studies
54.	ARTS	College of Fine Arts
55.	ROAD SAFETY	Dean Students' Welfare

56.	MUSIC	College of Paramedical
57.	POETRY	Faculty of Education

TMU STUDENT SOCIETIES (TSS)

13.General Rules & Regulations

- a. The societies are student driven and faculty works as advisor only.
- b. The annual society membership fee is Rs.200/- per student per club.
- c. All societies are mentored and monitored by the DSW office under the guidance of Hon'ble Vice-Chancellor.
- d. Any regular student is eligible to be the office bearer (General Secretary/Treasurer/member) after completing one year of regular studies at TMU.
- e. If extraordinary budget is required to conduct the activities of the concern society, then proposal may be submitted from the faculty advisor to the DSW office.
- f. The consumable used in any activity(s) of the society shall be borne by the student(s).
- g. The schedule of the activities of the society shall be as per the academic calendar of the respective semester.
- h. The advisor may increase the no. of co-advisors (in consultation with DSW) as per requirement, ideally there shall be one co-advisor on every 50 (fifty) students.

14.Announcements and constitutions

- a. The society activities are planned and executed after the due approval of faculty advisor and DSW.
- b. The composition of each society is- faculty Advisor(one), faculty co-advisors(two), student General Secretary (one), student treasure (one) and student member (one).
- c. The general secretary of the society notifies all activities in coordination with faculty advisor.

15.Registration

- a. Society membership forms are notified from the DSW office in the beginning of each academic session for Odd& Even semester separately.
- b. Every UG student of TMU have to choose three societies (maximum one in a semester) for membership as per their interest during the entire program.

16.Activities

- a. The activities shall be decided and notified at least 15 days prior from the beginning of the semester by the faculty advisor in the consultation with other office bearers of the respective society.

17.Evaluation

- a. There shall be one credit (100 marks) for activities of each society in a semester.
- b. There will be five parameters (20 marks each) on which each student will be evaluated.
- c. The evaluation methodology and parameters shall be decided and notified by the faculty advisor in the consultation with the office bearers of the respective society in the beginning of the semester.
- d. The passing marks shall as per the ordinance of the respective programme.
- e. The awards shall be submitted to the university examination division before the start of the end semester examination of the respective semester.
- f. The awards shall be submitted by the faculty advisor with the signature of at least one co-advisor of the respective society.

18.Certification

- a. To earn the degree minimum two credits are required.
- b. The separate certificates shall be issued from the university examination division on the following eight-point scale-

Percentage of marks obtained	Letter Grade	Grade Point	Performance
90.00-100.00	A+	10	Outstanding
80.00-89.00	A	9	Excellent
70.00-79.99	B+	8	Very Good
60.00-69.99	B	7	Good
55.00-59.99	C	6	Fair
50.00-54.99	D	5	Average
45.00-49.99	E	4	Pass
Less than 45	F	0	Fail

Course Code: ECS701	Professional Core Course-15 B.Tech (CSE) Semester VII WEB-TECHNOLOGY (DESIGN & ARCHITECTURE USING .NET)	L-3 T-1 P-0 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding basic components of a Web Technology (Design And Architecture Using .NET).	
CO2.	Understanding various categories of programs, Web, Window and Console Application. Organize and work with many projects.	
CO3.	Applying skills and concepts to built small real life applications using Web Technology (Design And Architecture Using .NET) standards.	
CO4.	Analyzing the usage of the Web Technology (Design And Architecture Using .NET) programs to create professional, academic, business and many software projects.	
CO5.	Developing personal, academic and business documents by following the current professional and/or industry standards.	
Course Content:		
Unit-1:	Basics of Web-Technology: Web Pages; HTML; Designing static HTML Pages using tags: Textbox, Button, Radio Button, Check Box, Text Area, Image, Links, Anchors, Table, Lists, Dropdown List; Form Submission using Get and Post Methods; JavaScript: Adding JavaScript to static HTML pages; Publishing a website.	8 Hours
Unit-2:	Architecture of the .Net Framework Development Platform: Compiling Source Code into Managed Modules; Parts of a Managed Module: PE Header, CLR Header, Metadata, Intermediate Language (IL), Combining Managed Modules into Assemblies Loading the CLR; Executing the Assembly Code; The .Net Framework: Class Library, Common Type System, Common Language Specifications, Building, Packaging, Deploying, and Administering Applications and Types.	8 Hours
Unit-3:	Visual Studio .Net: Installing .Net Framework (2.0, 3.0 &4) and the Visual Studio .NET IDE. ASP .Net: Web Forms; Applications; Application Configurations; Server Controls: Using standard controls, Using Rich Controls, Using Validation Controls, Data Bound Controls, Data Source Controls.	8 Hours
Unit-4:	Designing ASP .Net Websites: Using Standard Controls on Master Pages; Designing Websites with Themes; Creating Custom Controls; ADO .Net, Connected vs. Disconnected Data Access;	8 Hours
Unit-5:	Site Navigation: Navigation Control; Site Maps. Security Mechanism: Login Controls; Session Management; Localization and Globalization of yoursite; designing a Sample e-mail web application: Using Master Page, Standard Controls, JavaScript, AJAX; Cookies and Sessions; Uploading files and Data Bound Controls such as Grid View and	8 Hours

	Repeaters.	
<u>Text Books:</u>	1. Hejsberg, A. and Wiltamuth, S., <i>C# Developers Guide</i> , Addison-Wesley. .

Course Code: ECS703	Professional Core Course-16 B.Tech (CSE) Semester VII CRYPTOGRAPHY AND NETWORK SECURITY	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding vulnerability and the weaknesses of unsecured network	
CO2.	Understanding information security goals, classical encryption techniques and acquire fundamental knowledge on the concepts of network security.	
CO3.	Applying different encryption and decryption techniques to solve problems related to confidentiality and authentication	
CO4.	Analyzing the performance of different encryption algorithms for verifying the integrity of varying message sizes.	
CO5.	Analyzing different digital signature algorithms to achieve authentication and create secure applications	
CO6.	Developing a secure network system using cryptographic utilities and authentication mechanisms.	
Course Content:		
Unit-1:	Network Security: Attacks; Services & Mechanisms; Conventional Encryption: Classical Encryption Techniques, Model and Steganography.	8 Hours
Unit-2:	Encryption Schemes: DES: Standard, Strength; Block Cipher Design Principles; Block Cipher Modes of Operation: Triples DES; Placement & Encryption Function: Key Distribution, Random Number Generation, Placement of Encryption Function.	8 Hours
Unit-3:	Public-Key Cryptography: Principles; RSA Algorithm; Key Management; Fermat's & Euler's Theorems; Primarily Miller Test; Chinese Remainder Theorem.	8 Hours
Unit-4:	Message Authentication & Hash Functions: Authentication: Requirements, Protocol, Functions, Message Authentication Codes, Hash Functions, Birthday Attacks, Security Of Hash Function & MACS, MD5 Message Digest Algorithm, Secure Hash Algorithm (SHA). Digital Signatures: Digital Signature Standard (DSS), Proof of Digital Signature Algorithm.	8 Hours
Unit-5:	IP Security: Electronic Mail Security, Pretty Good Privacy (PGP), S/MIME, Authentication Header, Encapsulating Security Payloads, Combining Security Associations; Key Management. Web Security: Secure Socket Layer & Transport Layer Security, Secure Electronic Transaction (Set) System Security: Intruders; Viruses; Firewall Design Principles; Trusted Systems.	8 Hours
Text Books:	1. Stallings, W., <i>Cryptography and Network Security: Principles and Practice</i> , Prentice Hall.	
Reference Books:	Johannes, A. B., <i>Introduction to Cryptography</i> , Springer. * Latest editions of all the suggested books are recommended.

----------------------------	---	--

Course Code: ECS709	Professional Core Course-17 B.Tech (CSE) Semester VII CLOUD COMPUTING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the Cloud Computing and its role in current scenario.	
CO2.	Understanding the different models of Cloud Computing and their limitations	
CO3.	Understanding the importance of Cloud services and economic factors related to them	
CO4.	Analyzing various risk factors involved in Cloud Computing and to tackle them using risk management techniques	
CO5.	Evaluating the virtual data centre architecture, governance strategy, security mechanism and contingency plans.	
Course Content:		
Unit-1:	Fundamentals: Cloud Computing definition, Essential characteristics, principals, Usage, private, public and hybrid cloud. Cloud types; IaaS, PaaS, SaaS. Benefits and challenges of cloud computing, role of virtualization in enabling the cloud; Business Agility: Benefits and challenges to Cloud architecture. Application availability, performance, security and disaster recovery	8 Hours
Unit-2:	Cloud Storage, Security and Design: Virtualized Data Center Architecture, concept, planning and design, disaster recovery principles, Managing VDC environments and infrastructures, Storage strategy and governance; security and regulations, Designing secure solutions, Securing storage in virtualized and cloud environments, Monitoring and management; security auditing and SIEM.	8 Hours
Unit-3:	Cloud Services and Economics: Introduction to cloud services, Reliability, availability and security of services deployed, performance and scalability of services, tools and technologies used to manage cloud services deployment; Cloud Economics : Availability of infrastructure, choosing a Cloud platform for an organization, application requirements, economic constraints & business needs,	8 Hours
Unit-4:	Governance and Enterprise Risk Management: Information security governance processes, Governance and enterprise risk management in Cloud Computing, Governance Recommendations, Enterprise Risk Management Recommendations, Information Risk Management Recommendations and Third Party Management Recommendations	8 Hours
Unit-5:	Storage Network Design: Architecture of storage, analysis and planning. Storage network design considerations; NAS and FC SANs, hybrid storage networking technologies (iSCSI, FCIP, FCoE), design for storage virtualization in cloud computing, host system design considerations.	8 Hours
Text Books:	1. David, E.Y. Sarna, Implementing and Developing Cloud

Course Code: ECS751	Laboratory Course-19 B.Tech (CSE) Semester VII WEB TECHNOLOGY(DESIGN AND ARCHITECTURE USING .NET) (LAB)	L-0 T-0 P-4 C-2
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding basic components of a Web Technology (Design And Architecture Using .NET).	
CO2.	Understanding various categories of programs, Web, Window and Console Application. Organize and work with many projects.	
CO3.	Applying skills and concepts to built small real life applications using Web Technology (Design And Architecture Using .NET) standards.	
CO4.	Analyzing the usage of the Web Technology (Design And Architecture Using .NET) programs to create professional, academic, business and many software projects.	
CO5.	Developing personal, academic and business documents by following the current professional and/or industry standards.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write HTML/Java scripts to display your CV in Web Browser. 2. To Create and annotate of static web pages using any HTML editor. 3. To write a program to use XML and JavaScript for creation of your homepage. 4. To write a program in XML for creation of DTD which specifies a particular set of rules? 5. To create a Style sheet in CSS/XSL and display the document in Web Browser. 6. To write a Java Servlet for HTTP Proxy Server. 7. To write a program to use JSP pages for sharing session and application data of HTTP Server. 8. To write a program to use JDBC connectivity program for maintaining database by sending queries. 	

Course Code: ECS752	Laboratory Course-20 B.Tech (CSE) Semester VII CRYPTOGRAPHY AND NETWORK SECURITY (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Applying the knowledge of symmetric cryptography to implement simple ciphers.	
CO2.	Applying the concept to implement public key algorithms like RSA.	
CO3.	Applying symmetric cryptography and asymmetric cryptography tools like Diffie Hellman algorithm and Digital Signature to check the integrity of varying message sizes.	
CO4.	Analyzing performance of hashing algorithms.	
CO5.	Analyzing the different network reconnaissance tools to gather information about networks	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. To write a program in C to implement Caesar cipher. 2. To write a program in C to implement "Vigenere Cipher" technique. 3. To write a program in C to implement Extended Euclid Algorithm. 4. To write a program in C to implement Chinese remainder theorem. 5. To write a program in C to implement Diffie Hellman algorithm 6. To write a program in C to implement Play-fair Cipher. 7. To write a program in C to implement RSA algorithm. 8. To configure a mail agent to Digital Signature and send a mail and verify the correctness of this system. 9. To configure the Windows Firewall feature in Windows XP Service Pack 2. 	

Course Code: ECS713	Professional Elective Courses (PEC)-III B.Tech (CSE) Semester VII DATA COMPRESSION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concept of loss less and lossy data compression techniques.	
CO2.	Understanding the methods of loss less image compression, text compression, and audio compression.	
CO3.	Understanding statistical basis and performance metrics for lossless as well as lossy compression	
CO4.	Analyzing the operation of a range of commonly used Compression techniques	
CO5.	Applying loss less and lossy data compression techniques in real-world applications.	
Course Content:		
Unit-1:	Introduction Compression Techniques: Loss less compression, Lossy Compression, Measures of performance, Modeling and coding, Mathematical Preliminaries for Lossless compression: A brief introduction to information theory, Models: Physical models, Probability models, Markov models, composite source model, Coding: uniquely decodable codes, Prefix codes.	8 Hours
Unit-2:	Huffman coding The Huffman coding algorithm: Minimum variance Huffman codes, Adaptive Huffman coding: Update procedure, Encoding procedure, Decoding procedure. Golomb codes, Rice codes, Tunstall codes, Applications of Hoffman coding: Loss less image compression, Text compression, Audio Compression.	8 Hours
Unit-3:	Arithmetic Coding a sequence, Generating a binary code, Comparison of Binary and Huffman coding, Applications: Bi-level image compression- The JBIG standard, JBIG2, Image compression. Dictionary Techniques: Introduction, Static Dictionary: Diagram Coding Adaptive Dictionary. The LZ77 Approach, The LZ78 Approach, Applications: File Compression-UNIX compress, Image Compression: The Graphics Interchange Format (GIF), Compression over Modems: V.42 bits, Predictive Coding: Prediction with Partial match (ppm): The basic	8 Hours

	algorithm, The ESCAPE SYMBOL, length of context, The Exclusion Principle, The BurrowsWheeler Transform: Move-to-front coding, CALIC, JPEG-LS, Multi-resolution Approaches, Facsimile Encoding, Dynamic Markov Compression.	
Unit-4:	Mathematical Preliminaries for Lossy Coding Distortion criteria, Models, Scalar Quantization: The Quantization problem, Uniform Quantizer, Adaptive Quantization, Non uniform Quantization.	8 Hours
Unit-5:	Vector Quantization Advantages of Vector Quantization over Scalar Quantization, The Linde-BuzoGray Algorithm, Tree structured Vector Quantizer. Structured VectorQuantizer.	8 Hours

Course Code: ECS716	Professional Elective Courses (PEC)-III B.Tech (CSE) Semester VII DIGITAL IMAGE PROCESSING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the different types of image transforms and their properties	
CO2.	Understanding the different techniques employed for the enhancement of images	
CO3.	Understanding the concept of image restoration & degradation models.	
CO4.	Understanding various image compression and color models like RGB, CMY.	
CO5.	Analyzing various image segmentation techniques to segment the digital image into sub-images.	
Course Content:		
Unit-1:	Digital Image Fundamentals: Representation; Elements of visual perception; Simple image formation model; Image sampling and quantization; Basic relationships between pixels; Imaging geometry; Review of matrix theory results: Row and Column ordering, Toeplitz, Circulant and Block matrices; Review of image transforms: 2D-DFT, FFT, WALSH, HADAMARD, HAAR, DCT and wavelet transforms	8 Hours
Unit-2:	Image Enhancement: Spatial domain methods: Point processing, Intensity transformations, histogram processing; Image subtraction and averaging; Spatial filtering: Smoothing, Sharpening, Frequency domain methods; Filtering: Low pass, High pass filtering, Homomorphic filtering; Generation of spatial masks from frequency domain specifications.	8 Hours
Unit-3:	Image Restoration: Degradation model; Diagonalization of circulant and block Circulant matrices; Algebraic approaches: Inverse filtering, Wiener filtering, Constrained least squares restoration, Interactive restoration, Geometric transformations; Fundamentals of color image processing: Color models; RGB, CMY, YIQ, HIS; pseudo color image processing, intensity slicing, Gray level to color transformation.	8 Hours
Unit-4:	Image Compression: Redundancy: Coding, Inter Pixel, Psycho Visual; Fidelity criteria; Models; Elements of information theory; Error free compression: Variable length, Bit plane, Lossless predictive, Lossy compression, Lossy predictive, Transform coding. JPEG, MPEG, fractals.	8 Hours

Unit-5:	Image Segmentation: Detection of discontinuities: Point, Line and Edge and Combined detection; Edge linking and Boundary description; Local and global processing using HOUGH transform; Thresholding; Region oriented segmentation: Basic formulation, Region growing by pixel aggregation, Region splitting and merging; Use of motion in segmentation; Representation and description.	8 Hours
<u>Text Books:</u>	1. Gonzalez R. C., Woods R. E., <i>Digital Image Processing</i> , Pearson Education.	
<u>Reference Books:</u>	1. Pratt W. K., <i>Digital Image Processing</i> , John Wiley and Sons. 2. Boyle R., Sonka M., Hlavac V., <i>Image Processing, Analysis And Machine Vision</i> , Vikas Publishing House. * Latest editions of all the suggested books are recommended.

<u>Course Code:</u> ECS717	Professional Elective Courses (PEC)-III B.Tech (CSE) Semester VII Android Programming	L-3 T-0 P-0 C-3
<u>Course Outcomes:</u>	On completion of the course, the students will be :	
CO1.	Understanding the android framework	
CO2.	Understanding the various application components	
CO3.	Understanding view and viewgroup objects	
CO4.	Understanding custom views	
CO5.	Understanding different classes and interfaces which deals with database	
CO6.	Developing small android applications related to specific domain	
<u>Course Content:</u>		
Unit-1:	Overview: What is Android, Features of Android, Setting up Android Environment, Android Architecture, Application Framework. Application components (activities, services, Broadcast receivers, content providers). First sample application, Anatomy of Android application, Main activity file, Manifest file, Strings file, R file, Layout file, Running the application.	8 Hours
Unit-2:	Emulator -Android Virtual Device, Organizing and accessing the resources, Fragments, Intents & Filters, Basic UI Design, Form widgets, Text Fields, UI Controls, UI Layouts.	8 Hours
Unit-3:	Event Handling: Event Listeners and Handlers, Event Listeners Registration. Preferences, Menus, Custom Components, Tabs and Tab Activity	8 Hours

Unit-4:	Styles and Themes, Drag and Drop, Content Provider (SQLite Programming, SQLiteOpenHelper, SQLiteDatabase, Cursors).	8 Hours
Unit-5:	Location Based Services, Sending Emails, Sending SMS Other developing platform Intro to Objective-C Objective-C and Smalltalk, Objective-C, C, C++ and Mac OS X, Objective-C and iPhone/iPad/iOS Introduction iOS and SDK iOS SDK: iPhone, iPod Touch, Xcode, Interface Builder iPhone Simulator, DebuggerClasses, Objects, Methods and Properties id, null, @interface, @end, @implementation, Archiving, @property, @synthesize, @dynamic, Data Types, control flow statement, More about Classes, More about Variables and Data Types Inheritance, Polymorphism, Dynamic Typing, and Dynamic BindingCocoa and Touch Cocoa Framework and Cocoa Classes Subclassing Xcode Simulator Interface Builder Nib files File's Owner Outlet Connections Action Connections Inspector.	8 Hours

Course Code: ECS757	Professional Elective Courses (PEC)-IV B.Tech (CSE) Semester VII ANDROID PROGRAMMING (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding Activity	
CO2.	Understanding view system	
CO3.	Understanding menu and its types	
CO4.	Applying the web services and map based activity	
CO5.	Developing small android based applications.	
	LIST OF EXPERIMENTS	
	<ol style="list-style-type: none"> 1. Creating Applications with Multiple Activities and a Simple Menu using ListView 2. Creating Activities For Menu Items and Parsing XML Files 3. Writing Multi-Threaded Applications 4. Using WebView and Using the Network 5. Graphics Support in Android 6. Preferences and Content Providers 7. Location Services and Google Maps in Android 	

Course Code: ECS791	Project / Industrial Training/ Seminar-4 B.Tech (CSE) Semester VII	L-0 T-0 P-0 C-4
	INDUSTRIAL TRAINING & PRESENTATION	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding research and development on latest technology.	
CO2.	Understanding greater clarity about academic and career goals	
CO3.	Understanding of administrative functions and company culture	
CO4.	Analyzing a capacity for critical reasoning and independent learning	
CO5.	Developing ability to effectively communicate solution to problems (oral, visual, written).	
	Description	
	<p>Students will have to undergo industrial training of eight weeks in any industry or reputed organization after the VI semester examination in summer. The evaluation of this training shall be included in the VII semester evaluation.</p> <p>The student will be assigned a faculty guide who would be the supervisor of the student. The faculty would be identified before the end of the VI semester and shall be the nodal officer for coordination of the training.</p> <p>Students will prepare an exhaustive technical report of the training during the VII semester which will be duly signed by the officer under whom training was undertaken in the industry/ organization. The covering format shall be signed by the concerned office in-charge of the training in the industry. The officer-in-charge of the trainee would also give his rating of the student in the standard University format in a sealed envelope to the Principal of the college.</p> <p>The student at the end of the VII semester will present his report about the training before a committee constituted by the Director of the College which would comprise of at least three members comprising of the Department Coordinator, Class Coordinator and a nominee of the Director. The students guide would be a special invitee to the presentation. The seminar session shall be an open house session. The internal marks would be the average of the marks given by each member of the committee separately in a sealed envelope to the Director.</p>	

	<p>The marks by the external examiner would be based on the report submitted by the student which shall be evaluated by the external examiner and cross examination done of the student concerned.</p> <p>Not more than three students would form a group for such industrial training/ project submission.</p>	
--	---	--

Internal: 50 Marks

By the faculty guide - 25 marks

By committee appointed by the director – 25 marks

External: 50 Marks

By officer-in-charge trainee in industry – 25 marks

By external examiner appointed by the university – 25 marks

Course Code: ECS799	Project / Industrial Training/ Seminar-5 B.Tech (CSE) Semester VII PROJECT WORK PHASE- 1 (Synopsis, Literature Survey & Presentation)	L-0 T-0 P-8 C-4
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the phases of SDLC and performing initial investigation about project.	
CO2.	Understanding to design ER-Diagram and DFD of the project.	
CO3.	Applying the designing procedures to design database.	
CO4.	Developing SRS Document for the project..	
CO5.	Developing Forms and Front end of the Project.	
	Description	
	<p>A group of students, not more than three, will be assigned a faculty guide who would be the supervisor of the student. The faculty would be identified in the starting of the VII semester.</p> <p>The group will carry out the literature search and collect required material for carrying out the project.</p> <p>The group will prepare a report not exceeding 15 pages at the end of semester.</p> <p>The assessment of performance of students should be made at least twice in each semester i.e. VII and VIII. In this semester the student shall present the progress of project live as also using overheads project or power point presentation on LCD to the internal committee as also the external examiner.</p> <p>The evaluation committee shall consist of faculty members constituted by the college which would comprise of at-least three members comprising of the Department Coordinator, Class Coordinator and a nominee of the Director. The students guide would be a special invitee to the presentation. The seminar session shall be an open house session. The internal marks would be the average of the marks given by each member of the committee separately in a sealed envelope to the Principal.</p>	

The marking shall be as follows.

Internal: 50 Marks

By The Faculty Guide - 25 Marks

By Committee Appointed By the Director – 25 Marks

External: 50 Marks

By External Examiner Appointed By the University – 50 Marks

Course Code: EGP711	DGP-7 B.Tech (CSE) Semester VII DISCIPLINE & GENERAL PROFICIENCY	L-0 T-0 P-0 C-0
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the social responsibilities toward the institute and humanity.	
CO2.	Understanding the need of participations in different events to groom the personality.	
CO3.	Understanding the discipline and follow them during academics and institutional activities.	
CO4	Understanding Social awareness towards society.	
CO5.	Applying actively towards various institution activities like workshop, seminar and other events	
	There shall be continuous evaluation of the student on the following broad parameters:	
	<ol style="list-style-type: none">1. Observance of dress code.2. Participation in Conferences /Workshops / Seminars.3. Attendance in guest lectures, invited talks and special technical sessions organized from time to time.4. Participation in community projects including NSS.5. Exhibiting team spirit in different Culture & extra curriculum activities, Department Club activities of the University and College organized from time to time.6. Observance of rule & regulations in the College/University, Behavior in Campus Premises, Bus, hostel mess and hostel.7. Performance and awards received in different events (sports/ co-curricular activities) organized at College / University and other level.8. General behavior9. Any extraordinary achievement. <p>The above is an indicative list of parameters on which the students shall be continuously evaluated. The college may evaluate the student on the specific parameters by informing them through a notice displayed on the notice board before evaluation. There shall be no external examination for this course; however, the marks shall be included for calculation of cumulative Performance Index (CPI).</p>	

Head of Department would be display GP marks on notice board in prescribed format after IInd & IIIrd CT in semester:

S N o	Enroll No.	Student Name	Dress code	Participation in Conferences /Workshops / Seminars	Participation in guest lectures, invited talks and special technical sessions	Participation in community Services	Participation in Culture & extra curriculum activities, Department Club Activities	Participation in sports/ co- curricular activities	General Behavior	Any Extra Achievement
			(5)	(15)	(20)	(10)	(20)	(20)	(5)	(5)
Responsible for marks			Mentor	Head	Head	Mentor	Cultural Events Coordinator & Department Club Coordinator	Sports Coordinator	Mentor	Director or Principal

Course Code: EHM801	Humanities and Social Sciences including Management Course -6 B.Tech (CSE) Semester VIII Project Management for Engineers	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding Project Management & its evaluation	
CO2.	Understanding and analysis the technical feasibility of a project	
CO3.	Understanding financial system and analyze the use of funding mechanism	
CO4.	Understanding the application of laws related to business and project execution	
CO5.	Understanding Financial Accounting and Financial Statements for business	
Course Content:		
Unit-1:	Project Management & Sources of Funds: Project Management-Introduction, Need, Phases and Processes of Project Management. Financial Markets as Sources of Funds: Money Market & Capital Market. Overview of Regulatory Framework of Financial System in India- SEBI, RBI, and NABARD.	8 Hours
Unit-2:	Project Feasibility & Analysis: Project Identification, Generation Of Ideas, SWOT Analysis, Screening and Project Rating Index. Market & Demand Analysis: Collection of Data, Market Survey, Project Risk Analysis.	8 Hours
Unit-3:	Project Technical Analysis: Selection of Technology, Plant Capacity, Structures and Civil Work. Location- Factors, Costs, Availability of Resources. Environmental Aspects, Project Implementations. Financial Analysis: Project Cost, Cost of Production, Cost of Capital, Time Value of Money.	8 Hours
Unit-4:	Regulatory Framework for Project: Legal Environment of Business, Law of Contract- Meaning and Concepts, Contract of Agent and Agency, Power of Attorney, Consumer Protection Law-Introduction, Rights of Consumers, Complaints & its Remedies, Intellectual Property Law- Introduction, Rights from Patents & Copyright, Infringement its Remedies, Overview of Companies Act, Foreign Exchange Management Law, Labour Laws in India, Various Project Approvals from Local, State & Central Government.	8 Hours
Unit-5:	Basics of Accounting for Project: Introduction, Meaning of Account & Accountancy, Book-keeping, Accounting Process, Users of accounting information, Double Entry Accounting, Accounting Equation. Introduction to Trial Balance, Trading Account, Profit and Loss Account, Balance Sheet, Cash Flow and Fund Flow. Budget-Meaning of a Budget & Budgeting, Budgetary Control, Types of Budgets.	8 Hours
Text Books:	1. Chaudhary, S., Project Management, Tata Mc Graw Hill

Course Code: ECS812	Professional Core Course-18 B.Tech (CSE) Semester VIII Big Data Analytics	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	<i>Understanding</i> the requirement of Big data with respect to 5 V's .	
CO2.	<i>Understanding</i> the basic storage structure used in Big data with respect to clusters.	
CO3.	<i>Understanding</i> the Hadoop Ecosystem and its components.	
CO4.	<i>Analyzing</i> the data processing in Big data with HIVE , PIG and HBASE.	
CO5.	<i>Analyzing</i> the functionality and working of Zookeeper for monitoring Servers in Cluster.	
Course Content:		
Unit-1:	INTRODUCTION TO BIG DATA: Introduction – distributed file system – Big Data and its importance, Four Vs, Drivers for Big data, Big data analytics, Big data applications. Algorithms using map reduce, Matrix-Vector Multiplication by Map Reduce.	8 Hours
Unit-2:	INTRODUCTION HADOOP: Big Data – Apache Hadoop & Hadoop EcoSystem – Moving Data in and out of Hadoop – Understanding inputs and outputs of MapReduce - Data Serialization.	8 Hours
Unit-3:	HADOOP ARCHITECTURE: Hadoop Architecture, Hadoop Storage: HDFS, Common Hadoop Shell commands , Anatomy of File Write and Read., NameNode, Secondary NameNode, and DataNode, Hadoop MapReduce paradigm, Map and Reduce tasks, Job, Task trackers - Cluster Setup – SSH & Hadoop Configuration – HDFS Administering –Monitoring & Maintenance.	8 Hours
Unit-4:	HIVE AND HIVEQL, HBASE: Hive Architecture and Installation, Comparison with Traditional Database, HiveQL – Querying Data - Sorting And Aggregating, Map Reduce Scripts, Joins & Subqueries, HBase conceptsAdvanced Usage, Schema Design, Advance Indexing - PIG, Zookeeper - how it helps in monitoring a cluster, HBase uses Zookeeper and how to Build Applications with Zookeeper	8 Hours
Unit-5:	Big Data Analytics: Introduction to Big data Business Analytics - State of the practice in analytics role of data scientists - Key roles for successful analytic project - Main phases of life cycle - Developing core deliverables for stakeholders.	8 Hours
Text Books:	Boris lublinsky, Kevin t. Smith, Alexey Yakubovich, “Professional Hadoop Solutions”,	

	Wiley, ISBN: 9788126551071, 2015.

Course Code: ECS809	Professional Elective Courses (PEC)-5 B.Tech (CSE) Semester VIII PATTERN RECOGNITION	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concept of a pattern and the various approaches of pattern recognition.	
CO2.	Understanding the basic methods of feature extraction, feature evaluation, and dimension reduction of feature vectors.	
CO3.	Understanding various supervised and unsupervised learning approaches.	
CO4.	Understanding machine learning concepts and range of problems that can be handled by machine learning.	
CO5.	Applying both supervised and unsupervised classification methods to detect and characterize patterns in real-world data.	
Course Content:		
Unit-1:	Introduction: Basics of pattern recognition, Design principles of pattern recognition system, Learning and adaptation, Pattern recognition approaches, Mathematical foundations – Linear algebra, Probability Theory, Expectation, mean and covariance, Normal distribution, multivariate normal densities, Chi squared test.	8 Hours
Unit-2:	Statistical Pattern Recognition: Bayesian Decision Theory, Classifiers, Normal density and discriminate functions.	8 Hours
Unit-3:	Parameter estimation methods: Maximum-Likelihood estimation, Bayesian Parameter estimation, Dimension reduction methods - Principal Component Analysis (PCA), Fisher Linear discriminate analysis, Expectation-maximization (EM), Hidden Markov Models (HMM), Gaussian mixture models.	8 Hours
Unit-4:	Nonparametric Techniques: Density Estimation, Parzen Windows, K-Nearest Neighbor Estimation, Nearest Neighbor Rule, Fuzzy classification.	8 Hours
Unit-5:	Unsupervised Learning & Clustering: Criterion functions for clustering, Clustering Techniques: Iterative square - error partitional clustering – K means, agglomerative hierarchical clustering, Cluster validation.	8 Hours
Text Books:	1Richard O. Duda, Peter E. Hart and David G. Stork, "Pattern Classification",	
Reference Books:	S. Theodoridis and K. Koutroumbas, "Pattern Recognition", 4th Edition, Academic Press, 2009. * Latest editions of all the suggested books are recommended.

Course Code: ECS810	Professional Elective Courses (PEC)-5 B.Tech (CSE) Semester VIII NEURAL NETWORK	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the human brain, role of neurons, neuroscience, neuro-computing and learning process in neurons	
CO2.	Understanding the basic models and functions of neurons & perceptrons	
CO3.	Analyzing the role of mean square and gradient descent algorithm for non linearly separable problems	
CO4.	Analyzing the model consisting of multilayer neurons using back propagation for better reliability and approximation	
CO5.	Applying the principal component, features of Recurrent network and temporal feed forward network and display their computer simulation	
Course Content:		
Unit-1:	Neuro computing and Neuroscience Historical notes, human Brain, neuron Mode, Knowledge representation, N.N Learning process: Supervised and unsupervised learning, Error correction learning, competitive learning, adaptation.	8 Hours
Unit-2:	Basic Models of Artificial neurons, activation Functions, aggregation function, single neuron computation, multilayer perceptron, least mean square algorithm, gradient descent rule, nonlinearly separable problems in NN.	8 Hours
Unit-3:	Multilayered network architecture, back propagation algorithm, heuristics for making BP algorithm performs better, approximation properties of RBF networks and comparison with multilayer perceptron.	8 Hours
Unit-4:	Recurrent network and temporal feed-forward network, implementation with BP, self organizing map and SOM algorithm, properties of feature map and computer simulation. Principal component and Independent component analysis.	8 Hours
Unit-5:	Analyticity of activation function, Complexity analysis of network models, Soft computing, Neuro-Fuzzy-genetic algorithm Integration.	8 Hours
Text Books:	1. J.A. Anderson, An Introduction to Neural Networks, MIT	
Reference Books:	1. R.L. Harvey, Neural Network Principles, PHI 2. Kosko, Neural Network and Fuzzy Sets, PHI * Latest editions of all the suggested books are recommended.

Course Code: ECS811	Professional Elective Courses (PEC)-V B.Tech (CSE) Semester VIII NATURAL LANGUAGE PROCESSING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the VC dimension and PAC learning models for noise reduction, model selection and generalization	
CO2.	Understanding the role of Bayesian Decision theory for classification	
CO3.	Understanding dimensionality reduction principles for scaling and analysis of models	
CO4.	Understanding the concept of clustering and maximization algorithm	
CO5.	Understanding the back propagation in multilayer neural networks and role of perceptrons in ANN models	
Course Content:		
Unit-1:	Introduction: Machine learning problems, Types of learning, Applications of Machine Learning, Key elements of Machine Learning, Supervised Learning: Vapnik-Chervonenkis (VC) Dimension, Probably Approximately Correct (PAC) Learning, Noise, Learning Multiple Classes, Regression, Model Selection and Generalization.	8 Hours
Unit-2:	Bayesian Decision Theory: Classification, Losses and Risks, Association Rules, Dimensionality Reduction: Subset Selection, Principal Components Analysis, Multidimensional Scaling, Linear Discriminant Analysis.	8 Hours
Unit-3:	Clustering: Mixture Densities, k-Means Clustering, Expectation-Maximization Algorithm, Supervised Learning after Clustering, Hierarchical Clustering, Classification: Decision Trees, Univariate Trees, Pruning, Rule Extraction from Trees, Learning Rules from Data.	8 Hours
Unit-4:	Artificial Neural Networks: Introduction, neural network representation, perceptrons, multilayer networks and back propagation algorithm.	8 Hours
Unit-5:	Local Models: Introduction, Competitive Learning, Radial Basis Functions, Incorporating Rule-Based Knowledge, Normalized Basis Functions, Competitive Basis Functions, Learning Vector Quantization, Hierarchical Mixture of Experts.	8 Hours
Text Books:	1. Ethem Alpaydin, "Introduction to Machine Learning" 2nd Edition, The MIT Press, 2010.

Course Code: ECS814	Professional Elective Courses (PEC)-V B.Tech (CSE) Semester VIII	L-3 T-0 P-0 C-3
	BLOCK CHAIN TECHNOLOGY	
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding of the history of Block-chain ,different models and protocols	
CO2.	Understanding the basic of crypto-currency and different algorithms used in it.	
CO3.	Understanding the concept of Bitcoin and analysis of its properties using mathematical induction	
CO4.	Understanding the concept of Ethereum, Ethereum Virtual Machine (EVM) and smart concepts	
CO5.	Understanding the concept of Zero Knowledge proofs and protocols	
Course Content:		
Unit-1:	The consensus problem - Asynchronous Byzantine Agreement - AAP protocol and its analysis - Nakamoto Consensus on permission-less, nameless, peer-to-peer network - Abstract Models for BLOCKCHAIN - GARAY model - RLA Model - Proof of Work (PoW) as random oracle - formal treatment of consistency, liveness and fairness - Proof of Stake (PoS) based Chains - Hybrid models (PoW + PoS)	8 Hours
Unit-2:	cryptographic basics for cryptocurrency - a short overview of Hashing, signature schemes, encryption schemes and elliptic curve cryptography	8 Hours
Unit-3:	Bitcoin - Wallet - Blocks - Merkley Tree - hardness of mining - transaction verifiability - anonymity - forks - double spending - mathematical analysis of properties of Bitcoin	8 Hours
Unit-4:	Ethereum - Ethereum Virtual Machine (EVM) - Wallets for Ethereum - Solidity - Smart Contracts - some attacks on smart contracts	8 Hours
Unit-5:	(Trends and Topics) - Zero Knowledge proofs and protocols in Blockchain - Succinct non interactive argument for Knowledge (SNARK) - pairing on Elliptic curves - Zcash.	8 Hours
Text Books:	1. Arvind Narayanan, Joseph Bonneau, Edward Felten, Andrew Miller, and Steven Goldfeder. Bitcoin and cryptocurrency technologies: a comprehensive introduction. Princeton University Press, 2016.

Course Code: ECS805	Professional Elective Courses (PEC)-VI B.Tech (CSE) Semester VIII DISTRIBUTED SYSTEM	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding fundamental characteristics of distributed system.	
CO2.	Understanding the concept of distributed objects and remote invocation methods.	
CO3.	Understanding different distributed models for remote communication.	
CO4.	Understanding the security mechanism and protocols for distributed transactions.	
CO5.	Analyzing the concept of distributed algorithms and their performance associated with security issues and distributed deadlock.	
Course Content:		
Unit-1:	Characterization of Distributed Systems: Introduction, Examples of distributed Systems, Resource sharing and the Web Challenges. System Models: Architectural models, Fundamental Models Theoretical Foundation for Distributed System: Limitation of Distributed system, absence of global clock, shared memory, Logical clocks, Lamport and vectors logical clocks, Causal ordering of messages, global state, termination detection. Distributed Mutual Exclusion: Classification of distributed mutual exclusion, requirement of mutual exclusion theorem, Token based and non token based algorithms, performance metric for distributed mutual exclusion algorithms.	8 Hours
Unit-2:	Distributed Deadlock Detection: system model, resource Vs communication deadlocks, deadlock prevention, avoidance, detection & resolution, centralized dead lock detection, distributed dead lock detection, path pushing algorithms, edge chasing algorithms. Agreement Protocols: Introduction, System models, classification of Agreement Problem, Byzantine agreement problem, Consensus problem, Interactive consistency Problem, Solution to Byzantine Agreement problem, Application of Agreement problem, Atomic Commit in Distributed Database system.	8 Hours
Unit-3:	Distributed Objects and Remote Invocation: Communication between distributed objects, Remote procedure call, Events and notifications, Java RMI case study. Security: Overview of security techniques, Cryptographic algorithms, Digital signatures Cryptography pragmatics, Case studies: Needham Schroeder, Kerberos, SSL& Millicent. Distributed File Systems: File service architecture, Sun Network File System, The Andrew File System, Recent advances.	8 Hours

Unit-4:	Transactions and Concurrency Control: Transactions, Nested transactions, Locks, Optimistic Concurrency control, Timestamp ordering, Comparison of methods for concurrency control. Distributed Transactions: Flat and nested distributed transactions, Atomic Commit protocols, Concurrency control in distributed transactions, Distributed deadlocks, Transaction recovery. Replication: System model and group communication, Fault - tolerant services, highly available services, Transactions with replicated data.	8 Hours
Unit-5:	Distributed Algorithms: Introduction to communication protocols, Balanced sliding window protocol, Routing algorithms, Destination based routing, APP problem, Deadlock free Packet switching, Introduction to Wave & traversal algorithms, Election algorithm. CORBA Case Study: CORBA RMI, CORBA services.	8 Hours
<u>Text Books:</u>	1. Singhal&Shivaratri, "Advanced Concept in Operating Systems", McGraw Hill	
<u>Reference Books:</u>	1. Coulouris, Dollimore, Kindberg, "Distributed System: Concepts and Design", Pearson Ed. 2. Gerald Tel, "Distributed Algorithms", Cambridge University Press * Latest editions of all the suggested books are recommended.

Course Code: ECS815	Professional Elective Courses (PEC)-VI B.Tech (CSE) Semester VIII Concepts of IoT (Internet of Things)	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the concepts of IOT	
CO2.	Understanding the architecture, different models and design principles of IOT.	
CO3.	Understanding the different technologies related to IOT.	
CO4.	Understanding the concepts of smart city development in IOT.	
CO5.	Applying IOT concepts in real word scenario like industrial automation, wireless communication etc.	
Course Content:		
Unit-1:	Introduction to Internet in general and Internet of Things: Introduction to Internet: layers, protocols, packets, services; Local Area Networks, MAC level, link protocols such as: point-to-point protocols, Ethernet, WiFi 802.11, cellular Internet access, and Machine-to-Machine (M2M).	8 Hours
Unit-2:	IoT Technology Fundamentals: IoT definitions: overview, applications, potential & challenges, and architecture; Devices and gateways, Local and wide area networking; Data management, Business processes in IoT, Everything as a Service(XaaS), IoT Analytics, Knowledge Management.	8 Hours
Unit-3:	IoT-An Architectural Overview– Building an architecture, Main design principles and needed capabilities, An IoT architecture outline, standards considerations. IoT examples: Case studies, e.g. sensor body-area-network and control of a smart home.	8 Hours
Unit-4:	IoT Architecture-State of the Art – Introduction, State of the art, Architecture Reference Model- Introduction, Reference Model and architecture, IoT reference Model; IoT Reference Architecture: Introduction, Functional View, Information View, Deployment and Operational View, Other Relevant architectural views.	8 Hours
Unit-5:	Real-World Design Constraints- Introduction, Technical Design constraints, Data representation and visualization, Interaction and remote control. Uses of IoT in Industrial Automation, Commercial Building Automation, Wireless communication, etc.	8 Hours
Text Books:	1. Jan Holler, Vlasios Tsiatsis, Catherine Mulligan, Stefan Avesand, Stamatis Karnouskos, David Boyle, “From Machine-	

	to-Machine to the Internet of Things: Introduction to a New Age of Intelligence”, 1st Edition, Academic Press, 2014.

Course Code: ECS813	Professional Elective Courses (PEC)-VI B.Tech (CSE) Semester VIII MACHINE LEARNING	L-3 T-0 P-0 C-3
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the learning and different types of learning approaches that could be used for implementing Machine Learning problems.	
CO2.	Understanding the key elements of Machine Learning and the importance of model selection and generalization	
CO3.	Understanding the various components of Bayesian Decision Theory and Dimensionality Reduction for solving Machine Learning problems	
CO4.	Understanding the various approaches of Clustering and Classification for improving the learning capability of machine	
CO5.	Understanding the functions based on various rules and parameters for implementing competitive learning in Machine Learning	
CO6.	Understanding the Artificial Neural Network based multilayer networks supporting both forward and backward propagation	
CO7.	Understanding the Deep Learning and how it is different from Machine Learning and areas where Deep Learning is implemented	
CO8.	Evaluating multiple supervised learning algorithms and select the best suitable for a specific problem	
Course Content:		
Unit-1:	Introduction to Machine Learning: Introduction; History, Advantages, Scope and Applications; Learning Algorithms: Supervised Learning; Unsupervised Learning; Semi-Supervised Learning; Reinforcement Learning. Decision Trees: Introduction, Scope, Advantages; Hunt's algorithm for learning a decision tree; Details of tree induction;	8 Hours
Unit-2:	KNNs, SVMs and Naïve Bayes: Examples of few text classification problems; Naïve Bayes for text classification; Introduction to KNN algorithm; Decision boundary KNN Vs Decision tree; What is the best K; KNN Problems; Feature selection using KNNs; Linear Classifiers; Learning non-linear patterns.	8 Hours
Unit-3:	ANN and Regression: Motivation for Artificial Neural Network; Perceptron Algorithm; Decision Boundary for a single Neuron; Introduction to Linear Regression; R^2 : Coefficient of Determination; Logistic regression vs Linear Regression; Can we use Regression Mechanism for Classification?; Logistic Regression – Deriving the Formula; Logistic Regression for Multi-class Classification; Logistic Regression Decision Boundary.	8 Hours
Unit-4:	Feature Selection: Introduction to feature selection: what, why, how and where?; Feature selection vs feature extraction; Feature subset	8 Hours

	selection using Filter based methods; Wrapper Methods; Wrapper Methods vs Filter Methods; Model based machine learning with regularization; Regularization using L2 and L1.	
Unit-5:	Sequence Labeling, Clustering: Introduction to Sequence Learning; Sequence Labeling as Classification; Probabilistic Sequence Models; Hidden Markov Model; Three Problems of an HMM. Basics of Clustering; Applications of Clustering; Understanding Distance based Clustering; K-means Algorithm; Hierarchical (Agglomerative) clustering; Evaluation of cluster quality	8 Hours
<u>Text Books:</u>	1. Brian, O, <i>Management Information System</i> , Tata McGraw Hill.	
<u>Reference Books:</u>	1. Brian, O., <i>Introduction to Information System</i> , McGraw Hill. 2. Jawadekar, W., <i>Management Information System</i> , Tata McGraw Hill. 3. Jain, S., <i>Management Information System</i> , Tata McGraw Hill. * Latest editions of all the suggested books are recommended.

Course Code: ECS855	Laboratory Course-21 B.Tech (CSE) Semester III BIG DATA (LAB)	L-0 T-0 P-2 C-1
Course Outcomes:	On completion of the course, the students will be :	
CO1.	<i>understanding</i> the concept to work with basic linux commands.	
CO2.	<i>Applying</i> the concept to install a standalone Hadoop cluster Node.	
CO3.	<i>Applying</i> the concept to read and write data into HDFS from Linux environment.	
CO4.	<i>Applying</i> the concept to solve a problem using MAP Reduce programming.	
CO5.	<i>Analyzing</i> the concept for data processing using HIVE.	
	LIST OF EXPERIMENTS	
	1. Introduction, use and assessment of most recent advancements in Big Data technology along with their usage and implementation with relevant tools and technologies. 2. Map Reduce application for word counting on Hadoop cluster. 3. Unstructured data into NoSQL data and do all operations such as NoSQL query with API. 4. K-means clustering using map reduce. 5. Page Rank Computation. 6. Data retrieval from AQL. 7. Data Retrieval from JQL 8. Use Hadoop related tools such as HBase, Cassandra, Pig, and Hive for big data Analytics	

Course Code: ECS899	Project / Industrial Training/ Seminar-6 B.Tech (CSE) Semester III PROJECT WORK PHASE-2	L-0 T-0 P-12 C-6
Course Outcomes:	On completion of the course, the students will be :	
CO1.	Understanding the process of Project development.	
CO2.	Applying the knowledge to develop applications based on SRS Document.	
CO3.	Applying the learning to develop applications on different platforms like Window, Web based or Mobile based applications to specific set of problem and their solutions.	
CO4.	Evaluating the test cases results after testing of the project along with different roles.	
CO5.	Developing good quality project to solve real world problems.	
	Students should devote themselves to prepare something tangible, which could be a working model of their thoughts based on their subject of choice.	
	The project shall be finalized by the students based on the VII semester project work report and shall be completed and submitted at least one month before the last teaching day of the VIII semester, date of which shall be notified in the academic calendar.	
	The assessment of performance of students should be made at least twice in each semester i.e. VII and VIII. In this semester student shall present the final project live as also using overheads project or power point presentation on LCD to the internal committee as also the external examiner.	
	The evaluation committee shall consist of faculty members constituted by the college which would comprise of at-least three members comprising of the Department Coordinator, Class Coordinator and a nominee of the Director. The students guide would be a special invitee to the presentation. The seminar session shall be an open house session. The internal marks would be the average of the marks given by each member of the committee separately in a sealed envelope to the Principal.
